St. Patrick's Day 2 Andrew Gonzalez, 2020-02-17 After five years in a coma, Jimmy Marsh is back, seeking his revenge on his little brother, Jacob. Only this time, there's nobody around to save him. Like all, everyone needs a vacation; and Jacob takes the opportunity to get away from it all. Unfortunately, this dream vacation ends up turning into a living nightmare. Jimmy's back and bloodthirsty. How many more must die before Jimmy gets to his brother, Jacob? Let's take a camping trip to, Ludington, Michigan and find out who will survive this bloodbath of a weekend.

Basketball David L. Porter, 2005-07-30 From its beginnings at the turn of the 20th century to its pervasive presence in 21st-century America, basketball has grown into an undeniably important sport. The 575 entries in this biographical dictionary present concise narratives on the lives and careers on the most important names in basketball history. Entries include both classic players such as Kareem Abdul-Jabbar and Bob Cousy as well as more recently established and up-and-coming stars such as Carmelo Anthony, Kevin Garnett, and LeBron James. Entries for coaches such as the Boston Celtics' Red Auerbach and Mike Krzyzewski from Duke University present the figures who have shaped the game from courtside, while the inclusion of female players and coaches such as Lisa Leslie, Diana Taurasi, and Pat Summitt show that basketball is not just a sport for men. The Journeys of Trees: A Story about Forests, People, and the Future Zach St. George, 2020-07-14 An urgent and illuminating portrait of forest migration, and of the people studying the forests of the past, protecting the forests of the present, and planting the forests of the future. Forests are restless. Any time a tree dies or a new one sprouts, the forest that includes it has shifted. When new trees sprout in the same direction, the whole forest begins to migrate, sometimes at astonishing rates. Today, however, an array of obstacles—humans felling trees by the billions, invasive pests transported through global trade—threaten to overwhelm these vital movements. Worst of all, the climate is changing faster than ever before, and forests are struggling to keep up. A deft blend of science reporting and travel writing, *The Journeys of Trees* explores the evolving movements of forests by focusing on five trees: giant sequoia, ash, black spruce, Florida torreya, and Monterey pine. Journalist Zach St. George visits these trees in

forests across continents, finding sequoias losing their needles in California, fossil records showing the paths of ancient forests in Alaska, domesticated pines in New Zealand, and tender new sprouts of blight-resistant American chestnuts in New Hampshire. Everywhere he goes, St. George meets lively people on conservation's front lines, from an ecologist studying droughts to an evolutionary evangelist with plans to save a dying species. He treks through the woods with activists, biologists, and foresters, each with their own role to play in the fight for the uncertain future of our environment. An eye-opening investigation into forest migration past and present, *The Journeys of Trees* examines how we can all help our trees, and our planet, survive and thrive.

The Alcalde, 2005-09 As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for mayor or chief magistrate; the nickname of the governor who signed UT into existence was The Old Alcalde.

Booth, 2022-09-06 All civilizations face threats of decline and fall. Some civilizations overcome these threats or at least postpone them for a time. They do so because they have the ability to renew and refresh themselves. When they lack that ability, they inevitably fail. The United States must now renew itself.

Green Kingdom Come! Joe Grabill, 2009 Imagine Jesus walking throughout Galilee's lushness. Hear him speak about rain falling on an Earth containing no enemies. Laugh at the wit of Jesus. Enter stories about his best friend, Mary Magdalene. Jesus used snakes and crows as teachers. Wonder at the intelligence of animals, including chimpanzees. The Aramaic language of Jesus reveals earthy meaning. His teachings, examined in seventy sayings, are compatible with sustainability. Green Kingdom Come shows that the lifestyle and ministry of Jesus is green. This book is the first to connect Jesus with our ecological crises today. It features sustainable principles based on his sayings. It suggests green practices and attitudes. Green Kingdom Come weaves together science and religion. A cross-cultural appendix lists sixty sacred and secular names for the oneness of both Earth and universe systems. Help create an Earth Community livable for all species, a green kingdom come About the Author Joe Grabill is a retired professor of history and director of peace studies at Illinois State University. He has made seven research trips to the Holy Land and has written the prize-winning, Protestant Diplomacy and the Near East. He gives leadership to a project of planting trees called Children & Elders Forest (www.ceforest.org) and to a community group, Imagine Green Bloomington/Normal (www.bn-green.org).

Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part B: Regional Aspects: Volume 2, Regional Aspects Intergovernmental Panel on Climate Change, 2014-12-29

This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) will again form the standard reference for all those concerned with climate change and its consequences, including students, researchers and policy makers in environmental science, meteorology, climatology, biology, ecology, atmospheric chemistry and environmental policy.

