Traditional Arid Lands Agriculture Scott E. Ingram,Robert C. Hunt,2015-04-02 Traditional Arid Lands Agriculture is the first of its kind. Each chapter considers four questions: what we don't know about specific aspects of traditional agriculture, why we need to know more, how we can know more, and what research questions can be pursued to know more. What is known is presented to provide context for what is unknown. Traditional agriculture, nonindustrial plant cultivation for human use, is practiced worldwide by millions of smallholder farmers in arid lands. Advancing an understanding of traditional agriculture can improve its practice and contribute to understanding the past. Traditional agriculture has been practiced in the U.S. Southwest and northwest Mexico for at least four thousand years and intensely studied for at least one hundred years. What is not known or well-understood about traditional arid lands agriculture in this region has broad application for research, policy, and agricultural practices in arid lands worldwide. The authors represent the disciplines of archaeology, anthropology, agronomy, art, botany, geomorphology, paleoclimatology, and pedology. This multidisciplinary book will engage students, practitioners, scholars, and any interested in understanding and advancing traditional agriculture.

Pima and Papago Indian Agriculture Edward Franklin Castetter,Willis H. Bell,1980

At the Desert's Green Edge Amadeo M. Rea,1997-11-01 Winner of the Society for Economic Botany's Klinger Book Award The Akimel O'odham, or Pima Indians, of the northern Sonoran Desert continue to make their home along Arizona's Gila River despite the alarming degradation of their habitat that has occurred over the past century. The oldest living Pimas can recall a lush riparian ecosystem and still recite more than two hundred names for plants in their environment, but they are the last generation who grew up subsisting on cultivated native crops or wild-foraged plants. Ethnobiologist Amadeo M. Rea has written the first complete ethnobotany of the Gila River Pima and has done so from the perspective of the Pimas themselves. At the Desert's Green Edge weaves the Pima view of the plants found in their environment with memories of their own history and culture, creating a monumental testament to their traditions and way of life. Rea first discusses the Piman people, environment, and language, then proceeds to share their botanical knowledge in entries for 240 plants that systematically cover information on economic botany, folk taxonomy, and linguistics. The entries are organized according to Pima life-form categories such as plants growing in water, eaten greens, and planted fruit trees. All are anecdotal, conveying the author's long personal involvement with the Pimas, whether teaching in their schools or learning from them in conversations and interviews. At the Desert's Green Edge is an archive of otherwise unavailable plant lore that will become a benchmark for botanists and anthropologists. Enhanced by more than one hundred brush paintings of plants, it is written to be equally useful to nonspecialists so that the Pimas themselves can turn to it as a resource regarding their former lifeways. More than an encyclopedia of facts, it is the Pimas' own story, a witness to a changing way of life in the Sonoran Desert.

Where the Red-Winged Blackbirds Sing Jennifer Bess,2021-04-01 Where the Red-Winged Blackbirds Sing examines the

ways in which the Akimel O'odham ("River People") and their ancestors, the Huhugam, adapted to economic, political, and environmental constraints imposed by federal Indian policy, the Indian Bureau, and an encroaching settler population in Arizona's Gila River Valley. Fundamental to O'odham resilience was their connection to their sense of peoplehood and their himdag ("lifeway"), which culminated in the restoration of their water rights and a revitalization of their Indigenous culture. Author Jennifer Bess examines the Akimel O'odham's worldview, which links their origins with a responsibility to farm the Gila River Valley and to honor their history of adaptation and obligations as "world-builders"—co-creators of an evermore life-sustaining environment and participants in flexible networks of economic exchange. Bess considers this worldview in context of the Huhugam—Akimel O'odham agricultural economy over more than a thousand years. Drawing directly on Akimel O'odham traditional ecological knowledge, innovations, and interpretive strategies in archives and interviews, Bess shows how the Akimel O'odham engaged in agricultural economy for the sake of their lifeways, collective identity, enduring future, and actualization of the values modeled in their sacred stories. Where the Red-Winged Blackbirds Sing highlights the values of adaptation, innovation, and co-creation fundamental to Akimel O'odham lifeways and chronicles the contributions the Akimel O'odham have made to American history and to the history of agriculture. The book will be of interest to scholars of Indigenous, American Southwestern, and agricultural history.
