Crime and the Administration of Justice in Buenos Aires, 1785-1853, 2006-01-01 Crime and the Administration of Justice in Buenos Aires, 1785-1853, analyzes the emergence of the criminal justice system in modern Argentina, focusing on the city of Buenos Aires as a case study. It concentrates on the formative period of the postcolonial penal system, from the installation of the second Audiencia (the superior justice tribunal in the viceroyalty of Río de la Plata) in 1785 to the promulgation of the Argentine national constitution in 1853, when a new phase of interregional organization and codification began. Through analysis of criminal cases, Barreneche shows how different interpretations of liberalism, the changing roles of the new police and the military, and the institutionalization of education all contributed to the debate on penal reform during Argentina's transition from colony to state. Only through understanding the historical development of legal and criminal procedures can contemporary social scientists come to grips with the struggle between democracy and authoritarianism in modern Argentina.

Nationalism in the New World Don Harrison Doyle,Marco Antonio Villeda Pamplona,2006 Nationalism in the New World brings together work by scholars from the United States, Canada, Latin America, and Europe to discuss the common problem of how the nations of the Americas grappled with the basic questions of nationalism: Who are we? How do we imagine ourselves as a nation? Debates over the origins and meanings of nationalism have emerged at the forefront of the humanities and social sciences over the past two decades. However, these discussions have been mostly about nations in Europe, the Middle East, Asia, or Africa. In addition, their focus is usually on the violence spawned by ethnic and religious strains of nationalism, which have been largely absent in the Americas. The contributors to this volume Americanize the conversation on nationalism. They ask how the countries of the Americas fit into the larger world of nations and in what ways they present distinctive forms of nationhood. Such questions are particularly important because, as the editors write, the American nations that came into being in the wake of revolutions that shook the Atlantic world beginning in 1776 provided models of what the modern world might become. American nations were among the first nation-states to emerge on the world stage. As former colonies with multiethnic populations, American nations could not logically rest their claim to nationhood on ancient bonds of blood and history. Out of a world of empires and colonies the independent states of the Americas forged new nations based on a varied mix of modern civic ideals instead of primordial myths, on ethnic and religious diversity instead of common descent, and on future hopes rather than ancient roots.

Information Quality in Information Fusion and Decision Making Éloi Bossé,Galina L. Rogova,2019-04-02 This book presents a contemporary view of the role of information quality in information fusion and decision making, and provides a formal foundation and the implementation strategies required for dealing with insufficient information quality in building fusion systems for decision making. Information fusion is the process of gathering, processing, and combining large amounts of information from multiple and diverse sources, including physical sensors to human intelligence reports and social media. That data and information may be unreliable, of low fidelity, insufficient resolution, contradictory, fake and/or redundant. Sources may provide unverified reports obtained from other sources resulting in correlations and biases. The success of the fusion processing depends on how well knowledge produced by the processing chain represents reality, which in turn depends on how adequate data are, how good and adequate are the models used, and how accurate, appropriate or applicable prior and contextual knowledge is. By offering contributions by leading experts, this book provides an unparalleled understanding of the problem of information quality in information fusion and decision-making for researchers and professionals in the field.

The Anthropocene Judgments Project Nicole Rogers,Michelle Maloney,2023-12-01 This book is a collection of speculative judgments that, along with accompanying commentaries, pursue a novel enquiry into how judges might respond to the formidable and planetary-scaled challenges of the Anthropocene. The book's contributors --from Australia, Asia, Europe, and the United Kingdom --take up a range of issues: including multispecies justice, the challenges of intergenerational justice, dimensions of postcolonial justice, the potential contribution of AI platforms to the judgment process, and the future of judging and law in and beyond the Anthropocene. The project takes its inspiration from existing critical judgment projects. It is, however, thoroughly interdisciplinary. In anticipating future scenarios, and designing or adapting legal principles to respond to them, the book's contributors have been assisted by climate scientists with expertise in future modelling; they have benefitted from the experience of fiction writers in future worldbuilding; and they have incorporated elements of the future worlds depicted in various texts of speculative fiction and artworks. The judgments are, of necessity, speculative and hypothetical in their subject matter. Thus, taken together, they constitute a collaborative experiment in creating the inclusive and radical imaginaries of the future common law. The Anthropocene Judgments Project will appeal to critical and sociolegal academics, scholars in the environmental humanities, environmental lawyers, students, and others with interests in the pressing issues of ecology, multispecies justice, climate change, the intersection of AI platforms and the law, and the future of law in the Anthropocene.
