The Four Generations of Entity Resolution George Papadakis,Ekaterini Ioannou,Emanouil Thanos,Themis Palpanas,2022-06-01 Entity Resolution (ER) lies at the core of data integration and cleaning and, thus, a bulk of the research examines ways for improving its effectiveness and time efficiency. The initial ER methods primarily target Veracity in the context of structured (relational) data that are described by a schema of well-known quality and meaning. To achieve high effectiveness, they leverage schema, expert, and/or external knowledge. Part of these methods are extended to address Volume, processing large datasets through multi-core or massive parallelization approaches, such as the MapReduce paradigm. However, these early schema-based approaches are inapplicable to Web Data, which abound in voluminous, noisy, semi-structured, and highly heterogeneous information. To address the additional challenge of Variety, recent works on ER adopt a novel, loosely schema-aware functionality that emphasizes scalability and robustness to noise. Another line of present research focuses on the additional challenge of Velocity, aiming to process data collections of a continuously increasing volume. The latest works, though, take advantage of the significant breakthroughs in Deep Learning and Crowdsourcing, incorporating external knowledge to enhance the existing words to a significant extent. This synthesis lecture organizes ER methods into four generations based on the challenges posed by these four Vs. For each generation, we outline the corresponding ER workflow, discuss the state-of-the-art methods per workflow step, and present current research directions. The discussion of these methods takes into account a historical perspective, explaining the evolution of the methods over time along with their similarities and differences. The lecture also discusses the available ER tools and benchmark datasets that allow expert as well as novice users to make use of the available solutions.

The European Social Dialogue Under Articles 138 and 139 of the EC Treaty Christian Welz,2008-01-01 Describes, analyses, and assesses the European social dialogue from a combined theoretical and normative perspective and applies theoretical strands stemming from industrial relations, EC law, and political theory to an understanding and assessment of the genesis, actors, processes, and outcomes of the European social dialogue through 2007

Greece and the Balkans Dimitris Tziovas,2017-07-05 Greece and the Balkans explores the cultural relationships between Greece and other Balkan countries in the domains of language, literature, thought, translation, and music, and examines issues of identity and perception among the Balkan peoples themselves. The essays bring together scholars from across a range of disciplines: historians, anthropologists, linguists and musicologists with specialists on literature, translation, the history of ideas and religion. By raising issues of cultural hybridity, and nationalist or pre-nationalist interpretations of culture and history it lays claim to a place in the context of studies on nationalism and post-colonialism. Greece and the Balkans also contributes to a recognition of the Balkans as a site, like some postcolonial ones, where identities have become fused, orientalism and eurocentrism blurred and where religion and modernity clashed and co-existed. By approaching cultural encounters between Greece and the Balkans from a fresh and informed perspective, it makes a substantial contribution to the study of a rather neglected aspect in the history of a region which has suffered in the past from narrow-minded, nationalistic arguments.

Buried Unsung Zeese Papanikolas,1991-01-01 Louis Tikas was a union organizer killed in the battle between striking coal miners and state militia in Ludlow, Colorado, in 1914. In Buried Unsung he stands for a whole generation of immigrant workers who, in the years before World War I, found themselves caught between the realities of industrial America and their aspirations for a better life.

Culture and Society in Crete Liana Giannakopoulou,E. Kostas Skordyles,2018-06-11 Crete has always attracted the interest of scholars in modern times not only because of the archaeological discoveries of Sir Arthur Evans, but also because of its rich history and the particular cultural traits and traditions resulting from the fact that the island has been at the centre of geographical, cultural and religious crossroads. The fifteen papers included in this volume explore original aspects of the Cretan cultural and historical tradition, give original insights into already established fields and underline from the vantage point of their own particular discipline its distinctive character and impact. As a result of such a thematic variety, this volume will be of interest not only to scholars and students of modern Greek studies, but also Renaissance Studies, comparative literature, cultural and social history and anthropology, and travel literature, as well as historical linguistics and dialectology.

