The Sarvodaya Movement Praveena Rajkopal,2019-11-05 This book provides an important case study of how local cultures, religions and spiritualities can enhance development activities, and provide helpful frameworks for contemporary societies facing the pressures of neo-liberalism. It specifically traces how the influential Sri Lankan Sarvodaya Movement has deployed concepts of spirituality-based holistic development to help local communities with post-tsunami reconstruction and redevelopment. Throughout, the author provides a Three-Sphere conceptualisation of holistic sustainable development, focused on Culture, Economics and Power, slightly revising Sarvodaya's Three-Sphere model comprising Spirituality, Economics and Power. The author contends that the success of holistic development, including risk governance, is largely contingent on an awareness of the interdependency of these three spheres, and establishing equitable partnerships between communities, NGOs, INGOs, States and the private sector. Overall, this book argues that religion, spirituality and non-religious worldviews play an important role among other resources concerned with how to survive the pressures of neo-liberalism and environmental risks and crises. The Sarvodaya Movement, which draws on Buddhist concepts of spirituality, is widely acknowledged as an important example of spirituality and community-driven development, and as such, this book will be of interest to scholars of Development and Humanitarian Studies, Religious Studies and South Asian Studies.

Integration of Information Extraction with Machine Learning Techniques for Text Mining A. Christy,S. Prayla Shyry,M.D. Anto Praveena, Text Mining is a convergent field of Data Mining which deals with extracting relevant and useful part of the information from unstructured text documents and storing them in the structured form. The research work on Information Extraction started in 1979, by a Ph.D thesis submitted at Yale University. But, Information Extraction has got its focus only in 1990s by a series of Message Understanding Conferences conducted by US defense group, DARPA. Information Extraction is preferred by researchers because of its ability to extract specific part of the information with its timely delivery to decision makers and end-users. Information Extraction focusses on extracting the entities and facts from technical websites. The technical web pages often exist in the semi-structured form, in which each and every part of the content is stored as a block of information. Existing Supervised and Unsupervised learning algorithms are reviewed and new algorithms are proposed and implemented for extracting facts and entities from technical websites.

Project Falcon Rajaram Balajee,2020-11-29 The concept of Project falcon originated a decade back. As a fan of Rangarajan Sujatha, the author has borrowed his protagonists, Ganesh, and Vasanth for the story. Ganesh and Vasanth find themselves in the midst of a situation beyond their control. As they try to understand what's happening around them and try to wriggle out of the situation, they get entangled more and more, finally discovering something that's extremely controversial. Technology gets the better of human beings and human beings get the better of technology. This is a continuous cycle and one cannot pass judgment on any technology standing at a point in time. The story is a blend of technical inputs, criminal law, and human angle.

A First Course in Linear Models and Design of Experiments N. R. Mohan Madhyastha,S. Ravi,A. S. Praveena,2020-11-13 This textbook presents the basic concepts of linear models, design and analysis of experiments. With the rigorous treatment of topics and provision of detailed proofs, this book aims at bridging the gap between basic and advanced topics of the subject. Pulses A. Manickavasagan,Praveena Thirunathan,2020-05-25 World health authorities recommend people maximize their protein intake through vegetable sources (such as pulses), and reduce

protein intake from animal sources. Increasing vegetable protein intake has been shown to be positively associated with the reduction of both cardiovascular-disease-related mortality and all-cause mortality. Pulse consumption has been shown to improve satiety and metabolism of glucose and lipids, due to their high protein and fiber content, which makes their consumption ideal for preventing and managing obesity. In recent years, there has been increasing demand for pulses and pulse-based products in developed countries. Several large-scale collaborative research projects on pulse products have been initiated by government agencies. Similarly, established multinational food companies have developed pulse product units. Pulses: Processing and Product Development fulfills the need for a comprehensive book on processing and products of pulses. The book addresses a specific pulse with each chapter to meet a wide range of audiences from undergraduate students to consumers.

Here I would like to bring transformation in the scenario of men's feebleness of protecting women it is not women's rule to accept men's inability and ensue to be within the boundaries. Let us take the initiative to protect ourself as we already know that they have given up and accepted the inability. Connections and Complexity Shinu Anna Abraham,Praveena Gullapalli,Teresa P Raczek,Uzma Z Rizvi,2016-06-16 This compilation of original research articles highlight the important cross-regional, cross-chronological, and comparative approaches to political and economic landscapes in ancient South Asia and its neighbors. Focusing on the Indus Valley period and Iron Age India, this volume incorporates new research in South Asia within the broader universe of archaeological scholarship.
