Deterring Armageddon: A Biography of NATO Peter Apps,2024-02-01 The history of the world's most successful military alliance, from the wrecked Europe of 1945 to Vladimir Putin's invasion of Ukraine. As they signed NATO into being after World War II, its founders fervently believed that only if the West's democracies banded permanently together could they avoid a catastrophic global atomic conflict. Over the 75 years since, the alliance has indeed avoided war with Russia, also becoming a major political, strategic and diplomatic player well beyond its borders. It has survived disagreements between leaders from Eisenhower, Churchill and de Gaulle to Trump, Stoltenberg and Merkel, faced down Kremlin foes from Stalin to Putin and endured unending questions and debate over what new nations might be allowed to join. Deterring Armageddon takes the reader from backroom deals that led to NATO's creation, through the Cold War, the Balkans and Afghanistan to the current confrontation with the Kremlin following the invasion of Ukraine. It examines the tightrope walked by alliance leaders between a powerful United States sometimes flirting with isolationism and European nations with their ever-evolving wishes for autonomy and influence. Having spent much of its life preparing for conflicts that might never come, NATO has sometimes found itself in wars that few had predicted - and with its members now again planning for a potential major European conflict. It is a tale of tension, danger, rivalry, conflict, big personalities and high-stakes military and diplomatic posturing - as well as espionage, politics and protest. From the Korean War to the pandemic, the Berlin and Cuba crises to the chaotic evacuation from Kabul, Deterring Armageddon tells how the alliance has shaped and been shaped by history - and looks ahead to what might be the most dangerous era it has ever faced. 'Utterly eye-opening - compelling, haunting and continually illuminating. As Peter Apps so brilliantly demonstrates in this gripping book, the story of the NATO alliance is in many ways a parallel global history of the last 75 years. As well as all the outbreaks of seething tension between the US and its European allies - and the counter-moves of rival powers - this is also an account of just how often in those postwar years that we all stood on the edge of the most terrible abyss. With mesmerising fluency, and dazzling research, Apps follows the criss-crossing threads of the Cold War and beyond. Those threads converge in our shadowed present, and the conflict in Ukraine. In order to fathom today's dark world, Apps has explored a labyrinth of once-classified history, and he brings dazzling clarity.' - Sinclair McKay

Time Askew Peter Apps,2012 Time travel is hard. Finding trouble is easy. The trouble does not have to be your fault. You just have to grapple with a universe that becomes more confusing with every move you make. How do you put right a mistake if don't know where, how or when it happened? You just know the effect. You find yourself lost in a parallel universe.

Earth Against Earth Peter Apps,2014-09-30 P { margin-bottom: 0.21cm; } Young people been kidnapped throughout the whole of history? It has to be stopped but where do the abductors come from? And Stuart has other problems nearer to home. Firstly, there's an ex-slave, from the time of Socrates, building a forge in the garden of the village pub. It's a shock when a village boy asks him if he's on his way to another planet and can he come along. It's even more of a shock to discover that he's been the friend of the Darrington family since 1897. Stuart and his friends may have to move from the village they call home, maybe even leave Earth for good. Discovering where the abductors come from only twists time into ever more confusing loops which Stuart must negotiate to avoid creating an impossible paradox. Enjoy this latest tale Stuart and his friends as he pushes the technology he uses to the limits.

International News Reporting John Owen,Heather Purdey,2011-08-31 A collection of essays by top international correspondants in print, broadcasting, and photojournalism, International News Reporting offers an introduction to journalism written by the people who have made the profession what it is today. Contributors identify the major areas of professional practice which students and young journalists need to know in order to work safely in, and understand fully, the field of international news gathering Looks at events from conflicts to humanitarian disasters Covers crucial topics such as how to report stories about the developing world, how to avoid stereotyping, the uses and abuses of blogging, and risk assessment for journalists in conflict zones

Meanwhile in Time Peter Apps,2019-03-01 21st century schoolboys don't crew a warship about to go into battle. At least, not unless a temporal explosion tears the fabric of time so that Aodhan finds himself joining companions thrown forwards in time. David and Brian might be 18th century teenage midshipmen ready for their ship to engage a French frigate, but they're not ready for a helicopter arriving to investigate and none of them are ready for the task before them. Follow their adventures as they struggle to close the cracks and tears, created by an explosion they barely understand.

Show Me the Bodies PETER. APPS,2022-11-03 Grenfell didn't have to happen. On 14 June 2017, a 24-storey block of flats went up in flames. The fire climbed up cladding as flammable as solid petrol. Fire doors failed to self-close. No alarm rang out to warn sleeping residents. As smoke seeped into their homes, all were told to 'stay put'. Many did - and they died. It was a disaster decades in the making. Peter Apps exposes how a steady stream of deregulation, corporate greed and institutional indifference caused this tragedy. It is the story of a grieving community forsaken by our government, a community still waiting for change.