The Semantic Web: ESWC 2021 Satellite Events Ruben Verborgh,Anastasia Dimou,Aidan Hogan,Claudia d'Amato,Ilaria Tiddi,Arne Bröring,Simon Mayer,Femke Ongena,Riccardo Tommasini,Mehwish Alam,2021-07-20 This book constitutes the proceedings of the satellite events held at the 18th Extended Semantic Web Conference, ESWC 2021, in June 2021. The conference was held online, due to the COVID-19 pandemic. During ESWC 2021, the following six workshops took place: 1) the Second International Workshop on Deep Learning meets Ontologies and Natural Language Processing (DeepOntoNLP 2021) 2) the Second International Workshop on Semantic Digital Twins (SeDiT 2021) 3) the Second International Workshop on Knowledge Graph Construction (KGC 2021) 5) the 6th International Workshop on eXplainable SENTiment Mining and Emotion deTectioN (X-SENTIMENT 2021) 6) the 4th International Workshop on Geospatial Linked Data (GeoLD 2021).

Monuments to Faith Basil Rotoff,Roman Yereniuk,Stella Hryniuk,1990-04-01 Ukrainians first came to Canada a century ago, seeking a new life on the western prairies. They brought with them an ancient and rich cultural tradition, deeply rooted in Christianity. The most visible symbol of this tradition is the Ukrainian church with its distinctive cupolas. As soon as the settlers were established in the new land, they began to reshape their environment by building churches in the styles they remembered from their homeland. In this richly illustrated volume, the authors trace the continuity of tradition in architecture, art, and community life from Ukraine to the parishes of the Manitoba prairie. In a detailed examination of the exteriors and interiors of forty-nine churches, the book establishes a typology of Ukrainian church designs. Biographies of the architects, master builders, and artists are included, along with a guide to the art and architecture of a Ukrainian church.

Echoes of the Great Catastrophe Panayotis League,2021-09-13 Echoes of the Great Catastrophe: Re-sounding Anatolian Greekness in Diaspora explores the legacy of the Great Catastrophe—the death and expulsion from Turkey of 1.5 million Greek Christians following the Greco-Turkish War of 1919–1922—through the music and dance practices of Greek refugees and their descendants over the last one hundred years. The book draws extensively on original ethnographic research conducted in Greece (on the island of Lesbos in particular) and in the Greater Boston area, as well as on the author's lifetime immersion in the North American Greek diaspora. Through

analysis of handwritten music manuscripts, homemade audio recordings, and contemporary live performances, the book traces the routes of repertoire and style over generations and back and forth across the Atlantic Ocean, investigating the ways that the particular musical traditions of the Anatolian Greek community have contributed to their understanding of their place in the global Greek diaspora and the wider post-Ottoman world. Alternating between fine-grained musicological analysis and engaging narrative prose, it fills a lacuna in scholarship on the transnational Greek experience.

D-Day Jack Chambers,Erik Hendrix,2020-01-23 6 June, 1944: a vast armada stands off the coast of Normandy; in the pre-dawn gloom gliders carrying British airborne troops approach their target. The first shots are about to be fired in 'the Great Crusade' to free Europe from Nazi occupation and thousands of troops will fight their way ashore in the teeth of deadly machine-gun and artillery fire from the German defenders. D-Day is about to begin. The Normandy landings are brought alive in this electrifying graphic novel that tells the story of that Longest Day through the eyes of the men who were there. Discover an epic struggle as the Allies sought to overwhelm the German defenders by land, sea and air, who in turn battled desperately to drive the invasion back into the sea. Covering the full range of events from the earliest airborne assault through the struggle on the beaches and the desperate effort to establish a bridgehead inland, D-Day blends an authentic historical narrative with master illustration to reveal the full story of the day that changed the course of World War II.

