Present Status of Computer Support in Ambulatory Care Peter L. Reichertz, Rolf

Engelbrecht, Ursula Piccolo, 2013-03-13 The Working Group 5 of the International Medical Informatics Association (IMIA) dedicates its work to information systems in primary and ambulatory care. The first conference of this Working Group in Hannover in 1980 produced a review of the state of the art of that time and gave perspectives for future development (Rienhoff, O. and Abrams, M.E. (eds.): *The Computer in the Doctor's Office*, Horth Holland, Amsterdam: 1980). In the meantime, a rapid development has taken place. Therefore it seemed appropriate to hold another working conference which was conducted in Munich, December 2-6, 1985. The goal of this working conference was to review the developments in this field and to critically evaluate the progress achieved so far. The conference addressed general principles in system development and prerequisites for their successful introduction into routine use. Furthermore, the topics of expert systems and new technologies were discussed in the context of their usefulness and usability in ambulatory care systems. As before, it became very clear that actual computer systems to support ambulatory and/or primary care have to meet the conditions of the health care delivery systems, into which they are to be placed.

The Book of Chinese Medicine, Volume 2 Henry H. Sun, Jingyan Meng, Kaijing Yan, 2020-11-17 This second volume offers numerous approaches to using Chinese medicine for the prevention and treatment of various diseases in medical practice. It brings the concepts and theories learned in the first volume and applies them in clinical settings with real patient examples. It goes over the four natures and five flavors of herbal drugs, and covers the different techniques of acupuncture. The book considers how the advancements in modern technology have shaped Traditional Chinese Medicine (TCM), and discusses the revolutionary innovations that are occurring in the Chinese medicine industry today and how they will shape the future.

Big Data Revolution Rob Thomas, Patrick McSharry, 2015-01-05 Exploit the power and potential of Big Data to revolutionize business outcomes Big Data Revolution is a guide to improving performance, making better decisions, and transforming business through the effective use of Big Data. In this collaborative work by an IBM Vice President of Big Data Products and an Oxford Research Fellow, this book presents inside stories that demonstrate the power and potential of Big Data within the business realm. Readers are guided through tried-and-true methodologies for getting more out of data, and using it to the utmost advantage. This book describes the major trends emerging in the field, the pitfalls and triumphs being experienced, and the many considerations surrounding Big Data, all while guiding readers toward better decision making from the perspective of a data scientist. Companies are generating data faster than ever before, and managing that data has become a major challenge. With the right strategy, Big Data can be a powerful tool for creating effective business solutions - but deep understanding is key when applying it to individual business needs. Big Data Revolution provides the insight executives need to incorporate Big Data into a better business strategy, improving outcomes with innovation and efficient use of technology. Examine the major emerging patterns in Big Data Consider the debate surrounding the ethical use of data Recognize patterns and improve personal and organizational performance Make more informed decisions with quantifiable results In an information society, it is becoming increasingly important to make sense of data in an economically viable way. It can drive new revenue streams and give companies a competitive advantage, providing a way forward for businesses navigating an

increasingly complex marketplace. Big Data Revolution provides expert insight on the tool that can revolutionize industries.

Melacak & Menyelamatkan Berbagai Data Ian Candra K., 2013-02-13 Mungkin Anda pernah melihat foto presiden Amerika Serikat sedang berpidato di atas podium. Lantas Anda membayangkan bagaimana seandainya foto sang presiden diganti dengan wajah Anda. Atau Anda pernah melihat sebuah foto atraksi yang luar biasa seperti foto seorang atlet ski yang tengah melompat dengan gagahnya di atas salju dan Anda mengangankan bagaimana jika wajah Anda yang ada di dalam foto itu. Jika hal-hal seperti itu yang menjadi angan-angan Anda, melalui buku ini Anda akan dapat mewujudkannya. Teknik-teknik rekayasa wajah akan dipaparkan secara gamblang dengan tuntunan langkah-langkah yang praktis sehingga akan memandu Anda untuk dapat menciptakan sebuah rekayasa foto yang terkesan realistis dan tidak nampak sebagai sebuah hasil rekayasa. Teknik memindahkan wajah seseorang ke dalam tubuh dari foto orang yang berbeda merupakan topik inti di dalam pembahasan buku ini. Jadi, sekarang Anda jangan cepat berprasangka negatif dahulu atau merasa heran dan terkejut jika foto-foto tokoh idola Anda tiba-tiba muncul di media dengan busana yang kurang pantas, karena bisa jadi itu hanyalah foto hasil rekayasa semata dari orang-orang yang tidak bertanggung jawab dan memiliki niat yang tidak baik. Terdapat delapan latihan yang bisa Anda praktekan untuk memandu Anda belajar membuat rekayasa foto dengan lebih cepat dan mudah. Setelah Anda berhasil membuat sebuah rekayasa foto, kami undang Anda untuk berkunjung ke blog kami di <http://jubilee.ruangkerja.com> *** PERHATIAN! Buku ini tidak untuk disalahgunakan. Crowdsourced Health Elad Yom-Tov, 2016-03-11 How data from our health-related Internet searches can lead to discoveries about diseases and symptoms and help patients deal with diagnoses. Most of us have gone online to search for information about health. What are the symptoms of a migraine? How effective is this drug? Where can I find more resources for cancer patients? Could I have an STD? Am I fat? A Pew survey reports more than 80 percent of American Internet users have logged on to ask questions like these. But what if the digital traces left by our searches could show doctors and medical researchers something new and interesting? What if the data generated by our searches could reveal information about health that would be difficult to gather in other ways? In this book, Elad Yom-Tov argues that Internet data could change the way medical research is done, supplementing traditional tools to provide insights not otherwise available. He describes how studies of Internet searches have, among other things, already helped researchers track to side effects of prescription drugs, to understand the information needs of cancer patients and their families, and to recognize some of the causes of anorexia. Yom-Tov shows that the information collected can benefit humanity without sacrificing individual privacy. He explains why people go to the Internet with health questions; for one thing, it seems to be a safe place to ask anonymously about such matters as obesity, sex, and pregnancy. He describes in detrimental effects of "pro-anorexia" online content; tells how computer scientists can scour search engine data to improve public health by, for example, identifying risk factors for disease and centers of contagion; and tells how analyses of how people deal with upsetting diagnoses help doctors to treat patients and patients to understand their conditions.

