Selected Chinese Cases on the UN Sales Convention (CISG) Vol. 1 Peng Guo,Haicong Zuo,Shu Zhang,2022-07-07 This book focuses on Chinese cases on the CISG decided by Chinese courts of all levels, mainly from 1990 to 2005. During this period, the number of cases grew gradually. The total number of cases remained low, the reasons of which might be the following: parties were not familiar with the CISG hence decided to opt out of it; the case collection and report systems in China at that time were not as developed as now rendering many cases inaccessible. This book deals with the cases in the early days of the development of the CISG in China. These cases reflect how People's Court of all levels started to deal with various issues arising from the CISG and will help understand whether and how the People's Courts change their approaches to the interpretation and application of the CISG in the future.

Scattered Sand Hsiao-Hung Pai,2013-06-04 Each year, 200 million workers from China's vast rural interior travel between cities and provinces in search of employment: the largest human migration in history. This indispensable army of labour accounts for half of China's GDP, but is an unorganized workforce-'scattered sand', in Chinese parlance-and the most marginalized and impoverished group of workers in the country. For two years, the award-winning journalist Hsiao-Hung Pai traveled across China visiting labourers on Olympic construction sites, in the coal mines and brick kilns of the Yellow River region, and at the factories of the Pearl River Delta. She witnessed the outcome of the 2009 riots in the Muslim province of Xinjiang; saw towns in rubble more than a year after the colossal earthquake in Sichuan; and was reunited with long-lost relatives, estranged since her mother's family fled for Taiwan during the Civil War. Scattered Sand is the result of her travels: a finely wrought portrait of those left behind by China's dramatic social and economic advances.

Image Analysis Applications and Computer Graphics Roland Chin,1995-11-28 When scheduling involves batching decisions as well, e. g. in the presence of (sequence dependent) setup times, difficult problems arise. The book presents a problem classification in the area of batching (including multi-level and parallel machine problems) and develops several exact and heuristic algorithms to solve them. Special attention is given to the discrete lotsizing and scheduling problem which turns out to be a special batching and scheduling problem in this context. The book also contains a comparison of constraint (logic) programming with mixed-integer programming solvers for batching problems.

Ant Colony Optimization and Swarm Intelligence Marco Dorigo, Luca Maria Gambardella, Mauro Birattari, Alcherio Martinoli, Riccardo Poli, Thomas Stützle,2006-08-29 This book constitutes the refereed proceedings of the 5th International Workshop on Ant Colony Optimization and Swarm Intelligence, ANTS 2006, held in Brussels, Belgium, in September 2006. The 27 revised full papers, 23 revised short papers, and 12 extended abstracts presented were carefully reviewed and selected from 115 submissions.

Artificial Intelligence in Design '92 John S. Gero,2012-12-06 Design has now become an important research topic in engineering and architecture. Design is one of the keystones to economic competitiveness and the fundamental precursor to manufacturing. The development of computational models founded on the artificial intelligence paradigm has provided an impetus for current design research. This volume contains contributions from the Second International Conference on Artificial Intelligence in Design held in June 1992 in Pittsburgh. They represent the state-of-the-art and the cutting edge of research and development in this field. They are of particular interest to researchers, developers and users of computer systems in design. This volume demonstrates both the breadth and depth of artificial intelligence in design and points the way forward for our understanding of design as a process and for the development of computer-based tools to aid designers.

Statistical Digital Signal Processing and Modeling Monson H. Hayes,1996-04-19 The main thrust is to provide students with a solid understanding of a number of important and related advanced topics in digital signal processing such as Wiener filters, power spectrum estimation, signal modeling and adaptive filtering. Scores of worked examples illustrate fine points, compare techniques and algorithms and facilitate comprehension of fundamental concepts. Also features an abundance of interesting and challenging problems at the end of every chapter.

AI 2005: Advances in Artificial Intelligence Shichao Zhang,2005-11-21 This book constitutes the refereed proceedings of the 18th Australian Joint Conference on Artificial Intelligence, AI 2005, held in Sydney, Australia in December 2005. The 77 revised full papers and 119 revised short papers presented together with the abstracts of 3 keynote speeches were carefully reviewed and selected from 535 submissions. The papers are categorized in three broad sections, namely: AI foundations and technologies, computational intelligence, and AI in specialized domains. Particular topics addressed by the papers are logic and reasoning, machine learning, game theory, robotic technology, data mining, neural networks, fuzzy theory and algorithms, evolutionary computing, Web intelligence, decision making, pattern recognition, agent technology, and AI applications.

Artificial Intelligence and Soft Computing - ICAISC 2006 Leszek Rutkowski, Ryszard Tadeusiewicz, Lotfi A. Zadeh, Jacek Zurada,2006-06-27 This book constitutes the refereed proceedings of the 8th International Conference on Artificial Intelligence and Soft Computing, ICAISC 2006, held in Zakopane, Poland, in June 2006. The 128 revised contributed papers presented are organized in topical sections on neural networks and their applications, fuzzy systems and their applications, evolutionary algorithms and their applications, rough sets, classification and clustering, image analysis and robotics, bioinformatics and medical applications, various problems of artificial intelligence.

Advanced Introduction to Cities Peter J. Taylor,2021-02-26 This insightful Advanced Introduction explores the key attributes of cities, identifying their five basic characteristics; innate complexity, the agglomeration of activities, inter-city connectivities, the projection of power, and relations to states. Peter J. Taylor gives a broad and engaging overview of how these characteristics work and relate to each other, supplemented by ten short city insights which offer readers specific examples of cities and themes.
