Knowledge Acquisition, Modeling and Management Dieter Fensel, Rudi Studer, 1999-05-19 This book constitutes the refereed proceedings of the 11th European Workshop on Knowledge Acquisition, Modeling and Management, EKAW '99, held at Dagstuhl Castle, Germany in May 1999. The volume presents 16 revised full papers and 15 revised short papers were carefully reviewed and selected from a high number of submissions. Also included are two invited papers. The papers address issues of knowledge acquisition (i.e., the process of extracting, creating, structuring knowledge, etc.), of knowledge-level modeling for knowledge-based systems, and of applying and redefining this work in a knowledge management and knowledge engineering context.

The Semantic Web Vipul Kashyap, Christoph Bussler, Matthew Moran, 2008-08-15 The Semantic Web is a vision – the idea of having data on the Web defined and linked in such a way that it can be used by machines not just for display purposes but for automation, integration and reuse of data across various applications. However, there is a widespread misconception that the Semantic Web is a rehash of existing AI and database work. Kashyap, Bussler, and Moran dispel this notion by presenting the multi-disciplinary technological underpinnings such as machine learning, information retrieval, service-oriented architectures, and grid computing. Thus they combine the informational and computational aspects needed to realize the full potential of the Semantic Web vision.

Knowledge Acquisition, Modeling and Management Rudi Studer, 2003-06-29 Past, Present, and Future of Knowledge Acquisition This book contains the proceedings of the 11th European Workshop on Knowledge Acquisition, Modeling, and Management (EKAW '99), held at Dagstuhl Castle (Germany) in May of 1999. This continuity and the high number of submissions reflect the mature status of the knowledge acquisition community. Knowledge Acquisition started as an attempt to solve the main bottleneck in developing expert systems (now called knowledge-based systems): Acquiring knowledge from a human expert. Various methods and tools have been developed to improve this process. These approaches significantly reduced the cost of developing knowledge-based systems. However, these systems often only partially fulfilled the task they were developed for and maintenance remained an unsolved problem. This required a paradigm shift that views the development process of knowledge-based systems as a modeling activity. Instead of simply transferring human knowledge into machine-readable code, building a knowledge-based system is now viewed as a modeling activity. A so-called knowledge model is constructed in interaction with users and experts. This model need not necessarily reflect the already available human expertise. Instead it should provide a knowledge level characterization of the knowledge that is required by the system to solve the application task. Economy and quality in system development and maintainability are achieved by reusable problem-solving methods and ontologies. The former describe the reasoning process of the knowledge-based system (i. e. , the algorithms it uses) and the latter describe the knowledge structures it uses (i. e. , the data structures). Both abstract from specific application and domain specific circumstances to enable knowledge reuse.

Web Design in a Nutshell Jennifer Niederst Robbins, 2006-02-21 Are you still designing web sites like it's 1999? If so, you're in for a surprise. Since the last edition of this book appeared five years ago, there has been a major climate change with regard to web standards. Designers are no longer using (X)HTML as a design tool, but as a means of defining the meaning and structure of content. Cascading Style Sheets are no longer just something interesting to tinker with, but rather a reliable method for handling all matters of presentation, from fonts and colors to the layout of the entire page. In fact, following the standards is now a mandate of professional web design. Our popular reference, *Web Design in a Nutshell*, is one of the first books to capture this new web landscape with an edition that's been completely rewritten and expanded to reflect the state of the art. In addition to being an authoritative reference for (X)HTML and Cascading Style Sheets, this book also provides an overview of the unique requirements of designing for the Web and gets to the nitty-gritty of JavaScript and DOM Scripting, web graphics optimization, and multimedia production. It is an indispensable tool for web designers and developers of all levels. The third edition covers these contemporary web design topics: Structural layer: HTML 4.01 and XHTML 1.0 (9 chapters), including an alphabetical reference of all elements, attributes and character entities Presentation layer: Ten all-new chapters on Cascading Style Sheets, Level 2.1, including an alphabetical reference of all properties and values. Behavior layer: JavaScript and scripting with the Document Object Model (DOM) Web environment: New web standards, browsers, display devices, accessibility, and internationalization Web graphics optimization: Producing lean and mean GIF, JPEG, PNG, and animated GIFs Multimedia: Web audio, video, Flash, and PDF Organized so that readers can find answers quickly, *Web Design in a Nutshell, Third Edition* helps experienced designers come up to speed quickly on standards-based web design, and serves as a quick reference for those already familiar with the new standards and technology. There are many books for web designers, but none that address such a wide variety of topics. Find out why nearly half a million buyers have made this the most popular web design book available.

