From Networks to Netflix Derek Johnson, 2022-07-26 Now in a second edition, this textbook surveys the channels, platforms, and programming through which television distribution operates, with a diverse selection of contributors providing thorough explorations of global media industries in flux. Even as legacy media industries experience significant disruption in the face of streaming and online delivery, the power of the television channel persists. Far from disappearing, television channels have multiplied and adapted to meet the needs of old and new industry players alike. Television viewers now navigate complex choices among broadcast, cable, and streaming services across a host of different devices. From *Networks to Netflix* guides students, instructors, and scholars through that complex and transformed channel landscape to reveal how these industry changes unfold and why they matter. This second edition features new players like Disney+, HBO Max, Crunchyroll, Hotstar, and more, increasing attention to TV services across the world. An ideal resource for students and scholars of media criticism, media theory, and media industries, this book continues to offer a concrete, tangible way to grasp the foundations of television—and television studies—even as they continue to be

rewritten.

Media Management and Artificial Intelligence Alex

Connock,2022-11-18 This cutting-edge textbook examines contemporary media business models in the context of Artificial Intelligence (AI) and digital transformation. AI has dramatically impacted media production and distribution, from recommendation engines to synthetic humans, from video-to-text tools to natural language models. AI is really the change agent of the media industry, answered a natural language generation model when AI was ‘asked’ about the subject of this book. It will open incredible opportunities. This book seeks to explore them. The media is examined through four sections. ‘Principles’ maps business models and the key tools of AI. ‘Platforms’ covers distribution channels in Games, Streamers, Social Networks, Broadcast and Digital Publishing. ‘Producers’ covers the engines of content-making, including Scripted, Entertainment, Factual, Content Marketing, Creators and Music. Finally, ‘Pioneers’ covers emerging sectors of Podcasting, Esports, the Metaverse and other AI-driven developments. Then in each chapter, a standard value creation

model is applied, mapping a single sector through development, production, distribution and monetisation. Diverse case studies are analysed from India, Nigeria, South Korea, South Africa, France, the Netherlands, the US, the UK, Denmark and China – around creative entrepreneurship, revenue models, profit drivers, rights and emerging AI tools. Questions are provided for each case, whilst chapter summaries cement learning. Applied and technology-focused, this text offers core reading for advanced undergraduate and postgraduates studying Media Management – or the relationship between Entertainment, Media and Technology. Online resources include chapter-by-chapter PowerPoint slides and an Instructor's Manual with further exercises and case studies.

Television in the Streaming Era Jean Chalaby,2023-02-28 This ground-breaking study explores transformations in the TV industry under the impact of globalizing forces and digital technologies. Chalaby investigates the making of a digital value chain and the distinct value-adding segments which form the new video ecosystem. He provides a full account of the industry's global shift from the development of TV formats and transnational networks to the emergence of tech giants and streaming platforms. The author takes a deep dive into the infrastructure (communication satellites, subsea cable networks, data centres) and technology (cloud computing, machine learning and artificial intelligence) underpinning this ecosystem through the prism of global value chain theory. The book combines empirical data garnered over 20 years of researching the industry and offers unique insights from television and tech executives.

Global Media Dialogues Lee Artz,2023-07-24 This book, the first of its kind, brings together leading scholars from multiple perspectives in a serious dialogue about continuity and change in

global media production and content. Looking at a wide swath of the world, these authors show the emergence of transnational collaboration in global television and film production across national borders that seem to transcend national cultures and identities. At the same time, traditional class analysis of such phenomena is reframed within the rise of myriad social movements for equality, democracy, human rights, and defense of the environment. What are the effects of media, local or global? Does the West continue to dominate or is cultural imperialism waning? With original chapters written by leading scholars from a variety of disciplines, this book will appeal to students and scholars interested in global media communication, cultural studies, and international political economy.

Latinx TV in the Twenty-First Century Frederick Luis

Aldama, 2022-04-19 Latinx TV in the Twenty-First Century offers an expansive and critical look at contemporary television by and about U.S. Latinx communities. This volume is comprehensive in its coverage while diving into detailed and specific examples as it navigates the complex and ever-changing world of Latinx representation and creation in television. In this volume, editor Frederick Luis Aldama brings together leading experts who show

how Latinx TV is shaped by historical, social, cultural, regional, and global contexts. Contributors address head on harmful stereotypes in Latinx representation while giving key insights to a positive path forward. TV narratives by and about Latinx people exist across all genres. In this century, we see Latinx people in sitcoms, sci-fi, noir, soap operas, rom-coms, food shows, dramas, action-adventure, and more. Latinx people appear in television across all formats, from quick webisodes, to serialized big-arc narratives, to animation and everything in between. The diverse array of contributors to this volume delve into this rich landscape of Latinx TV from 2000 to today, spanning the ever-widening range of genres and platforms. *Latinx TV in the Twenty-First Century* argues that Latinx TV is not just television—it's an entire movement. Digital spaces and streaming platforms today have allowed for Latinx representation on TV that speaks to Latinx people and non-Latinx people alike, bringing rich and varied Latinx cultures into mainstream television and addressing urbanization, immigration, family life, language, politics, gender, sexuality, class, race, and ethnicity. Once heavily underrepresented and harmfully stereotypical, Latinx representation on TV is beginning to give careful nuance to regional, communal, and familial experiences among U.S. Latinx people. This volume

unpacks the negative implications of older representation and celebrates the progress of new representation, recognizing that television has come a long way, but there is still a lot of important work to do for truly diverse and inclusive representation.

Text, Speech and Dialogue Petr Sojka, Ivan Kopecek, Karel Pala, 2003-07-31 The workshop series on Text, Speech and Dialogue originated in 1998 with the 1st TSD1998 held in Brno, Czech Republic. This year's TSD2000, already the third in the series, returns to Brno and to its organizers from the Faculty of Informatics at the Masaryk University. As shown by the ever growing interest in TSD series, this annual workshop developed into the prime meeting of speech and language researchers from both sides of the former Iron Curtain, which provides a unique opportunity to get acquainted with the current activities in all aspects of language communication and to witness the amazing vitality of researchers from the former East Block countries. Thanks need to be extended to all who continue to make the TSD workshop series such a success: 1st, to the authors themselves, without whom TSD2000 would not exist; next, to all organizations that support TSD2000, among them the International Speech Communication Association, the Faculty of Informatics at the

Masaryk University in Brno and the Faculty of Applied Sciences, West Bohemia University in Plzen; ? and last but not least, to the organizers and members of the Program Committee who spent much effort to make TSD2000 success and who reviewed 131 contributions submitted from all corners of the world and accepted 75 out of them for presentation at the workshop. This book is evidence of the success of all involved.

From Telenovelas to Netflix: Transnational, Transverse Television in Latin America Joseph Straubhaar, Melissa Santillana, Vanessa de Macedo Higgins Joyce, Luiz Guilherme Duarte, 2021-12-06 This book is about television in Latin America. Its national and regional industries create most television programming there within genres developed over time in the region. However, part of the programming has always come from the U.S., Europe and elsewhere. With cable, satellite and now streaming TV, that inflow of foreign programming has increased substantially. While many in the audience still prefer national or regional programs for their cultural proximity, an increasing number among the upper-middle and middle classes, particularly the young, are turning to the new foreign services, like Netflix, Amazon and Disney for class distinction, cosmopolitanism or other motives.

Among the television industries, global, regional and national actors are creating a variety of programs and channels (broadcast, pay-TV and streaming) to segment and appeal to different parts of the audience.