Wild Ways Peter Apps,2014-05-01 Wild Ways brings together all the latest studies of the behaviour of southern Africa's rich and accessible mammal fauna, describing not only what mammals do, but also the often surprising reasons why they do it, and covers species as diverse as fruit bats, pangolins, lions, rats and whales. Well-established as an invaluable resource for visitors to parks and reserves, hikers, hunters, farmers and outdoor enthusiasts, this classic guide has now been thoroughly updated and revised, has a fresh, lively design, and is packed with new and engrossing detail.

Disastrous Science Peter Apps,2014-09-28 P { margin-bottom: 0.21cm; } As the title suggests the stories in this compilation deals with events when science hits back. Disasters through complacency, nuclear war through losing control of events, or just an experiment going wrong all give science or rather nature a chance to show just how far we have to go. 'Fracture Point' deals with the consequences of our dependence on electricity in general and automated systems in particular. It dominates the book at 50,000 words especially since 'Leave 'Em Laughing' allows you to put the book down with a smile on your face at just 215 words. 'The Rising Moon Disaster', 'Time Done' and 'Gods and Demons' are more conventional short stories. Rising Moon is a space ship on its maiden flight to the moon, while in 'Time Done' a careless time traveller risks unravelling his future world. Gods and Demons deals with the consequences as events impinge on a society scarcely able to comprehend the outside world. The cause of a war is dealt with in, what else, 'World War III' but it is another ultra short story though I did cheat. As you read it, imagine that you are hearing it on the radio. The styles vary, I hope the tales interest so enjoy a mixed bag of tales about where science can lead us.

Fracture Point Peter Apps,2016-12-20 David is a petty criminal with a contempt for authority. Suddenly it becomes an asset as he tries to lead his friends to safety, always just one step ahead of disaster, but what sort of disaster could lead to a search for water in the middle of London? Could the Northern Lights herald the destruction of civilisation? Solar Flares can disrupt communications and can knock out power supplies. What happens if the damage is too great, and civilisation reaches its 'Fracture Point' For David and his friends, when the unthinkable happens, water proves to be the key, for both their escape and their survival. p { margin-bottom: 0.25cm; line-height: 120%; }

Deja Vu To The Nth Peter Apps,2013 p { margin-bottom: 0.21cm; text-align: justify; }p.cjk { font-size: 10pt; } The asteroid heading for Earth is nearly a mile wide. It could destroy all life on Earth but diverting it is all in a day's work for Stuart and his team. Then he has to do it again on a parallel Earth, then again and again. Hoping each time is the last Stuart despairs as yet another Earth needs his help and he is drawn inexorably into the heart of the crisis. Are the asteroids an accident or an attack on Earth? Was his Earth the real target or just collateral damage? The feeling that he is being guided doesn't help. Who is guiding him and why? Enjoy the third of the Stuart Johnson Chronicles as Stuart struggles to find out what's going on in an increasingly complex universe.

The Mammals of the Southern African Sub-region J. D. Skinner,Christian T. Chimimba,2006-03-20 This comprehensive volume covers all mammals that occur naturally on the African mainland south of the Cunene and Zambezi rivers, and also in the subregion's coastal waters. Extensively revised and updated for the new edition, it now includes the latest data from from mammal research in southern Africa along with the radical taxonomic changes across all levels of mammalian classification. Containing contributions from specialists on each mammalian order, each species description has been reviewed by a range of independent and

internationally recognised authorities. Along with the latest taxonomic information, the distribution maps and illustrations have been updated and redrawn, several new colour plates have been added, and the whole design has been enhanced to aid access to key information. This is the most comprehensive and up-to-date survey of southern-African mammals and forms an essential reference for zoologists, evolutionary biologists and anyone wanting an overview of the region's wildlife.

Best iPad Apps Peter Meyers,2010-12-08 What really wows iPad fans is when their touchscreen does what's impossible on other gadgets: the finger-painting app that turns a cross-country flight into a moving art class, the mini music studio (two-dozen instruments strong, each with motion-induced warble effects), and the portable fireworks display that you sculpt by swiping. Problem is, with tens of thousands of apps available for your iPad, who knows what to download? You can try to sort through a gazillion customer reviews with a mix of 5- and 1-star ratings, but that’s a head-hurting time-waster. The stakes are getting higher, too: instead of freebies and 99-cent trinkets, the price of iPad apps is steadily creeping up and beyond their iPhone predecessors. Best iPad Apps guides you to the hidden treasures in the App Store's crowded aisles. Author Peter Meyers stress-tested thousands of options to put together this irresistible, page-turner of a catalog. Inside these pages, you'll find apps as magical as the iPad itself. Flip through the book for app suggestions, or head directly to one of several categories we've loaded up with best of selections to help you: Get work done Manipulate photos Make movies Create comics Browse the Web better Take notes Outline ideas Track your health Explore the world No matter how you use your iPad, Best iPad Apps will help you find the real gems among the rubble -- so you make the most of your glossy gadget.

