Flowering Plants Armen Takhtajan, 2009-07-06 Armen Takhtajan is among the greatest authorities in the world on the evolution of plants. This book culminates almost sixty years of the scientist's research of the origin and classification of the flowering plants. It presents a continuation of Dr. Takhtajan's earlier publications including "Systema Magnoliophytorum" (1987), (in Russian), and "Diversity and Classification of Flowering Plants" (1997), (in English). In his latest book, the author presents a concise and significantly revised system of plant classification ('Takhtajan system') based on the most recent studies in plant morphology, embryology, phytochemistry, cytology, molecular biology and palynology. Flowering plants are divided into two classes: class Magnoliopsida (or Dicotyledons) includes 8 subclasses, 126 orders, c. 440 families, almost 10,500 genera, and no less than 195,000 species; and class Liliopsida (or Monocotyledons) includes 4 subclasses, 31 orders, 120 families, more than 3,000 genera, and about 65,000 species. This book contains a detailed description of plant orders, and descriptive keys to plant families providing characteristic features of the families and their differences.

Diversity and Classification of Flowering Plants Armen Leonovich Takhtadzhian, 1997 The culmination of more than fifty years of research by the foremost living expert on plant classification, *Diversity and Classification of Flowering Plants* is an important contribution to the field of plant taxonomy. In the last decade, the system of classifying plants has been thoroughly revised. Instead of describing every individual family, Takhtajan includes descriptions in keys to families, which he calls descriptive keys. The advantage of descriptive keys is that they give both the characteristic features of the families and their differences. The delimitation of families and orders drastically differs from the one accepted by the Englerian school and from the one accepted in Arthur Cronquist's system. Takhtajan favors the smaller, more natural families and orders, which are more coherent and better-defined, where characters are easily grasped, and which are more suitable for information retrieval and phylogenetic studies, including cladistic analysis (because it reduces polymorphic codings).

Psychosis: Global Perspectives Craig Morgan, PROF CRAIG. COHEN MORGAN (PROF ALEX. ROBERTS, DR TESSA.), Alex Cohen, Tessa Roberts, 2023-11-08 Schizophrenia and other psychotic disorders can be both devastating and long-lasting, and are associated with significant individual, familial, and societal costs. Schizophrenia is one of the top ten leading causes of disability world-wide, and yet the overwhelming majority of research is conducted in populations in the Global North (North America, Europe, and Australia - together comprising only around 16% of the world's population). *Psychosis: Global Perspectives* synthesises the existing research in non-western countries to provide detailed accounts of ongoing research programmes, local treatment systems, cultural contexts, and the lived experience of psychosis across nine countries in the Global South, setting the findings in frameworks of relevant current evidence from the Global North where appropriate. It features a critical review of the literature on specific aspects of psychosis, from phenomenology to mental health services and systems, to provide a solid background on the subject. Academically rigorous yet accessibly written, this new title addresses the substantial inequalities in literature and attention in the global understanding of psychotic disorders.

Lessons from Documented Endangered Languages K. David Harrison, David S. Rood, Arienne Dwyer, 2008-09-11 This volume represents part of an unprecedented and still growing effort to advance, coordinate and disseminate the scientific documentation of endangered languages. As the pace of language extinction increases, linguists and native communities are accelerating their efforts to speak, remember, record, analyze and archive as much as possible of our common human heritage that is linguistic diversity. The window of opportunity for documentation is narrower than the actual lifetime of a language, and is now rapidly closing for many languages represented in this volume. The authors of these papers unveil newly collected data from previously poorly known and endangered languages. They organize highly complex linguistic facts - paradigms, affixes, vowel patterns - while pointing out the theoretically challenging aspects of these. Beyond this, they reflect on the social and human dimensions, discussing particular problems of nostalgia and modernity, memory and forgetting, and obsolescence and ethics, while viewing language as not merely data on a page but as a living creation in the minds and mouths of its speakers.

Technological Innovation for Cyber-Physical Systems Luis M. Camarinha-Matos, António J. Falcão, Nazanin Vafaei, Shirin Najdi, 2016-03-24 This book constitutes the refereed proceedings of the 7th IFIP WG 5.5/SOCOLNET Advanced Doctoral Conference on Computing, Electrical and Industrial Systems, DoCEIS 2016, held in Costa de Caparica, Portugal, in April 2016. The 53 revised full papers were carefully reviewed and selected from 112 submissions. The papers present selected results produced in engineering doctoral programs and focus on research, development, and application of cyber-physical systems. Research results and ongoing work are presented, illustrated and discussed in the following areas: enterprise collaborative networks; ontologies; Petri nets; manufacturing systems; biomedical applications; intelligent environments; control and fault tolerance; optimization and decision support; wireless technologies; energy: smart grids, renewables, management, and optimization; bio-energy; and electronics.

Type Mineralogy Of Brazil Daniel Atencio, 2021-11-12 This is a compilation of bibliographic (historical and descriptive) information for the minerals first described from Brazil; it includes both valid and invalid, discredited species, unnamed, unidentified, problematic minerals, and so on. This work brings together as much data as possible concerning type mineral species. It will save future researchers a lot of work because it contains data from many publications that are difficult to obtain.

