The Money Demon Diexian Chen, 1999-01-01 "It's such a pity! I, too used to think of money and love as entirely separate things." So begins this popular autobiographical novel, written by litterateur, inventor, and business tycoon Chen Diexian (1879-1940), a remarkable intellectual whose life spanned the old China and the new. Chen's novel is the story of his youth, and in it he chooses to focus on his amorous and erotic development—a rare subject in Chinese literature—revealing his passage from innocent boy, surrounded by females, to young man, armed with a new attitude toward money, business, and the women in his life. Chen's unusual narrative, intimately combining romance and exhibitionism, unfolds to us an intriguing material reality as well as a powerful emotional world and may well be the first extended account of Chinese childhood and youth. The novel is built on our narrator's relationships with the central women in his life: his mother; an affectionate nanny; his devoted wife by an arranged marriage; a tragic peasant girl; and above all, the girl next door and his most enduring love, known—after the instrument she plays—as Koto. Patrick Hanan's graceful translation brings us Chen's story at its disarming best, a popular romance that is at the same time original and distinctive in both voice and theme. First serialized in Shanghai in 1913, *The Money Demon* appears in English for the first time; included in an appendix is "The Koto Story," a short epilogue to the novel.

In Situ NMR Methods in Catalysis Joachim Bargon, Lars T. Kuhn, 2007-05-15 A chemist, faced with the problem of determining the mechanism of a chemical reaction, tries to identify a set of reactions that will account for the observed behavior: Ideally, a small set of known reactions should describe in great detail exactly what takes place at each stage of a chemical transformation. The fact that many reactions proceed in a stepwise fashion can most convincingly be demonstrated if intermediate species can be isolated and shown to proceed to the same products under otherwise identical reaction conditions. An intermediate is the reaction product of each of these steps, except for the last one that forms the final product. Some intermediates are stable compounds in their own right; some others, however, are so reactive that their isolation is not possible. Occasionally, evidence for the existence of short-lived intermediates may be obtained, in particular by spectroscopic observation. The latter may allow a direct observation or an indirect inference from unusual phenomena occurring in the reaction products during in situ investigations of their corresponding chemical reactions. In NMR spectroscopy, for example, transient emission and enhanced absorption lines may be observed, and one is inclined to believe that there is a universal and unambiguous reason for their appearance. This is not necessarily the case, however, since this seemingly identical phenomenon may have a strikingly different origin: During free radical reactions, a phenomenon called chemically induced dynamic nuclear polarization (CIDNP) may give rise to virtually the same effect as occasionally observed during homogeneous (and possibly even heterogeneous) hydrogenations: The latter phenomenon, called parahydrogen-induced polarization (PHIP), has a completely different physical basis. It was first noticed twenty years later than CIDNP and occurs if there is an imbalance of the two spin isomers of symmetric molecules such as dihydrogen when hydrogenating unsaturated compounds using appropriate catalysts. These two effects, if not differentiated properly, can cause misinterpretations of reaction mechanisms, as occurred initially when their different origins had not yet been understood appropriately.

Colors of the Mountain Da Chen, 2003-05-20 I was born in southern China in 1962, in the tiny town of Yellow Stone. They called it the Year of Great Starvation. In 1962, as millions of Chinese citizens were gripped by Mao Zedong's Cultural Revolution and the Red Guards enforced a brutal regime of communism, a boy was born to a poor family in southern China. This family—the Chens—had once been respected landlords in the village of

Yellow Stone, but now they were among the least fortunate families in the country, despised for their capitalist past. Grandpa Chen couldn't leave the house for fear of being beaten to death; the children were spit upon in the street; and their father was regularly hauled off to labor camps, leaving the family of eight without a breadwinner. Da Chen, the youngest child, seemed destined for a life of poverty, shame, and hunger. But winning humor and an indomitable spirit can be found in the most unexpected places. *Colors of the Mountain* is a story of triumph, a memoir of a boyhood full of spunk, mischief, and love. The young Da Chen is part Horatio Alger, part Holden Caulfield; he befriends a gang of young hoodlums as well as the elegant, elderly Chinese Baptist woman who teaches him English and opens the door to a new life. Chen's remarkable story is full of unforgettable scenes of rural Chinese life: feasting on oysters and fried peanuts on New Year's Day, studying alongside classmates who wear red armbands and quote Mao, and playing and working in the peaceful rice fields near his village. Da Chen's story is both captivating and endearing, filled with the universal human quality that distinguishes the very best memoirs. It proves once again that the concerns of childhood transcend time and place.

A Private Life Ran Chen, 2004 Set against a backdrop of the decades that included the Cultural Revolution and the Tian'anmen Square Incident, *A Private Life* portrays the effect of that social change and political turbulence on the protagonist's inner life as she moves from childhood to early maturity.

Digital Microscopy Greenfield Sluder, David E. Wolf, 2013-08-07 The previous edition of this book marked the shift in technology from video to digital camera use with microscope use in biological science. This new edition presents some of the optical fundamentals needed to provide a quality image to the digital camera. Specifically, it covers the fundamental geometric optics of finite- and infinity-corrected microscopes, develops the concepts of physical optics and Abbe's theory of image formation, presents the principles of Kohler illumination, and finally reviews the fundamentals of fluorescence and fluorescence microscopy. The second group of chapters deals with digital and video fundamentals: how digital and video cameras work, how to coordinate cameras with microscopes, how to deal with digital data, the fundamentals of image processing, and low light level cameras. The third group of chapters address some specialized areas of microscopy that allow sophisticated measurements of events in living cells that are below the optical limits of resolution. Expands coverage to include discussion of confocal microscopy not found in the previous edition Includes traps and pitfalls as well as laboratory exercises to help illustrate methods
