Charles Hartshorne

Plato and the Nerd Edward Ashford Lee, 2018-10-09

How humans and technology evolve together in a creative partnership. In this book, Edward Ashford Lee makes a bold claim: that the creators of digital technology have an unsurpassed medium for creativity. Technology has advanced to the point where progress seems limited not by physical constraints but the human imagination. Writing for both literate technologists and numerate humanists, Lee makes a case for engineering—creating technology—as a deeply intellectual and fundamentally creative process. Explaining why digital technology has been so transformative and so liberating, Lee argues that the real power of technology stems from its partnership with humans. Lee explores the ways that engineers use models and abstraction to build inventive artificial worlds and to give us things that we never dreamed of—for example, the ability to carry in our pockets everything humans have ever published. But he also attempts to counter the runaway enthusiasm of some technology boosters who claim everything in the physical world is a computation—that even such complex phenomena as human cognition are software operating on digital data. Lee argues that the evidence for this is weak, and the likelihood that nature has limited itself to processes that conform to today's notion of digital computation is remote. Lee goes on to argue that artificial intelligence's goal of reproducing human cognitive functions in computers vastly underestimates the potential of computers. In his view, technology is coevolving with humans.

It augments our cognitive and physical capabilities while we nurture, develop, and propagate the technology itself. Complementarity is more likely than competition.

**Creativity and Beyond** Robert Paul

Weiner, 2012-02-01 Explores how historical, artistic, and technological developments and cross-cultural exchange have altered our conceptions of creativity.

**Thoughts on the Republic** Clark

Diggles, 2017-04-20 Suitable for all inquiring minds, Thoughts on the Republic is an inspiring and thought-provoking daily journal that contains over 75 philosophical writing prompts for your analysis. Never again need you read through the entirety of a centuries-old book. Here you will find an abundance of interesting and gripping questions and thoughts all aimed at making you think about the things that count. The idea behind this unique journal is to get you to think of old questions about the world in new, philosophic and refreshingly interesting ways, and while you're thinking, to also gain a deeper understanding of the world around you in the process. But most of all, this interactive journal is meant to be a simple shortcut to finding new ideas for you... A respite from the immense dedication it takes to digest a classic work. Grab a cup of your favorite beverage, curl up in your favorite quiet corner, and turn the page to your next exciting philosophical question or writing subject. Enjoy!

**Critical Condition** Patrick Finn, 2015-06-18

Should we stop teaching critical thinking? Meant as a prompt to further discussion, Critical

Condition questions the assumption that every student should be turned into a “critical thinker.” The book starts with the pre-Socratics and the impact that Socrates’ death had on his student Plato and traces the increasingly violent use of critical “attack” on a perceived opponent. From the Roman militarization of debate to the medieval Church’s use of defence as a means of forcing confession and submission, the early phases of critical thinking were bound up in a type of attack that Finn suggests does not best serve intellectual inquiry. Recent developments have seen critical thinking become an ideology rather than a critical practice, with levels of debate devolving to the point where most debate becomes ad hominem. Far from arguing that we abandon critical inquiry, the author suggests that we emphasize a more open, loving system of engagement that is not only less inherently violent but also more robust when dealing with vastly more complex networks of information. This book challenges long-held beliefs about the benefits of critical thinking, which is shown to be far too linear to deal with the twenty-first century world. Critical Condition is a call to action unlike any other.

The International Handbook on Innovation Larisa V Shavinina, 2003-10-16 The breadth of this work will allow the reader to acquire a comprehensive and panoramic picture of the nature of innovation within a single handbook.

**Parallel Thinking** Edward de Bono, 2016-07-07 Western thinking is failing because it was not designed to deal with change In this provocative

masterpiece of creative thinking, Edward de Bono argues for a game-changing new way to think. For thousands of years we have followed the thinking system designed by the Greek philosophers Socrates, Plato and Aristotle, based on analysis and argument. But if we are to flourish in today's rapidly changing world we need to free our minds of these 'boxes' and embrace a more flexible and nimble model. Parallel Thinking is an invaluable insight into the world of creativity; de Bono unveils unique methods of brainstorming and explains preconceived ideas of what creativity involves and is. This book is not about philosophy; it is about the practical (and parallel) thinking required to get things done in an ever-changing world.

