Clinical Management of Memory Problems (2nd Edn) (PLE: Memory) Barbara Wilson,Nick Moffat,2014-05-09 Many patients with stroke, head injuries or dementia suffer severe memory impairment and in many cases improvement may fail to occur. This book, first published in 1984 followed by this second edition in 1992, offers practical guidelines to the problems and is supported by a discussion of theory about memory systems and functioning. It should enable therapists and psychologists to recognize, understand, assess and manage memory problems arising from injury, accident or infection of the brain. The authors are well-known for their interest in memory and memory therapy. Topics covered in this text include: the relationship between memory

and practice, assessment, methods for improving memory, organization of memory therapy, selection of appropriate treatments for individual patients, role of the microcomputer in memory rehabilitation, use of drugs in stimulating memory, development of programmes to improve attention and the treatment of the memory-impaired in groups. This second edition has an update on drugs, electronic aids and assessment procedures, with further evidence of the effectiveness of memory therapy. This book would have been an asset for those professionals involved in the rehabilitation of the impaired memory at the time and can still be of value today.

Neurosurgical Standards, Cerebral Aneurysms, Malignant Gliomas Kurt Piscol,Margareta Klinger,Mario Brock,2012-12-06 Three topics of major interest for neursurgeons are covered in this volume of the Advances in Neurosurgery series, as the title suggests. First, neurosurgical standards of diagnosis and treatment are viewed from several points of view, including the legal one. Second, the many aspects of aneurysm surgery are dealt with: timing and grading, monitoring during the operation, postoperative vasospasm, Doppler sonography and new research in subarachnoid hemorrhage. Third, the

diagnosis and treatment of malignant gliomas are discussed; there are preliminary reports on interstitial laser-assisted thermal therapy, immunotherapy and radiopharmaceutical substances as well as the standard forms of neurosurgical and radiation treatment.

Corporate Vision and Rapid Technological Change Jas Gill,Peter Swann,2002-03-11 This book examines the role of strategic visions of future technological development in the evolution of market structure. This perspective offers a novel way of resolving some of the puzzles that have arisen in understanding the effects of rapid technology change and market

structure. Strategic visions are seen to play a central role in corporate strategy, and industrial policy. The authors develop some theoretical tools to study these questions, and present 5 case studies of high technology industries, with conclusions for policy. The book will be of interest to industrial economists concerned with the effects of rapid technological change, and to those interested in technology management. It will also be of interest to economists and others working in high technology industries, and in government.

  Computer Sound Design Eduardo Miranda,2012-10-12 This comprehensive introduction to software synthesis techniques and programming is intended for students, researchers, musicians, sound artists and enthusiasts in the field of music technology. The art of sound synthesis is as important for the electronic musician as the art of orchestration is important for symphonic music composers. Those who wish to create their own virtual orchestra of electronic instruments and produce original sounds will find this book invaluable. It examines a variety of synthesis techniques and illustrates how to turn a personal computer into a powerful and flexible sound synthesiser. The book also discusses a number of ongoing developments that may play an important role in the future of electronic music making. Previously published as Computer Sound Synthesis for the Electronic Musician, this second edition features a foreword by Jean-Claude Risset and provides new information on: · the latest directions in digital sound representation · advances in physical modelling techniques · granular and pulsar synthesis · PSOLA technique · humanoid voice synthesis · artificial intelligence · evolutionary computing The accompanying CD-ROM contains examples, complementary tutorials and a number of synthesis systems for PC and Macintosh platforms, ranging from low

level synthesis programming languages to graphic front-ends for instrument and sound design. These include fully working packages, demonstration versions of commercial software and experimental programs from top research centres in Europe, North and South America.

Cellular Neural Networks and Visual Computing Leon O. Chua,Tamas Roska,2002-05-30 Cellular Nonlinear/neural Network (CNN) technology is both a revolutionary concept and an experimentally proven new computing paradigm. Analogic cellular computers based on CNNs are set to change the way analog signals are processed and are paving the way to an analog computing industry. This unique undergraduate level textbook includes many examples and exercises, including CNN simulator and development software accessible via the Internet. It is an ideal introduction to CNNs and analogic cellular computing for students, researchers and engineers from a wide range of

disciplines. Although its prime focus is on visual computing, the concepts and techniques described in the book will be of great interest to those working in other areas of research including modeling of biological, chemical and physical processes. Leon Chua, co-inventor of the CNN, and Tamás Roska are both highly respected pioneers in the field.