Selling Rights Lynette Owen, 2019-07-31 *Selling Rights* has firmly established itself as the leading guide to all aspects of rights sales and co-publications throughout the world. The eighth edition is substantially updated to illustrate the changes in rights in relation to new technologies and legal developments in the UK and the rest of the world. This fully revised and updated edition includes: • coverage of the full range of potential rights, from English-language territorial rights through to serial rights, permissions, rights for the reading-impaired, translation rights, dramatization and documentary rights, electronic and multimedia rights; • more detailed coverage of Open Access; • the aftermath of recent reviews and revisions to copyright in the UK and elsewhere; • updated coverage of book fairs; • a major update of the chapter on audio rights; • an updated chapter on collective licensing via reproduction rights organizations; • the impact of new electronic hardware (e-readers, tablets, smartphones); • the distinction between sales and licences; • the rights implications of acquisitions, mergers and disposals; • updates on serial rights; • new appendices listing countries belonging to the international copyright conventions and absentee countries. *Selling Rights* is an essential reference tool and an accessible and illuminating guide to current and future issues for rights professionals and students of publishing.

Draws on multiple theoretical lenses for studying the Chinese high technology industry and markets Focuses on a range of technology industries Special emphasis is placed on ultra-modern and crucial ICT industries in which Chinese players possess a competitive advantage

Children's Writers' & Artists' Yearbook 2022 Bloomsbury Publishing, 2021-07-22 Foreword by M. G. Leonard: 'It's rare to find a book that's as useful as it is inspiring ... essential reading.' The indispensable guide to writing for children and young adults, this Yearbook provides inspirational articles from successful writers and illustrators, as well as details on who to contact across the media. It provides practical advice on all stages of the writing process from getting started, writing for different markets and genres, through to submission to literary agents and publishers as well as on the financial and legal aspects of being a writer. Widely recognised as the essential support for authors and illustrators working across all forms: fiction, non-fiction, poetry, screen and theatre, it is equally relevant to those wishing to self-publish as well as those seeking a traditional publisher-agent deal. New articles for 2022: Christopher Edge Plotting and pace in your middle-grade adventure L. D. Lapinski World-building in your fantasy fiction Anna Wilson Finding your voice and point of view Rachel Bladon The learning curve: writing for the children's educational market Jenny Bowman How to hire a freelance editor Sophie Clarke The life and works of a literary scout Rachel Rooney Writing poetry for children

Building the Information Society Rene Jacquart, 2008-04-08 In the context of the 18th IFIP World Computer Congress (WCC'04), and beside the traditional organization of conferences, workshops, tutorials and student forum, it was decided to identify a range of topics of dramatic interest for the building of the Information Society. This has been featured as the Topical day/session track of the WCC'04. Topical Sessions have been selected in order to present syntheses, latest developments and/or challenges in different business and technical areas. Building the Information Society provides a deep perspective on domains including: the semantic integration of heterogeneous data, virtual realities and new entertainment, fault tolerance for trustworthy and dependable information infrastructures, abstract interpretation (and its use for verification of program properties), multimodal interaction, computer aided inventing, emerging tools and techniques for avionics certification, bio-, nano-, and information technologies, E-learning, perspectives on ambient intelligence, the grand challenge of building a theory of the Railway domain, open source software in dependable systems, interdependencies of critical infrastructure, social robots, as a challenge for machine intelligence. Building the Information Society comprises the articles produced in support of the Topical Sessions during the IFIP 18th World Computer Congress, which was held in August 2004 in Toulouse, France, and sponsored by the International Federation for Information Processing (IFIP).
