Evil in the Mahabharata Meena Arora Nayak, 2018-01-19 Good and evil, loyalty and treachery, faith and doubt, honour and ignominy—the Mahabharata has served as a primer for codes of conduct to generations of Hindus. Over time, the epic has also fascinated those who love a tale well told. In its telling, however, the story has lost much of its richness and nuance, and the characters have become one-dimensional cut-outs—either starkly good or irredeemably evil. In this reinterpretation, Meena Arora Nayak analyses how the values espoused in the Mahabharata came to be distorted into meagre archetypes, creating customary laws that injure society even today.

In Search Of... Rajeev Arora, 2013-03-14 There are several experiences that gradually start looking like pearls, held together by a string that is practically... the untouchable! There are several developments, which can be classed as successes. On the other hand, there are failures, despite all the good will and effort. In the mix of things, it becomes imperative to make peace with... the untouchable! Based on our nature, nurture, and circumstances... we gradually figure out our formula to keep afloat... the Mantra! For many years I have been having a glass of warm water with honey and lemon in the morning, as suggested by many for good health. Generally I am more comfortable in outdoors than indoors. Going for a walk stimulates me at many levels. For me it's all part of... the Mantra! Few days back, I was grating radish. The grater was not the best. It occurred to me that a slightly different design would do better. On a casual visit to the shops that afternoon, I happened to come across a grater, just of the right design! Several events of such precision, often point me to... the cosmic dance! Our world is held together by friction. Every part of our journey from womb to tomb, every step we take, every garment we put on, every note we write... rely on friction! This necessary evil called friction that also gives plenty of headache and heartache, is an integral part of... the cosmic dance! This book is an effort to touch... the untouchable, decipher... the Mantra to help us all participate in the... the cosmic dance!

Proceedings of Ninth International Conference on Wireless Communication and Sensor Networks

Radhakrishna Maringanti,Murlidhar Tiwari,Anish Arora,2014-04-22 Wireless communication and sensor networks would form the backbone to create pervasive and ubiquitous environments that would have profound influence on the society and thus are important to the society. The wireless communication technologies and wireless sensor networks would encompass a wide range of domains such as HW devices such as motes, sensors and associated instrumentation, actuators, transmitters, receivers, antennas, etc., sensor network aspects such as topologies, routing algorithms, integration of heterogeneous network elements and topologies, designing RF devices and systems for energy efficiency and reliability etc. These sensor networks would provide opportunity to continuously and in a distributed manner monitor the environment and generate the necessary warnings and actions. However most of the developments have been demonstrated only in controlled and laboratory environments. So we are yet to see those powerful, ubiquitous applications for the benefit of the society. The conference and consequentially the proceedings would provide opportunity to the researchers to interact with other researchers and share their researches covering all the above areas. The proceedings of the conference thus covers the research work of different authors in the area of wireless sensor networks, wireless communications, devices, tools and techniques for WSN, and applications of wireless sensor networks. This book is beneficial for those researchers who are working in the area of wireless sensor networks, wireless communication, and developing applications of Wireless sensor networks.
