Jason Porterfield

Working as a Tattoo Artist in Your Community Jason Porterfield,2015-07-15 Tattoo artists spend years learning their trade before taking on their first customer. They not only study art and techniques, but they also learn about disease prevention and maintaining sanitary and hygienic conditions. It is only after they pass certification tests and receive a state license that they can begin work. They serve as valuable members of their communities, helping to anchor business districts and bringing customers not only to their own studios but to other shops as well. *Customizing the Body* Clinton Sanders, D Angus Vail, 2008 Originally published in 1989, this ground-breaking ethnographic exploration of tattooing—and the art world surrounding it—covers the history, anthropology and sociology of body modification practices; the occupational experience of the tattooist; the process and social consequences of becoming a tattooed person; and the prospects of serious tattooing becoming an accepted art form. Curiously, despite the greater prevalence of tattoos and body modification in today's society, there is still a stigma of deviance associated with people who get or ink tattoos. Retaining the core of the original book, this revised and expanded edition offers a new preface by the author and a new chapter focusing on the changes that have occurred in the tattoo world. A section on the new scholarly literature that has emerged, as well as the new modes of body modification that have come into vogue are included along with a new gallery of photographs that shows some splendid examples of contemporary tattoo art. A directory of artists' websites invites readers to discover the range of work being done around the world—from “suits” (full body tattoos) to skulls.

Tattooed Skin and Health J. Serup, N. Kluger, W. Bäuml, 2015-03-26 With about 10–20% of the adult population in Europe being tattooed, there is a strong demand for publications discussing the various issues related to tattooed skin and health. Until now, only a few scientific studies on tattooing have been published. This book discusses different aspects of the various medical risks associated with tattoos, such as allergic reactions from red tattoos, papulo-nodular reactions from black tattoos as well as technical and psycho-social complications, in addition to bacterial and viral infections. Further sections are dedicated to the composition of tattoo inks, and a case is made for the urgent introduction of national and international regulations. Distinguished authors, all specialists in their particular fields, have contributed to this publication which provides a comprehensive view of the health implications associated with tattooing. The book covers a broad range of topics that will be of interest to clinicians and nursing staff, toxicologists and regulators as well as laser surgeons who often face the challenge of having to remove tattoos, professional tattooists and producers of tattoo ink.

**Ink for Beginners** Kate Leth, 2015 Thinking of getting your first tattoo? Tattoos are an awesome, rad and powerful way to decorate and celebrate your bod! Kate Leth brings you advice (and a few horror stories) culled from both her own experience getting over 30 tattoos and interviews with a few dozen tattoo artists. Ink for Beginners touches on all sorts of tattoo topics, like choosing designs, booking consultations, aftercare, tipping policies, how to prepare for your appointment, and even where it hurts most to get a tattoo. This comic should help to make your tattoo experience as great as possible.
