Palm's Theorem for Nonstationary Processes Gordon Crawford, 1981-01-01 Like most models for calculating stock requirements, the models used by the Air Force to calculate requirements and allocations have traditionally assumed that the failure process generates arrivals approximating a steady-state Poisson arrival process. Although many real-world arrival processes are approximately Poisson, few exhibit steady-state behavior in the long run. To understand capabilities and requirements in real-world scenarios, we must model the transition from peacetime to wartime failure rates and know the distribution of the number of parts in the repair pipeline. Classically these models have used a steady-state result known as Palm's Theorem to model the number of spare parts in the repair pipeline. The research reported here generalizes this theory and allows the precise calculation of the distribution of the number of parts in the repair pipeline at any time during a time-varying or dynamic scenario, which may include abrupt transitions in the level of activity.

*The Wiley Handbook of Global Educational Reform* Kenneth J. Saltman, Alexander J. Means, 2018-08-30 The Wiley Handbook of Global Educational Reform examines educational reform from a global perspective. Comprised of approximately 25 original and specially commissioned essays, which together interrogate educational reform from a critical global and transnational perspective, this volume explores a range of topics and themes that fully investigate global convergences in educational reform policies, ideologies, and practices. The Handbook probes the history, ideology, organization, and institutional foundations of global educational reform movements; actors, institutions, and agendas; and local, national, and global education reform trends. It further examines the “new managerialism” in global educational reform, including the standardization of national systems of educational governance, curriculum, teaching, and learning through the rise of new systems of privatization, accountability, audit, big-data, learning analytics, biometrics, and new technology-driven adaptive learning models. Finally, it takes on the subjective and intersubjective experiential dimensions of the new educational reforms and alternative paths for educational reform tied to the ethical imperative to reimagine education for human flourishing, justice, and equality. An authoritative, definitive volume and the first global take on a subject that is grabbing headlines as well as preoccupying policy makers, scholars, and teachers around the world Edited by distinguished leaders in the field Features contributions from an illustrious list of experts and scholars The Wiley Handbook of Global Educational Reform will be of great interest to scholars and graduate students of education throughout the world as well as the policy makers who can institute change.

Palm Desert Historical Society of Palm Desert, Hal Rover, 2009 Desert insiders know Palm Desert as the geographic and cultural heart of the Coachella Valley. This resort town with over 30 golf courses started as a barren outpost aptly named Sand Hole. Founder Cliff Henderson envisioned a modern utopia growing from the scrub and as a centerpiece built the Shadow Mountain Club in 1948. With its glamorous figure-eight swimming pool and high-dive competitions, the club drew celebrities, presidents, and future residents. Cliff's brother Randall Henderson spotlighted another side of desert life when he established the headquarters of Desert Magazine in the new town, luring readers to pack up their jeeps and move to Palm Desert. The brothers' twin vision made Palm Desert the irresistible blend of city and wilderness it is today. Visitors can shop El Paseo, known as the Rodeo Drive of the Desert, and then in 10 minutes embark on a mountainous thrill ride at the Palms to Pines Highway.

Piloting Palm Andrea Butter, David Pogue, 2002-02-18 The definitive behind-the-scenes story of the visionary team that launched the handheld industry. Palm insider Andrea Butter and New York Times columnist David Pogue -- with full, exclusive cooperation of the company's founders and more than fifty key Palm and Handspring executives -- tell the riveting tale of the start of an industry constantly in the headlines. The origins of this volatile industry began with the tiny team who beat staggering odds to turn the PalmPilot into a billion-dollar market and later took their ultimate vision to Handspring, now Palm's most powerful rival. Many of today's current events relating to the competition in this industry are forecasted in this important business drama. The authors take an unprecedented look at how the visionary founders of the industry led one of the most successful startups in history to succeed against all odds-including a shoestring budget, shortsighted corporate partners, and competition from Microsoft. The roller-coaster ride is full of insight into the bungles of venture capitalists, the allure and pitfalls of partnerships with giant corporations, and the steely determination needed to maintain entrepreneurial and visionary independence. With gripping accounts of the last-minute crises that almost torpedoed the PalmPilot on the eve of its unveiling, and the triumphant, unprecedented reception of Palm in the marketplace, as well as the glimpses into the future of this industry, this book is as entertaining as it is instructional. Key revelations include: \* The principles of business, economy, and product design that led Palm to succeed where billion-dollar corporations like Apple, Motorola, and Casio had failed. \* Important moments in technological development of the handheld such as the secret Easter egg, a software surprise planted in the Palm software that nearly sank launch plans. \* Unique insight into the showdown with Microsoft, and 3Com's tragic decision not to make Palm independent that led Palm's founder Jeff Hanwkins and CEO Donna Dubinsky to take their vision elsewhere. \* The ongoing competition between Palm and Handspring. The new rivals to contend with including

Sony.

*The State, Business and Education* Gita Steiner-Khamsi,Alexandra Draxler,2018-10-26 Businesses, philanthropies and non-profit entities are increasingly successful in capturing public funds to support private provision of schooling in developed and developing countries. Coupled with market-based reforms that include weak regulation, control over workforces, standardization of processes and economies of scale, private provision of schooling is often seen to be convenient for both public authorities and businesses. This book examines how the public subsidization of these forms of private education affects quality, equality and the realization of human rights.With original research from leading experts, The State, Business and Education sheds light on the privatization of education in fragile circumstances. It illustrates the ways in which private actors have expanded their involvement in education as a business, and shows the influence of policy borrowing on the spread of for-profit education. Case studies from Argentina, Bangladesh, Brazil, China, India and Syrian refugee camps illustrate the ways in which private actors have expanded their involvement in education as a business.This book will be of interest not only to academics and students of international and comparative education, but also to education development professionals in both the private and public sectors, with its empirical assessment of case studies, and careful consideration of the lessons to be learned from each.

**Edu.net** Stephen J. Ball,Carolina Junemann,Diego Santori,2017-04-07 Edu.net builds upon, and extends, a series of research studies of education policy networks and global policy mobilities. It draws on comprehensive data resulting from a Leverhulme Trust research study focused on Africa, and a study funded by the British Academy focused on India, which explored the way in which global actors and organisations bring policy ideas to bear and are joined up in a global education policy network. This timely and cutting-edge new work develops concepts, analyses and methods deployed in Education Plc (2008), Networks, New Governance and Education (2012) and Global Education Inc. (2012). The research is framed by an elaboration of Network Ethnography, an innovative method of policy research. Edu.net presents the substantive findings of the authors' research by focusing on various kinds of policy movement – people, ideas, practices, methods, money. The book is about both global education policy and ways of researching policy in a global setting. It is an essential read for policy

analysts, educational academic researchers and postgraduate education students alike.

*Sunrise on Sunset Park* Marion Palm,2011-05-13 This book tells how a group of immigrants from Finland founded the fi rst co-ops in our nation focusing on one in a group of associations that are organized around Sunset Park, a New York City public park with an outlook over the harbor that is located on the highest hill of this neighborhood from the perspective of a Swedish-American fi rst generation person accepted by the Finns. This is an inside look into how one co-op has functioned adapting with the growth of Brooklyn and New York City. While it is tempting to want to examine each of the co-ops and compare how they are similar and differ from one another, it is more important to focus on how they cooperated with each other to remain independent and are able to adapt to changes. This book is organized into chapters that focus on different aspects of co-op living and includes a Patriotic Tour at the end to help the reader understand why it is important to be all-inclusive when writing history and important also to put new residents in the very spots where history happened, even if the original spot has been changed over time.