Science, Conservation, and National Parks Steven R. Beissinger, David D. Ackerly, Holly Doremus, Gary E. Machlis, 2017-01-13 “An eclectic, enjoyable mix of literature reviews, personal experience and case studies, and practical advice from . . . leaders in their subdisciplines.” —Eleanor J. Sterling, Chief Conservation Scientist, Center for Biodiversity & Conservation, American Museum of Natural History With the US National Park Service over one hundred years old, parks and protected areas worldwide are under increasing threat from storms and fires of greater severity, plant and animal extinctions, the changing attitudes of a public that has become more urbanized, and the political pressures of narrow special interest groups. In the face of such rapid environmental and cultural changes, *Science, Conservation, and National Parks* gathers a group of renowned scholars—including Edward O. Wilson, Jane Lubchenco, Thomas Dietz, and Monica Turner—who address these problems and in the hope of securing a future for protected areas that will push forward the frontiers of biological, physical, and social science in and for parks. Contributors provide answers to a number of key conservation questions, such as: How should stewardship address climate change, urban encroachment and pollution, and invasive species? How can society, especially youth, become more engaged with nature and parks? What are

appropriate conservation objectives for parks in the Anthropocene? Charting a course for the parks of the next century, Science, Conservation, and National Parks catalyzes the continued evolution of US park conservation policy, and serves as an inspiration for parks, conservation, and management worldwide. “Offers a refreshing holistic treatment of the linkages and mutual dependencies between parks and science. Compelling.” —William B. Monahan, USDA Forest Service and formerly of the US National Park Service “This is a testament to what can be achieved by determined conservationists.” —Biodiversity and Conservation journal

Climate Change and Land Intergovernmental Panel on Climate Change, 2022-12-08 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on Climate Change and Land (SRCCL) is the most comprehensive and up-to-date scientific assessment of the multiple interactions between climate change and land, assessing climate change, desertification, land degradation, sustainable land management, food security, and greenhouse gas fluxes in terrestrial ecosystems. It assesses the options for governance and decision-making across multiple scales. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Climate Change 2022 – Impacts, Adaptation and Vulnerability Intergovernmental Panel on Climate Change (IPCC), 2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provides a comprehensive assessment of the scientific literature relevant to climate change impacts, adaptation and vulnerability.

The report recognizes the interactions of climate, ecosystems and biodiversity, and human societies, and integrates across the natural, ecological, social and economic sciences. It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development, which enables a liveable future for biodiversity and humankind. The IPCC is the leading body for assessing climate change science. IPCC reports are produced in comprehensive, objective and transparent ways, ensuring they reflect the full range of views in the scientific literature. Novel elements include focused topical assessments, and an atlas presenting observed climate change impacts and future risks from global to regional scales. Available as Open Access on Cambridge Core.

Die Landschaft interpretieren: Interdisziplinäre Ansätze

Werner Kreisel, Peter H. Marsden, Tobias Reeh, 2021 There is no generally valid, recognised definition of what landscape actually is. On the basis of its relatedness to the environment, to aesthetics, territory, society, politics, economics, geography, planning, ethnology and philosophy, the concept of landscape is considered to be a composite notion shaped by a thousand years of Central European ideas and of literary and art history. In other words, the very term landscape is ambiguous and it is used in different ways both in the scholarly world and everyday speech. The aim of this volume is to present various possible approaches to the phenomenon of landscape. Far from laying any claim to be exhaustive or comprehensive we have simply tried to do justice to the overarching interdisciplinary approach of the Zentrum für Landschaftsinterpretation und Tourismus (ZELT: Centre for Landscape Interpretation and Tourism) by singling out and addressing individual instances of this fascinating multifaceted phenomenon.

Getting to the Heart of Science Communication Faith Kearns, 2021-05-11 Scientists today working on controversial issues from climate change to drought to COVID-19 are finding

themselves more often in the middle of deeply traumatizing or polarized conflicts they feel unprepared to referee. It is no longer enough for scientists to communicate a scientific topic clearly. They must now be experts not only in their fields of study, but also in navigating the thoughts, feelings, and opinions of members of the public they engage with, and with each other. And the conversations are growing more fraught. In *Getting to the Heart of Science Communication*, Faith Kearns has penned a succinct guide for navigating the human relationships critical to the success of practice-based science. This meticulously researched volume takes science communication to the next level, helping scientists to see the value of listening as well as talking, understanding power dynamics in relationships, and addressing the roles of trauma, loss, grief, and healing.

Climate Scientists Carol Hand, 2019-12-15 Climate Scientistsshow how researchers around the globe are studying glaciers, examining the atmosphere, and using computer models to learn about the changing climate. Features include vivid photos, in-depth examinations of scientific concepts, a glossary, additional resources, source notes, and an index. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.
