*Grounded Theory and Grounded Theorizing* Antony Bryant PhD,2016-12-15 The grounded theory method is founded on a view of analysis whereby the research questions and potential hypotheses are not articulated at the outset; rather, the researcher initially seeks to gain familiarity with a research context, and only in later stages does the process become progressively more focused and targeted. As such, the grounded theory method uses familiar research tools and techniques (coding, sampling, classification) but in distinctive and innovative ways. As a result, the method is one of the most widely used-if not the most widely used-method in current qualitative research. Initially aimed at the social sciences, the grounded theory method has now spread so far that it can be found in almost any subject area or discipline in which people are observed or interviewed as participants. In *Grounded Theory and Grounded Theorizing: Pragmatism in Research Practice*, author Antony Bryant illustrates the key features of grounded theory method by showcasing examples from several of his most successful doctoral students. In this accessible volume, Bryant provides expert guidance on the use of grounded theory method in qualitative research by emphasizing and illustrating the essential features and background of the method for readers and researchers of all levels and competencies.

**Framing Public Memory** Kendall R. Phillips,2004-04-12 A collection of essays by prominent scholars from many disciplines on the construction of public memories The study of public memory has grown rapidly across numerous disciplines in recent years, among them American studies, history, philosophy, sociology, architecture, and communications. As scholars probe acts of collective remembrance, they have shed light on the cultural processes of memory. Essays contained in this volume address issues such as the scope of public memory, the ways we forget, the relationship between politics and memory, and the material practices of memory. Stephen Browne's contribution studies the alternative to memory erasure, silence, and forgetting as posited by Hannah Arendt in her classic *Eichmann in Jerusalem*. Rosa Eberly writes about the Texas tower shootings of 1966, memories of which have been minimized by local officials. Charles Morris examines public reactions to Larry Kramer's declaration that Abraham Lincoln was homosexual, horrifying the guardians of Lincoln's public memory. And Barbie Zelizer considers the impact on public memory of visual images, specifically still photographs of individuals about to perish (e.g., people falling from the World Trade Center) and the sense of communal loss they manifest. Whether addressing the transitory and mutable nature of collective memories over time or the ways various groups maintain, engender, or resist those memories, this work constitutes a major contribution to our understanding of how public memory has been and might continue to be framed.
