Concurrency Akinori Yonezawa, Takayasu Ito, 1991-04-10 This volume is a collection of papers on topics focused around concurrency, based on research work presented at the UK/Japan Workshop held at Wadham College, Oxford, September 25-27, 1989. The volume is organized into four parts: - Papers on theoretical aspects of concurrency which reflect strong research activities in the UK, including theories on CCS and temporal logic RDL. - Papers on object orientation and concurrent languages which reflect major research activities on concurrency in Japan. The languages presented include extensions of C, Prolog and Lisp as well as object-based concurrent languages. - Papers on parallel architectures and VLSI logic, including a rewrite rule machine, a graph rewriting machine, and a dataflow architecture. - An overview of the workshop including the abstracts of the talks and the list of participants. The appendix gives a brief report of the first UK/Japan Workshop in Computer Science, held at Sendai, Japan, July 6-9, 1987.

Bid to Win on Ebay Patrick C. Cook, 2004 Bid to Win on eBay takes an in-depth look at strategies for bidding in eBay online auctions. Competitive bidding tactics are explored that help the reader competitively position in eBay auctions. Strategic bidding enhances the enjoyment of buying on eBay and helps the reader remain aware and alert leading to a safer and more enjoyable experience with eBay auctions.

Unlock the Zodiac Sasha Fenton, 2019-07-01 Some people believe they are absolutely typical of their sun sign, while others see little of themselves in the descriptions given in most astrology books. Written for beginners as well as astrology students, this informative volume explains why one sun sign can include many different personalities. There are many possible astrological

reasons for the diversification within each sign, but this book demonstrates two main factors that are easy for a complete beginner in astrology to understand and to use: decans and dwads. The system presented here is simple and effective and does not require learning the complexities of chart interpretation. Each sign of the zodiac can be divided into three sections called decans, and each decan can be divided into four dwads. These divisions can lead to many variations in personalities of people born under a specific sign, including those between twins. Determine your decan and dwad on the easy-to-use tables provided, then see what their interpretations say about your life. Find out how to progress your sun sign to check out trends and events for any year of your life. After you've evaluated yourself, you can enjoy doing the same for your family and friends. Although perfect for beginners, the simplicity of this approach makes it a handy tool for working astrologers and includes information on gender, elements, and qualities and how they relate to the sun sign.

Deconstructing Ergativity Maria Polinsky, 2016 Building upon theoretical innovations and extensive empirical findings, this book explains variation in the syntactic behavior of ergative arguments across languages. It offers a new analysis of ergativity by recognizing two distinct types, PP-ergative- and DP-ergative-languages. Each type is characterized by a set of correlated features which result in structural consistency.

The Middle Voice in Baltic Axel Holvoet, 2020-05-15 The fifth volume in the VARGReB series is a monograph presenting a collection of studies on middle-voice grams in Baltic, that is, on a widely ramified family of constructions with different syntactic and semantic properties but sharing a morphological marker of reflexive origin. Though the emphasis is on Baltic, ample attention is given to other languages as well, especially to Slavonic. The book offers many new insights into questions of syntactic and semantic interpretation, correct demarcation and

diachronic explanation of middle-voice grams. The relationship between reflexive and middle, the workings of metonymy, changes in syntactic structure and lexical input as factors determining diachronic shifts within the middle-voice domain and transitions from one middle-voice gram to another – these are among the topics discussed in the book, which, beyond its relevance to Baltic and Slavonic scholarship, is also a contribution to the typology of the middle voice.

King Alfred's Anglo-Saxon version of Boethius De consolatione philosophiae Boethius, 2017-09-06 The Old English Boethius is an Old English translation / adaptation of the sixth-century Consolation of Philosophy by Boethius, dating from between c. 880 and 950. Boethius's work is prosimetrical, alternating between prose and verse, and one of the two surviving manuscripts of the Old English translation renders the poems as Old English alliterative verse: these verse translations are known as the Metres of Boethius. NOTE: While Introduction and notes are in modern English, and a glossary is also included, the book does not contain a translation into modern English of the text of Consolation of Philosophy.