Integrated Clinical Orthodontics Vinod Krishnan, Ze'ev Davidovitch, 2012-01-30 Integrated Clinical Orthodontics provides an important new resource on the clinical interactions between the practice of orthodontics and other areas of clinical dentistry and medicine. Having at its heart the paradigm of patient-centred care, the book not only integrates the knowledge, skills, and experience of all the disciplines of dentistry and medicine, but also eases the work of orthodontists in arriving at

an accurate diagnosis and a comprehensive treatment plan. Presented in a highly visual and practical format, Integrated Clinical Orthodontics uses clinical case presentations to illustrate the rationale and application of the integrated approach to a variety of clinical scenarios. Integrated Clinical Orthodontics covers areas of complexity in clinical orthodontics, specifically the role of the orthodontist as a member of a multidisciplinary team. The book outlines and details the management of congenital orofacial deformities, sleep disorders, esthetic smile creation and temporomandibular joint problems, and additionally and importantly includes specific protocols for effective communication with experts in other specialties.

Business and Non-profit Organizations Facing Increased Competition and Growing Customers' Demands Anna Ujwary-Gil, Adam Nalepka, 2018 We are pleased to introduce our 17th

and latest volume from our regular conference: Business and Non-profit Organizations Facing Increased Competitions and Growing Customers' Demands, which contains articles highlighting the problems of contemporary for-profit and non-profit organizations. The added value is the inclusion of multifaceted aspects of an organization's functioning, including the sectoral and industrial view. The diversity of the approach to the problems of organization, management, business and economy becomes a valuable interdisciplinary view of the economic reality that surrounds us. The monograph is divided into four sections. In the first section: Business and non-profit organizations as the objects of research, articles are exposing the area of strategic management, including a museum as a research object, surgical workflow, the performance of cultural organizations, and organizational forms of housing resource management. In addition, this section covers a process-oriented view of management, including process maturity of the organization and process approach to the analysis of creative capital; and mixed project-management methodology. In a separate thread, there are articles related to public university mergers based on an example of two academic case studies; the analysis of scientific excellence as a factor influencing academic involvement; and the nature of competition for non-profit and for-profit organizations. The second section, entitled Modern tools for business and non-profit organization management, opens with an article on design thinking and the TransistorsHead tool used to analyze teams through organizational terms. Other tools used in eye tracking, such as enova365 and Soneta, are presented in an article on the optimization of an IT system. In the context of profiling scientific research, not only in the area of academic entrepreneurship but also in the search for research gaps, bibliometrics is undoubtedly a useful tool discussed in a further article. In another article, an attractive tool for competence analysis is the business model and the construction of the competence assessment method, which could prove to be helpful in assessing the effectiveness of professional careers. Other articles in this section feature the concept of innovation and knowledge management; medical data management based on a precise legal basis; external financing and its impact on the flexibility of enterprises; and a systemic, process and resource approach to port modularity. In the next section: Business and non-profit organizations in a market economy, the primary thematic topic is corporate social responsibility, client capital creation, and social entrepreneurship. We note the greater emphasis on the social aspects of the organization's functioning and on the social economy. The human thread and the so-called ecosystem in business are becoming more and more desirable, and the perspective of business is changing: from a profit-oriented one towards a more societal one. In the last section, entitled Business and non-profit organizations - sectoral and industrial aspects, there are articles discussing the issues of organization in macroeconomic terms. This section opens with an article presenting the structural characteristics of industrial clusters and research streams in this area. Subsequently, we have articles that present: the municipality, from the point of view of the configuration of the network of relations between stakeholders, and their involvement in the creation of smart specialization strategies; the determinants of employment change in the Polish services sector; consumer awareness of the credit market; the transparency of public finances; local food and regional products; consumer behaviour in Ukraine; as well as, trade credit, profitability and leverage in Polish companies. Every year, this monograph is built on articles that present an up-to-date view of the business and geo-economic reality that surrounds us, whose organizations form the backbone of the economy and its sectors. The dynamics of changes are so significant that such studies bring readers closer to current trends and draw the interest of researchers.
