The Black Consciousness Reader Baldwin Ndaba, Therese Owen, Masego Panyane, Rabbie Sermula, Janet Smith, 2019-04-25 There is a current revival of Black Consciousness, as political and student movements around the world – as well as academics and campaigners working in decolonization – reconfigure the continued struggle for socio-economic revolution. Yet the roots of Black Consciousness and its relation to other movements such as Black Lives Matter have only begun to be explored. Black Consciousness has deep connections to the struggle against apartheid. The Black Consciousness Reader is an essential collection of history, culture, philosophy and meaning of Black Consciousness by some of the thinkers, artists and activists who developed it in order to finally bring revolution to South Africa. A contribution to the world's Black cultural archive, it examines how the proper acknowledgement of Blackness brings a greater love, a broader sweep of heroes and a wider understanding of intellectual and political influences. Although the legendary murdered activist Steve Biko is a strong figure within this history, the book documents many other significant international Black Consciousness personalities and focuses a predominantly African eye on Black Consciousness in politics, land, women, power, art, music and religion. Onkgopotse Tiro, Vuyelwa Mashalaba, Winnie Madikizela-Mandela, Assata Shakur, Marcus Garvey, Neville Alexander, Thomas Sankara, Malcolm X, Don Mattera, Keorapetse Kgotsile, W.E.B. DuBois, Walter Rodney, Mongane Wally Serote, Ready D and Zola are among the many bold minds included in this amalgam of facts, ideas and images.

Success in Higher Education Leigh N. Wood, Yvonne A. Breyer, 2016-10-26 This book explores successful transition strategies to, within and from university for students from around the globe, with Macquarie University, a large Australian university, studied in depth. It addresses the meaning of success taking a variety of perspectives, including student, staff and employer views. The chapters present a series of initiatives that have proven to be successful in assisting students in developing their academic potential throughout university and beyond. The authors of the chapters use a variety of methodologies and approaches reflecting the diverse local contexts and requirements. These international perspectives demonstrate a triumph of practice that has led to the empowerment of individuals and groups. The approaches from twelve universities located in eight different countries stem directly from the coalface and provide many valuable lessons and tools that colleagues in the sector will be able to consider and adapt in their own contexts. Small interventions matter, from a mentor of a nervous student who goes on to achieve greatness, to the use of a curriculum design model that hooks a whole group of students into learning and achievement. This book covers both the small, individual victories and the larger scale strategies that support success. Contributions emanate from Australia, Bangladesh, India, China, New Zealand, United Kingdom, Canada, USA, Uruguay and South Africa.

Corpora in Language Teaching and Learning Yvonne Alexandra Breyer, 2011 This book highlights the potential and the challenges of corpora in language education with a particular focus on the teacher's perspective. For this purpose, the study explores the relevance of the corpus approach to central paradigms underlying contemporary language education. Furthermore, a critical analysis investigates the persisting gap between research findings and their implementation in teaching practices. As a result, key factors in advancing the popularisation of corpora in language education are identified. A survey and a case study verify this gap and, importantly, underline the pivotal role of adequate teacher education if corpus-based language teaching is to make any significant impact on current teaching practices.