Ethnozoology Romulo Romeu Nobrega Alves, Ulysses Paulino Albuquerque, 2017-10-31 *Ethnozoology: Animals In Our Lives* represents the first book about this discipline, providing a discussion on key themes on human-animal interactions and their implications, along with recent major advances in research. Humans share the world with a bewildering variety of other animals, and have interacted with them in different ways. This variety of interactions (both past and present) is investigated through ethnozoology, which is a hybrid discipline structured with elements from both the natural and social sciences, as it seeks to understand how humans have perceived and interacted with faunal resources throughout history. In a broader context, ethnozoology, and its companion discipline, ethnobotany, form part of the larger body of the science of ethnobiology. In recent years, the importance of ethnozoological/ethnobiological studies has increasingly been recognized, unsurprisingly given the strong human influence on biodiversity. From the perspective of ethnozoology, the book addresses all aspects of human connection, animals and health, from its use in traditional medicine, to bioprospecting derivatives of fauna for pharmaceuticals, with expert contributions from leading researchers in the field. Draws on editors' and contributors' extensive research, experience and studies covering ethnozoology and ethnobiology Covers all aspects of human-animal interaction through the lens of this emerging discipline, with coverage of both domestic and wild animal topics Presents topics of great interest to a variety of researchers including those in wildlife/conservation (biologists, ecologists, conservationists) and domestic-related disciplines (psychologists, sociologists)

Collective Bargaining in Labour Law Regimes Ulla Liukkunen,2019-10-02 This book addresses the theme of collective bargaining in different legal systems and explores legal framework of collective bargaining as well as the role of different bargaining models in domestic labour law systems in altogether twenty-one jurisdictions throughout the world. Recent development of collective bargaining regimes can be viewed as part of a larger development of labour law models that face increasing challenges caused by globalization and transition of work and workplaces. The book places particular emphasis on identifying and examining most important development trends affecting domestic labour law regimes and collective bargaining and regulatory responses thereto. The analysis offered extents to transnational dimension of collective bargaining. As the chapters analyse the influence of the legal frameworks of collective bargaining in different countries they provide unique comparative insight into the topic which is central to understanding the function of labour law.

The Xavante in Transition Carlos E. A. (Jr.) Coimbra,Nancy M. Flowers,Francisco M. Salzano,Ricardo V. Santos,2010-04-23 The Xavante in Transition presents a diachronic view of the long and complex interaction between the Xavante, an indigenous people of the Brazilian Amazon, and the surrounding nation, documenting the effects of this interaction on Xavante health, ecology, and biology. A powerful example of how a small-scale society, buffeted by political and economic forces at the national level and beyond, attempts to cope with changing conditions, this study will be important reading for demographers, economists, environmentalists, and public health workers. . . . an integrated and politically informed anthropology for the new millennium. They show how the local and the regional meet on the ground and under the skin. --Alan H. Goodman, Professor of Biological Anthropology, Hampshire College This volume delivers what it promises. Drawing on twenty-five years of team research, the authors combine history, ethnography and bioanthropology on the cutting edge of science in highly readable form. --Daniel Gross, Lead Anthropologist, The World Bank No doubt it will serve as a model for future interdisciplinary scholarship. It promises to be highly relevant to policy formulation and implementation of health care programs among small-scale populations in Brazil and elsewhere. --Laura R. Graham, Professor of Anthropology, University of Iowa Carlos E. A. Coimbra Jr. is Professor of Medical Anthropology at the National School of Public Health, Rio de Janeiro.Nancy M. Flowers is Adjunct Associate Professor of Anthropology, Hunter College. Francisco M. Salzano is Emeritus Professor, Department of Genetics, Federal University of Rio Grande do Sul, Brazil. Ricardo V. Coastal Marine Ecosystems of Latin America U. Seeliger,B. Kjerfve,2013-03-14 Coastal and marine ecosystems, some severely degraded, other still pristine, control rich resources of inshore environments and coastal seas of Latin America's Pacific and Atlantic margins. Conflicts between the needs of the region's nations and diminishing revenues and environmental quality have induced awareness of coastal ecological problems and motivated financial support for restoration and management. The volume provides a competent review on the structure, processes and function of 22 important Latin American coastal marine ecosystems. Each contribution describes the environmental settings, biotic components and structure of the system, considers trophic processes and energy flow, evaluates the modifying influence of natural and human perturbations, and suggests management needs. Although the focus of the book is on basic ecological research, the results have application for coastal managers.

Thousands of universities across the world have signed declarations or have committed themselves to integrate the principles of sustainable development in their activities: teaching, research and extension, and many more will follow.

Amazonian Cosmopolitans Suzanne Oakdale,2022-02 Amazonian Cosmopolitans focuses on the autobiographical accounts of two Brazilian Indigenous leaders, Prepori and Sabino, Kawaiwete men whose lives spanned the twentieth century, when Amazonia increasingly became the context of large-scale state projects. Both give accounts of how they worked in a range of interethnic enterprises from the 1920s to the 1960s in central Brazil. Prepori, a shaman, also gives an account of his relations with spirit beings that populate the Kawaiwete cosmos as he participated in these projects. Like other Indigenous Amazonians, Kawaiwete value engagement with outsiders, particularly for leaders and shamanic healers. These social engagements encourage a careful watching and learning of others' habits, customs, and sometimes languages, what could be called a kind of cosmopolitanism or an attitude of openness, leading to an expansion of the boundaries of community. The historical consciousness presented by these narrators centers on how transformations in social relations were experienced in bodily terms--how their bodies changed as new relationships formed. Amazonian Cosmopolitans offers Indigenous perspectives on twentieth-century Brazilian history as well as a way to reimagine lowland peoples as living within vast networks, bridging wide social and cosmological divides.
