Handbook of Research on Implementing Digital Reality and Interactive Technologies to Achieve Society 5.0 Ugliotti, Francesca Maria,Osello, Anna,2022-06-30 Research on digital reality has been extensive in recent years, covering a wide range of topics and leading to new ways to approach and deal with complex situations. Within the Society 5.0 paradigm, people and machines establish a positive relationship to find solutions for social aspects and problems. This perspective establishes a strong interconnection between physical and virtual space, making the user an active player for better life and society. In these terms, digital systems and virtual and augmented reality technologies enable multi-dimensional scenarios and additional levels of interdisciplinary collaboration to create a highly inclusive communication network and social framework. The Handbook of Research on Implementing Digital Reality and Interactive Technologies to Achieve Society 5.0 provides an overview of methods, processes, and tools adopted to achieve super-smart society needs by exploiting digital reality and interactive technologies. It includes case studies that illustrate applications that place people's quality of life at the center of the digitalization process, accessing and managing different information and data domains. Covering topics such as cultural heritage, interactive learning, and virtual participation, this major reference work is a comprehensive resource for business executives and managers, IT managers, government officials, community leaders, arts and performance organizers, healthcare administrators and professionals, faculty and administrators of both K-12 and higher education, students of higher education, researchers, and academicians.

Mantha: Alchemies of the Cultural Turn Mark K. Warford,2023-09-12 Set against the rich and

troubled tapestry of the West's Greco-Roman inheritance, the Sanskrit root 'manth/-', which roughly translates to "a churn" ('mantha') or "to churn" ('manth') in Sanskrit, serves as a cauldron into which age-old binaries are blended. A mantha of the Greek metaphysical notion of the One and the Many drives explorations of a variety of themes, including the Feminine and the Masculine, Self and Other, East and West, Heroes and Monsters, Olympians and Titans, Creativity and Innovation. Accordingly, the psychoanalytic canon is (re)introduced to a diversity of perspectives, from linguistics and Translation Studies to educational theory and horror fiction. Guided by the 'Opus Contra Culturam', Warford, infusing his background in linguistics, Translation Studies, Spanish, Sociocultural Theory, and Global Humanities, demonstrates the importance of stretching beyond what is known in one's cultural milieu, that "one" taking many forms: the citizen, the student, the professional, the innovator, the scholar, and the infinite intersections of group identifications into which we are susceptible to being siloed. Specific topics include cultural complexes and trauma, Titanism, integrative approaches to human development and learning theory, the Monstrous, as well as creativity and innovation studies.

Human – Computer Systems Interaction: Backgrounds and Applications 2 Zdzisław S. Hippe,Juliusz L. Kulikowski,Tteresa Mroczek,2011-11-23 The main contemporary human-system interaction (H-SI) problems consist in design and/or improvement of the tools for effective exchange of information between individual humans or human groups and technical systems created for humans aiding in reaching their vital goals. This book is a second issue in a series devoted to the novel in H-SI results and contributions reached for the last years by many research groups in European and extra-European countries. The preliminary (usually shortened) versions of the chapters were presented as conference papers at the 3rd International Conference on H-SI held in Rzeszow, Poland, in 2010. A large number of valuable papers selected for publication caused a necessity to publish the book in two volumes. The given, 1st Volume consists of sections devoted to: I. Decision Supporting Systems, II. Distributed Knowledge Bases and WEB Systems and III. Impaired Persons Aiding Systems. The decision supporting systems concern various application areas, like enterprises management, healthcare, agricultural products storage, visual design, planning of sport trainings, etc. Other papers in this area are devoted to general decision supporting methods and tools. In the group of papers concerning knowledge bases and WEB-based systems are some focused on new computer networks technologies, models of malicious network traffic and selected problems of distributed networks resources organization and tagging. The concepts of a distributed virtual museum and of managing the process of intellectual capital creation in this part of the book are also presented. The last part of this volume contains a dozen of papers concerning various concepts and realizations of disabled persons aiding systems. Among them, the systems aimed at aiding visual or motion disability affected persons can be mentioned. The problems of residential infrastructure for ubiquitous health supervision and graphics- and gesture-based interactive children therapy supporting systems design in this volume are also presented.

User Interface Management and Design David A. Duce,M. Rui Gomes,F. Robert A. Hopgood,John R. Lee,2012-12-06 This volume is a record of the Workshop on User Interface Management Systems and Environments held at INESC, Lisbon, Portugal, between 4 and 6 June 1990. The main impetus for the workshop came from the Graphics and Interaction in ESPRIT Technical Interest Group of the European Community ESPRIT Programme. The Graphics and Interac tion in ESPRIT Technical Interest Group arose from a meeting of researchers held in Brussels in May 1988, which identified a number of technical areas of common interest across a significant number of ESPRIT I and ESPRIT II projects. It was recognized that there was a need to share information on such activities between projects, to disseminate results from the projects to the world at large, and for projects to be aware of related activities elsewhere in the world. The need for a Technical Interest Group was confirmed at a meeting held during ESPRIT Technical Week in November 1989, attended by over 50 representatives from ESPRIT projects and the Commission of the European Communities. Information exchange sessions were organized during the EUROGRAPHICS '89 confer ence, with the intention of disseminating information from ESPRIT projects to the wider research and development community, both in Europe and beyond.

Universities in the Networked Society Eugenia Smyrnova-Trybulska,Piet Kommers,Nataliia Morze,Josef Malach,2019-05-21 This book presents research on the effects and effectiveness of ICT applications in lifelong learning in relation to digital competences of educators. It sketches recent and future evolutions in higher education, explores whether universities have adjusted policies and business models in line with the rapid development of ICT technologies, and analyses whether the adjustments made are merely cosmetic or truly future-proof. The book specifically deals with such topics as digital competencies of teaching staff, the development and implementation of MOOCs and other E-learning tools, virtual classrooms, online tutoring, and collaborative learning. It presents case studies of innovative master's programmes, projects and methods, and processes of standardization and validation used in various countries as illustrations. The book explains the rapid transition of the knowledge society to the society of global competence and shows the necessity of an active implementation of innovative forms and effective methods of education, and above all, distance learning at all levels of education.