Scale Space and Variational Methods in Computer Vision Luca Calatroni,Marco Donatelli,Serena Morigi,Marco Prato,Matteo Santacesaria,2023-05-09 This book constitutes the proceedings of the 9th International Conference on Scale Space and Variational Methods in Computer Vision, SSVM 2023, which took place in Santa Margherita di Pula, Italy, in May 2023. The 57 papers presented in this volume were carefully reviewed and selected from 72 submissions. They were organized in topical sections as follows: Inverse Problems in Imaging; Machine and Deep Learning in Imaging; Optimization for Imaging: Theory and Methods; Scale Space, PDEs, Flow, Motion and Registration.

Socialism: The Failed Idea That Never Dies Kristian Niemietz,2019-02-07 Socialism is strangely impervious to refutation by real-world experience. Over the past hundred years, there have been more than two dozen attempts to build a socialist society, from the Soviet Union to Maoist China to Venezuela. All of them have ended in varying degrees of failure. But, according to socialism's adherents, that is only because none of these experiments were "real socialism". This book documents the history of this, by now, standard response. It shows how the claim of fake socialism is only ever made after the event. As long as a socialist project is in its prime, almost nobody claims that it is not real socialism. On the contrary, virtually every socialist project in history has gone through a honeymoon period, during which it was enthusiastically praised by prominent Western intellectuals. It was only when their failures became too obvious to deny that they got retroactively reclassified as "not real socialism".

Economics and Politics of Energy in the Middle East and Eastern Europe Natalya Ketenci,Ayşe Sevençan,2021-05-06 The contributors to this volume analyze the complex interconnectivity between the Middle East and Eastern Europe through the economics and politics of energy. Individual chapters explore the shift from non-renewable to renewable energy sources, the influence of energy policy on political alliances, and the future of energy policy in the region.

Ranking of researchers and scientists in Greece in 2017 according to Google Scholar database Giorgos P. Kouropoulos,2017-07-22 Scope: The classification of researchers and scientists in Greece in a unified list based on the citation impact and dissemination level of their scientific work according to Google Scholar database. Classification criteria: First criterion is h-index. In the case of equal h-index, the following scientometric indicators are used for the classification. The number of total citations, the i10-index, the total impact factor of scientist, the m-index or m-quotient of scientist. Information resource: The h-index, citations and i10-index derived from the public profiles of researchers in the Google Scholar database. In addition, the calculation of total impact factor and m-index of each researcher is carried out using the data from the Google Scholar database. Methodology: Researchers and scientists accounts in the Google Scholar are detected by official domain names of institutions, universities and other organizations of public and private sector. The institution, university and organization of each researcher is defined by domain of email address that have been validated in the Google Scholar. In the next step, the values of h-index, citations and i10-index are recorded from profiles of researchers. If necessary, the total number of uploaded scientific articles and the dates of first published and last published article of researcher are recorded, these data are required for calculation of total impact factor and m-index of each researcher. In the final step, the classification of all researchers and scientist according to h-index and citations number, i10-index, impact factor and m-index is carried out. Sampling data: The sampling period varied from 11/06/2017 to 29/06/2017. A sample with 5250 scientists and researchers is collected by systematic sampling method. Basic requirement for the selection and classification of each researcher, the number of h-index ≥ 5 . Sampling error is equal to $\pm 1.38\%$ in 95% confidence interval. Conclusions: There are 5252 researchers from 124 different institutions, organizations of public and private sector with h-index ≥ 5 and totally 7474 researchers with h-index ≥ 0 . The average h-index for the sample of 5252 researchers is calculated in $15.72 \pm 1\%$ and the average number of citations in the sample is calculated in $1565 \pm 3.7\%$. 1105 researchers ranked by i10-index, 784 researchers ranked by total impact factor and finally 36 researchers ranked by m-index. Analytical statistical information of the sample about the universities, institutions and organizations and other categories are presented in the Table 1.
