The Oxford Handbook of Archaeological Network Research Tom

Brughmans,Barbara J. Mills,Jessica Munson,Matthew A. Peeples,2023-11-23

Network research has recently been adopted as one of the tools of the trade in archaeology, used to study a wide range of topics: interactions between island communities, movements through urban spaces, visibility in past landscapes, material culture similarity, exchange, and much more. This Handbook is the first authoritative reference work for archaeological network research, featuring current topical trends and covering the archaeological application of network methods and theories. This is elaborately demonstrated through substantive topics and case studies drawn from a breadth of periods and cultures in world archaeology. It highlights and further develops the unique contributions made by archaeological research to network science, especially concerning the development of spatial and material culture network methods and approaches to studying long-term network change. This is the go-to resource for students and scholars wishing to explore how network science can be applied in archaeology through an up-to-date overview of the field.

Paradoxes of Digital Disengagement Adi Kuntsman,Esperanza Miyake,2022-10-04

Life is increasingly governed and mediated through digital and smart technologies, platforms, big data and algorithms. However, the reasons, practices and impact of how the digital is used by different institutions are often deeply linked to social oppression and injustice. Similarly, the ability to resist these digital impositions is based on inequality and privilege. Challenging the ways in which we are increasingly dependent on the digital, this book raises a set of provocative and urgent questions: in a world of compulsory digitality is there an opt out button? Where, when, how, why and to whom is it available? Answering these questions has become even more relevant since the COVID-19 pandemic. In response, the book puts forward the concept of 'digital disengagement' which is explored across six key areas of digitisation: health; citizenship; education; consumer culture; labour; and the environment. Part I examines the difficulty of opting out of compulsory digitality in a world where most things are digital by default. From health apps, algorithmic decision-making to learning analytics, opting out comes with a set of troubling consequences. Part II turns to several examples of disconnection and disengagement. The chapters reveal how phenomena like digital detoxes, time-management apps and online 'green' spaces are co-opted by the very digital systems one is trying to resist. The book critiques issues relating to digital surveillance, algorithmic discrimination and biased tech, corporatisation and monetisation of data, exploitative digital labour, digitalised self-discipline and destruction of the environment. As an interdisciplinary piece of work, the book will be useful to any scholar and activist in Digital, Internet and Social Media Studies; Digital Sociology and Social Policy; Digital Health; Media, Popular and Communication Studies; Consumer culture; and Environment Studies.

O ženách a o lásce Edith Holá,2014-01-01 Ženy jsou složeny z mnoha barevných provázků. Člověk nikdy neví, za který má zatáhnout. Ať už zatáhne za jakýkoli, vždy se stane něco, co vůbec nečeká... Nová kniha Edith Holé

vypráví silný příběh o ženách, šílených nápadech, vyrovnávání se s vlastním životem, různých druhých lží, ale především o lásce. Autorka opatrně vystřihuje záhyby příběhu tří žen, dvou matek a jedné dcery. Román o surogačním (náhradním) mateřství ukazuje jev, který je díky medicíně už mnoho let možný, není zakázaný, ale ani legislativně zcela upravený, a tak se často odehrává tajně a bez jasných pravidel. Spojení matky a dítěte ovšem není možné přerušit. *** Edith Holá (* 1973) je autorka biografické knihy *Cesta k mým matkám* (Nakladatelství JOTA, 2012), koordinátorka a spoluautorka projektu *Pohádky pro kulíšky*. Za terapeutické pohádky pro rodiče předčasně narozených dětí určené ke čtení na JIP a práci na celém projektu pro nadaci Nedoklubko byla v listopadu 2012 oceněna Purpurovým srdcem. V adventním čtení sdružení *Cesta domů* vyšel v roce 2013 její text *Cesta domů je cesta k srdci*. Edith Holá pracuje v médiích a je hrdá matka dvou dětí.

AETA 2018 - Recent Advances in Electrical Engineering and Related Sciences: Theory and Application Ivan Zelinka, Pavel Brandstetter, Tran Trong Dao, Vo Hoang Duy, Sang Bong Kim, 2019-04-13 These proceedings address a broad range of topic areas, including telecommunication, power systems, digital signal processing, robotics, control systems, renewable energy, power electronics, soft computing and more. Today's world is based on vitally important technologies that combine e.g. electronics, cybernetics, computer science, telecommunication, and physics. However, since the advent of these technologies, we have been confronted with numerous technological challenges such as finding optimal solutions to various problems regarding controlling technologies, signal processing, power source design, robotics, etc. Readers will find papers on these and other topics, which share fresh ideas and provide state-of-the-art overviews. They will also benefit practitioners, who can easily apply the issues discussed here to solve real-life problems in their own work. Accordingly, the proceedings offer a valuable resource for all scientists and engineers pursuing research and applications in the above-mentioned fields.

Membrane Protein Complexes: Structure and Function J. Robin Harris, Egbert J. Boekema, 2018-02-20 This edited book contains a compilation of 14 advanced academic chapters dealing with the structure and function of membrane protein complexes. This rapidly advancing important field of study closely parallels those on soluble protein complexes, and viral protein and nucleoprotein complexes. Diverse topics are included in this book, ranging from membrane-bound enzymes to ion channels, proton pumps and photosystems. Data from X-ray crystallography, cryo-electron microscopy and other biophysical and biochemical techniques are presented throughout the book. There is extensive use of colour figures of protein structures. Throughout the book structure and function are closely correlated. The two editors, Egbert Boekema and J. Robin Harris, have worked on aspects of membrane and soluble proteins throughout their scientific careers and also have much publishing experience. The Subcellular Biochemistry series has expanded considerably in recent years, including several related volumes. The theme of protein complexes will be continued within several future volumes, thereby creating encyclopaedic coverage. The chapter topics within this book are particularly relevant to those involved in the biological and biomedical sciences. It is aimed at the advanced undergraduates, postgraduates and established researchers within this broad field. It is hoped that the book will be of interest and use to those involved with the study of cellular membranes and their associated proteins.
