The Tower of the Antilles Achy Obejas,2017-07-04 PEN/Faulkner Award Finalist: A “superb story collection” about America and Cuba, escape and return, and history and hope (Los Angeles Times). Longlisted for The Story Prize One of Electric Literature’s Best Short Story Collections of the Year In “Superman,” several possible story lines emerge about a 1950s Havana sex-show superstar who disappeared as soon as the revolution triumphed. “North/South” portrays a migrant family trying to cope with separation and the eventual disintegration of blood ties. “The Cola of Oblivion” follows a young woman who returns to Cuba and inadvertently uncorks a history of accommodation and betrayal among the family members who stayed behind during the revolution. And in the title story, an interrogation reveals a series of fantasies about escape and a history of futility. The Cubans in Achy Obejas’ story collection are haunted by islands: the island they fled, the island they’ve created, the island they were taken to or forced from, the island they long for, the island they return to, and the island that can never be home again. “[A] memorable short fiction collection.” —Publishers Weekly “By turns searing and subtly magical . . . Obejas’ plots are ambushing, her characters startling, her metaphors fresh, her humor caustic, and her compassion potent in these intricate and haunting stories of displacement, loss, stoicism, and realization.” —Booklist “Obejas writes with gentleness, without flashy wording or gimmicks, about people trying to figure out where they belong.” —Los Angeles Review of Books

The Basque Book Alexandra Raij, Eder Montero, Rebecca Flint Marx, 2016-04-19 Chefs Alexandra Raij and Eder Montero share more than one hundred recipes from Txikito—all inspired by the home cooking traditions of the Basque Country—that will change the way you cook in this much-anticipated and deeply personal debut. Whether it's a perfectly ripe summer tomato served with just a few slivers of onion and a drizzle of olive oil, salt cod slowly poached in oil and topped with an emulsion of its own juices, or a handful of braised leeks scattered with chopped egg, Basque cooking is about celebrating humble ingredients by cooking them to exquisite perfection. Chefs Alexandra Raij and Eder Montero are masters of this art form, and their New York City restaurant Txikito is renowned for its revelatory preparations of simple ingredients. Dishes like Salt Cod in Pil Pil sauce have fewer than five ingredients yet will astonish you with their deeply layered textures and elegant flavors. By following Raij's careful but encouraging instructions, you can even master Squid in Its Own Ink—a rite of passage for Basque home cooks, and another dish that will amaze you with its richness and complexity. The Basque Book is a love letter: to the Basque Country, which inspired these recipes and continues to inspire top culinary minds from around the world; to ingredients high and low; and to the craft of cooking well. Read this book, make Basque food, learn to respect ingredients—and, quite simply, you will become a better cook. - Food & Wine Magazine, Editor's picks for Best of 2016

Daniel Thomas HANNAH (ED) & MILLER FINK (STEVEN (ED) & BRAND, MICHAEL (ED)), Art Gallery NSW, 2020-06 ... over the course of half a century, Daniel has asked and answered the questions that no one else has thought of. Originality, curiosity, generosity and intellectual precision have always been at the heart of his work. Andrew Sayers, former director of the National Portrait Gallery, Canberra No one knows more about Australian art than Daniel Thomas. Over the past sixty years, he has shaped Australian art history, championing women artists such as Grace Cossington Smith and extending the appreciation of art beyond museum walls to include performance and environmental art. Daniel's exhibitions and purchases - as the first museum professional at the Art Gallery of New South Wales, inaugural curator of Australian art at the National Gallery in Canberra, and director of the Art Gallery of South Australia - have defined our national canon of art. Covering the period from 1958 to 2020, Recent past: writing Australian art is the first anthology of Thomas's writings and presents an overview of Australian art, at once authoritative and idiosyncratic, bringing alive both old and new art. Daniel's life's work has been to make art more widely understood and enjoyed. Yet most of his writings have appeared in specialist publications which are often now difficult to source. This book celebrates Daniel's contribution to Australian art and will introduce his writings to new generations of art enthusiasts.

The Science and Art of Branding Giep Franzen, Sandra E. Moriarty, 2015-02-12 This innovative work provides a state-of-the-art overview of current thinking about the development of brand strategy. Unlike other books on branding, it approaches successful brand strategy from both the producer and consumer perspectives. The Science and Art of Branding makes clear distinctions among the producer's intentions, external brand realities, and consumer's brand perceptions - and

explains how to fit them all together to build successful brands. Co-author Sandra Moriarty is also the author of the leading Principles of Advertising textbook, and she and Giep Franzen have filled this volume with practical learning tools for scholars and students of marketing and marketing communications, as well as actual brand managers. The book explains theoretical concepts and illustrates them with real-life examples that include case studies and findings from large-scale market research. Every chapter opens with a mini-case history, and boxed inserts featuring quotes from experts appear throughout the book. The Science and Art of Branding also goes much more deeply than other works into the core concept of brand equity, employing new measurement systems only developed over the last few years.

The Geometry of Type Stephen Coles, 2016-07-12 The Geometry of Type explores 100 traditional and modern typefaces in detail, with a full spread devoted to each entry. Characters from each typeface are enlarged and annotated to reveal key features, anatomical details, and the finer, often-overlooked elements of type design, which shows how these attributes affect mood and readability. Sidebar information lists the designer and foundry, the year of release and the different weights and styles available, while feature boxes explain the origins and best uses for each typeface, such as whether it is suitable for running text or as a display font for headlines. To help the reader spot each typeface in the wider world, the full character set is shown, and the best letters for identification are highlighted.

Meta-topolin: A Growth Regulator for Plant Biotechnology and Agriculture Naseem Ahmad, Miroslav Strnad, 2021-05-02 Plant tissue culture (PTC) technology has gained unassailable success for its various commercial and research applications in plant sciences. Plant growth regulators (PGRs) are an essential part of any plant tissue culture intervention for propagation or modification of plants. A wide range of PGRs are available, including aromatic compounds that show cytokinin activities, promote cell division and micro-propagation, viz. kinetin, N6-benzyladenine and topolins. Topolins are naturally occurring aromatic compounds that have gained popularity as an effective alternative for other frequently used cytokinins in in vitro culture of plants. Among them, meta-topolin [6-(3-hydroxybenzylamino) purine] is the most popular and its use in plant tissue culture has amplified swiftly. During the last few decades, there have been numerous reports highlighting the effectiveness of meta-topolin in micropropagation and alleviation of various physiological disorders, rooting and acclimatization of tissue culture raised plants.

Public Libraries in the Smart City Dale Leorke, Danielle Wyatt, 2018-10-10 Far from heralding their demise, digital technologies have lead to a dramatic transformation of the public library. Around the world, libraries have reinvented themselves as networked hubs, community centres, innovation labs, and makerspaces. Coupling striking architectural design with attention to ambience

and comfort, libraries have signaled their desire to be seen as both engines of innovation and creative production, and hearts of community life. This book argues that the library's transformation is deeply connected to a broader project of urban redevelopment and the transition to a knowledge economy. In particular, libraries have become entangled in visions of the smart city, where densely networked, ubiquitous connectivity promises urban prosperity built on efficiency, innovation, and new avenues for civic participation. Drawing on theoretical analysis and interviews with library professionals, policymakers, and users, this book examines the inevitable tensions emerging when a public institution dedicated to universal access to knowledge and a shared public culture intersects with the technology-driven, entrepreneurialist ideals of the smart city.
