But his favorite is the great spruce, with its sturdy trunk and branches that stretch up to the sky. Alec's grandpa planted it as a sapling years and years before Alec was born, and every Christmas, Alec and his grandpa decorate the tree together, weaving tinsel and lights through its branches, making it shine bright. But one day, a few curious men from the nearby city take notice of Alec's glistening great spruce, and ask to take it away for their Christmas celebration. Though it's a huge honor, Alec's heartbroken at the idea of losing his friend. With great courage and creativity, Alec comes up with a plan to save his favorite tree in this joyful holiday tale.

*Build APIs You Won't Hate* Phil Sturgeon, 2015-08-12 API development is becoming increasingly common for server-side developers thanks to the rise of front-end JavaScript frameworks, iPhone applications, and API-centric architectures. It might seem like grabbing stuff from a data source and shoving it out as JSON would be easy, but surviving changes in business logic, database schema updates, new features, or deprecated endpoints can be a nightmare. After finding many of the existing resources for API development to be lacking, Phil learned a lot of things the hard way through years of trial and error. This book aims to condense that experience, taking examples and explanations further than the trivial apples and pears nonsense tutorials often provide. By passing on some best practices and general good advice you can hit the ground running with API development, combined with some horror stories and how they were overcome/avoided/averted. This book will discuss the theory of designing and building APIs in any language or framework, with this theory applied in PHP-based examples.