Modes of Creativity Irving Singer, 2011  
Philosophical reflections on creativity in science, humanities, and human experience as a whole.

The Creativity Question Albert Rothenberg, Carl R. Hausman, 1976  
Albert Rothenberg, a psychiatrist, and Carl R. Hausman, a philosopher, have prepared a truly comprehensive interdisciplinary book of readings on creativity. This group of selections from the works of writers in psychiatry, philosophy, psychology, psychoanalysis, and education brings together, for the first time, major theoretical works, outstanding empirical findings, and discussions of the definition and nature of creativity. The organization of The Creativity Question is unique: it illustrates the various approaches and basic assumptions underlying studies of creativity throughout the

course of history up to the present time. The main body of selections appears under the categories of descriptions, attempts at explanation, and alternate approaches. As specific orientations to creativity can be traced to particular initiating thinkers and investigators, there is a special chapter on seminal accounts containing selections from the works of Plato, Aristotle, Kant, Galton, and Freud. Another chapter includes recent illustrations of special types of exploratory trends: creativity of women, brain research, synectics, extrasensory perception, behaviorism, and creativity computer programming. This organization highlights the tension between strictly scientific accounts and alternative approaches offering new ways of understanding. The editors have provided for the books as a whole and for each chapter explanation and discussion of the basic issues raised by the various approaches to creativity.

*Creative Evolution Revisited* Donald C. Austin  
MD, 2010-05-06 Henri Bergson was a great French philosopher whose life overlapped that of Charles Darwin. He had serious concerns about Darwin's atheistic concept of man and animals evolution. Bergson also presented ideas of Intelligent Design almost 200 years prior to its regeneration in the 20th century. My book separates God from Evolution of the cosmos and all it contains by espousing the *elan vitale* as of God and the true creator of the Universe. The Philosophy of Creativity Elliot Samuel Paul, Scott Barry Kaufman, 2014-05 Creativity pervades human life. It is the mark of individuality, the vehicle of self-expression, and the engine of progress in every human endeavor. It also raises a wealth of neglected and yet evocative philosophical questions. The Philosophy of Creativity takes up these questions and, in doing so, illustrates the value of interdisciplinary exchange.

**Explaining Creativity** R. Keith Sawyer, 2012-01-12 Explaining Creativity is a comprehensive and authoritative overview of scientific studies on creativity and innovation. Sawyer discusses not only arts like painting and writing, but also science, stage performance, business innovation, and creativity in everyday life. Sawyer's approach is interdisciplinary. In addition to examining psychological studies on creativity, he draws on anthropologists' research on creativity in non-Western cultures, sociologists' research on the situations, contexts, and networks of creative activity, and cognitive neuroscientists' studies of the brain.

*Media and the Government of Populations* Philip Dearman, Cathy Greenfield, Peter Williams, 2018-08-12 This book deals with the social, cultural and especially political significance of media by shifting from the usual focus on the public sphere and publics and paying attention to populations. It describes key moments where populations of different sorts have been subject to formative and

diverse projects of governing, in which communication has been key. It brings together governmentality studies with the study of media practices and communication technologies. Chapters consider print culture and the new political technology of individuals; digital economies as places where populations are formed, known and managed as productive resources; workplaces, schools, clinics and homes as sites of governmental objectives; and how to appropriately link communication technologies and practices with politics. Through these chapters Philip Dearman, Cathy Greenfield and Peter Williams demonstrate the value of considering communication in terms of the government of populations.