Making Musical Apps Peter Brinkmann,2012-02-17 Want to turn your mobile device into a musical instrument? Or equip your game with interactive audio, rather than canned samples? You can do it with Pure Data (Pd), an open source visual programming environment that lets you manipulate digital audio in real time. This concise book shows you how to use Pd—with help from the libpd library—as an easily embeddable and widely portable sound engine. Whether you’re an audio developer looking to create musical apps with sophisticated audio capabilities, or an application developer ready to enhance mobile games with real-time procedural audio, Making Musical Apps introduces you to Pd and libpd, and provides hands-on instructions for creating musical apps for Android and iOS. Get a crash course in Pd, and discover how to generate and control sounds Learn how to create and deploy algorithmic compositions that react to a user’s activity and environment Use Java or Objective-C to integrate Pd and libpd into mobile apps Learn the steps necessary to build libpd-based apps for Android and iOS

Before Ebola Peter Apps,2014-10-31 Angola 2005. Almost a decade before Ebola wreaked havoc in Liberia and Sierra Leone, its even deadlier cousin hit northern Angola. Aged only 23, Peter Apps was the Reuters reporter sent in to get the story of the deadliest ever outbreak of Marburg virus. This is his haunting account of not just the disease but his coming of age as a time of almost unbearable crisis.

Social Networking Noah Berlatsky,2013-03-04 This book explores the popularity and use of social networking worldwide, which for twenty-first century standards, is essential to understand. Readers will evaluate how social networking is used in different cultures, and whether social networking has an impact on democratic movements and what that impact may be. They will explore social networking and access to information/censorship. Primary sources, including speeches and government documents, join essays from international sources for a truly panoramic view. Helpful features include an annotated table of contents, a world map and country index, a bibliography, and a subject index.

The Growing Universe Peter Apps,2017-03-31 Who is David? Is he just a thirteen year old boy with a strange delusional amnesia or is there something more. When he is found unconscious by the roadside with a gash to his head, he does not have anything to identify him. When he comes round, anything electrical fascinates him as if it is a whole new concept and little idea of the world around him. What he does have, are stories of a largely steam driven world, an impressive but curiously old-fashioned education and a claim to be the Duke of Barabourne, a dukedom that did not exist. Follow David’s adventure as he searches for answers and discovers a universe larger than anyone could imagine. p { margin-bottom: 0.21cm; text-align: left; }p.western { font-weight: bold; }p.cjk { font-size: 10pt; }

Smithers' Mammals of Southern Africa Peter Apps,Reay H. N. Smithers,2012 First published in 1986, Smithers' Mammals is an authoritative and popular guide to the mammals of Southern Africa, including whales, dolphins and seals. Will appeal to general readers and wildlife enthusiasts, as well as to specialists in the field.

Catastrophe and Systemic Change: Learning from the Grenfell Tower Fire and Other Disasters Gill Kernick,2021-05-27 The Grenfell Tower tragedy was the worst residential fire in London since World War II. It killed seventy-two people in the richest borough of one of the wealthiest countries in the world. Like other catastrophic events before it and since, it has the power to bring about lasting change. But will it? The historical evidence is weighed against ‘lessons being learned’ in a meaningful or enduring way. In an attempt to understand why, despite enormous efforts, we persistently fail to learn from catastrophic events, this book uses the details of the Grenfell fire as a case study to consider why we don’t learn and what it would take to enable real systemic change. The book explores the myths, the key challenges and the conditions that inhibit learning, and it identifies opportunities to positively disrupt the status quo. It offers an accessible model for systemic change, not as a definitive solution but rather as a framework to evoke reflection, enquiry and proper debate. Catastrophe and Systemic Change is a must-read book for a wide range of readers including those interested in change management, leadership, policy-making, law, housing, construction and public safety.

Smithers' Mammals of Southern Africa Peter Apps,1996 Based on Reay Smithers' original work Land Mammals of Southern Africa, this revised and expanded field guide to Southern African mammals is intended for the general reader as well as the wildlife enthusiast.

My first book of Southern African Mammals Peter Apps,2012-06-28 Mammals come in a huge variety of shapes and sizes, from tiny bats and mice to massive elephants and whales. This first book of mammals introduces a cross-section of often-seen mammals, as well as some of those that are less commonly found. A total of 58 species is presented in full-colour illustrations. Visual clues to each mammal’s size, its tracks and what it eats are shown alongside. Written by a mammal specialist, My first book of Southern African Mammals will appeal to young readers, as well as to learners of all ages who wish to improve their knowledge of other languages.