Programming Languages and Systems Rocco De Nicola, 2007-07-16 This book constitutes the refereed proceedings of the 16th European Symposium on Programming, ESOP 2007, held in Braga, Portugal in March/April 2007. It covers models and languages for Web services, verification, term rewriting, language based security, logics and correctness proofs, static analysis and abstract interpretation, semantic theories for object oriented languages, process algebraic techniques, applicative programming, and types for systems properties.

A Future for Public Service Television Des Freedman, Vana Goblot, 2018-05-04 A guide to the nature, purpose, and place of

public service television within a multi-platform, multichannel ecology. Television is on the verge of both decline and rebirth. Vast technological change has brought about financial uncertainty as well as new creative possibilities for producers, distributors, and viewers. This volume from Goldsmiths Press examines not only the unexpected resilience of TV as cultural pastime and aesthetic practice but also the prospects for public service television in a digital, multichannel ecology. The proliferation of platforms from Amazon and Netflix to YouTube and the vlogosphere means intense competition for audiences traditionally dominated by legacy broadcasters. Public service broadcasters—whether the BBC, the German ARD, or the Canadian Broadcasting Corporation—are particularly vulnerable to this volatility. Born in the more stable political and cultural conditions of the twentieth century, they face a range of pressures on their revenue, their remits, and indeed their very futures. This book reflects on the issues raised in Lord Puttnam's 2016 Public Service TV Inquiry Report, with contributions from leading broadcasters, academics, and regulators. With resonance for students, professionals, and consumers with a stake in British media, it serves both as historical record and as a look at the future of television in an on-demand age. Contributors include Tess Alps, Patrick Barwise, James Bennett, Georgie Born, Natasha Cox, Gunn Enli, Des Freedman, Vana Goblot, David Hendy, Jennifer Holt, Amanda D. Lotz, Sarita Malik, Matthew Powers, Lord Puttnam, Trine Syvertsen, Jon Thoday, Mark Thompson

The Bantu Noun Phrase Blasius Achiri-Taboh, 2023-11-27 This collection of original essays addresses salient issues in a range of empirical and conceptual analyses, providing detailed case studies of phenomena in Bantu languages and robust and interesting discussions on the structure of the noun phrase. This volume speaks to contemporary debates on the Bantu noun phrase, seeking to stimulate a greater understanding of the true

nature of adnominal modification, definiteness, and anaphoric relations associated with it, with respect to various segmental and supra-segmental, noun formation, and noun classification phenomena. The ten chapters take the reader through the Grassfields, North-Western, North-Eastern and Southern present-day Bantu homeland, making important contributions to the documentation and analysis of Bantu languages. The Bantu Noun Phrase: Issues and Perspectives is unique in its inclusion of so many North-Eastern Bantu languages in its discourse on Bantu linguistics and this important collection will be of particular interest to those researching, teaching, and studying African languages and linguistics.

Digital Archaeology Michael W Graves, 2013-08-16 The Definitive, Up-to-Date Guide to Digital Forensics The rapid proliferation of cyber crime is increasing the demand for digital forensics experts in both law enforcement and in the private sector. In Digital Archaeology, expert practitioner Michael Graves has written the most thorough, realistic, and up-to-date guide to the principles and techniques of modern digital forensics. Graves begins by providing a solid understanding of the legal underpinnings of and critical laws affecting computer forensics, including key principles of evidence and case law. Next, he explains how to systematically and thoroughly investigate computer systems to unearth crimes or other misbehavior, and back it up with evidence that will stand up in court. Drawing on the analogy of archaeological research, Graves explains each key tool and method investigators use to reliably uncover hidden information in digital systems. His detailed demonstrations often include the actual syntax of command-line utilities. Along the way, he presents exclusive coverage of facilities management, a full chapter on the crucial topic of first response to a digital crime scene, and up-to-the-minute coverage of investigating evidence in the cloud. Graves concludes by presenting coverage of important professional and business issues associated with building a career