**Plato's Dialogues** Carol Dunn, 2012 The author makes the case that Plato is engaged not only in thinking but also, and more important, in doing--that what we do with the knowledge is crucial, because it can determine the meaning and purpose of our own life. She saw that he was not merely engaging in rational philosophical discussion, but that the dialogues of Plato, especially up to the Republic, embody the Socratic exhortation for each individual to take care for the soul. The dialogues therefore embody both a rational philosophy and a system of spiritual/religious principles and doctrines whose purpose is to lay out--in a public forum--the path a true disciple needs to take to have a personal and direct experience of spiritual illumination, or enlightenment.

**The Quest for Meaning** William Cooney, 2014-07-28 The Quest for Meaning explores the deep-seated

human need to create a life that is meaningful. In an effort to understand this need, author William Cooney examines the works of philosophers from Plato to Sartre as well as the insights of artists, poets, writers, psychologists, and film-makers. He discusses the nature of humanness, creation, freedom, and choice, all of which are facets of a meaningful life. Cooney also addresses postmodernism, arguing that it does not offer real guidance for those seeking a life of significance. Maintaining that some ways of creating meaning are preferable to others, he concludes that it is up to each individual to craft a meaningful life and that this process must take place within a context of giving and receiving.

#### René Girard and Creative Mimesis Thomas

Ryba, 2013-11-21 For half a century René Girard's theories of mimetic desire and scapegoating have captivated the imagination of thinkers and doers in many fields as an incisive look into the human condition, particularly the roots of violence. In a 1993 interview with Rebecca Adams, he highlighted the positive dimensions of mimetic phenomena without expanding on what they might be. Now, two decades later, this groundbreaking book systematically explores the positive side of mimetic theory in the context of the multi-faceted world of creativity. Several authors build on Adams' insight that loving mimesis can be understood as desiring the subjectivity of the other, particularly when the other may be young or wounded. With highly nuanced arguments authors show how mimetic theory can be used to address child and adult development, including the growth

of consciousness and a capacity to handle complexity. Mimetic theory is brought to bear on big questions about creativity in nature, evolutionary development, originality, and religious intrusion into politics.

**Postulates of Perfectibility; Or, Creative Personality** Philip David Bookstaber, 1925

*A Platonic Philosophy of Religion* Daniel A. Dombrowski, 2005-01-01 Explores the process or neoclassical interpretation of Plato's thought on God.

**Philosophy of Creativity** David Lee Miller, 1989  
Philosophy of Creativity is a prolegomenon in the field of philosophical studies of creativity. The book sets forth a cross and multi-cultural point of view, emphasizing points of agreement between seminal thinkers and living traditions over the whole earth. The seven chapters turn about the philosophical and spiritual notion of creativity. Creativity is presented as metaparadigm, or the philosophical way that critiques and transcends paradigms, while interpreting them in light of this novel meta-paradigmatic perspective. This work draws important insights from major philosophical traditions in both the Orient and the Western world such as Buddhism, Taoism, Confucianism, Pragmatism, Existentialism, Phenomenology, and Process Philosophy.

**Creative Experiencing** Charles Hartshorne, 2011-09-01 A vigorous and wide-ranging defense of Hartshorne's "neoclassical metaphysics" of creative freedom.

**A Reflexive Reading of Urban Space** Mona A. Abdelwahab, 2018-02-13 Providing a critique of the

concepts attached to the representation of urban space, this ground-breaking book formulates a new theory of space, which understands the dynamic interrelations between physical and social spaces while tracing the wider urban context. It offers a new tool to approach the reading of these interrelations through reflexive reading strategies that identify singular reading fragments of the different spaces through multiple reader-time-space relations. The strategies proposed in the volume seek to develop an integrative reading of urban space through recognition of the singular (influenced by discourse, institution, etc.); and temporal (influenced by reading perspective in space and time), thereby providing a relational perspective that goes beyond the paradox of place in between social and physical space, identifying each in terms of relationships oscillating between the conceptual, the physical and social content, and the context. In conclusion, the book suggests that space/place can be read through sequential fragments of people, place, context, mind, and author/reader. Operating at different scales between conceptual space and reality, the sequential reading helps the recognition of multiplicity and the dynamics of place as a transformational process without hierarchy or classification.
