Enablers of Organisational Learning, Knowledge Management, and Innovation Preethi Kesavan,2020-11-20 This book establishes constructivist, interpretivist, and linguistic approaches based on conventions about the nature of qualitative and text data, the author's influence on text interpretation, and the validity checks used to justify text interpretations. Vast quantities of text and qualitative data in organizations often go unexplored. Text analytics outlined in this book allow readers to understand the process of converting unstructured text data into meaningful data for analysis in order to measure employee opinions, feedback, and reviews through sentiment analysis to support fact-based decision making. The methods involve using NVivo and RapidMiner software to perform lexical analysis, categorization, clustering, pattern recognition, tagging, annotation, memo creation, information extraction, association analysis, and visualization. The methodological approach in the book uses innovation theory as a sensitizing concept to lay the foundation for the analysis of research data, suggesting approaches for empirical exploration of organizational learning, knowledge management, and innovation practices amongst geographically dispersed individuals and team members. Based on data obtained from a private educational

organization that has offices dispersed across Asia through focus group discussions and interviews on these topics, the author highlights the need for integrating organizational learning, knowledge management, and innovation to improve organizational performance, exploring perspectives on collective relationships and networks, organizational characteristics and structures, and tacit and overt values which influence such innovation initiatives. In the process, the author puts forward a new theory which is built on three themes: relationship and networks, knowledge sharing mechanisms, and the role of social cognitive schema that facilitate emergent learning, knowledge management, and innovation.

Billion Dollar Brand Club Lawrence Ingrassia, 2020-01-28 A leading business journalist takes us inside a business revolution: the upstart brands taking on the empires that long dominated the trillion-dollar consumer economy. Dollar Shave Club and its hilarious marketing. Casper mattresses popping out of a box. Third Love's lingerie designed specifically for each woman's body. Warby Parker mailing you five pairs of glasses to choose from. You've seen their ads. You (or someone you know) use their products. Each may appear, in isolation, as a rare David with the bravado to confront a Goliath, but taken together they represent a seismic shift in a business model that has lasted more than a century. As Lawrence Ingrassia--former business and economics editor and deputy managing editor at the New York Times--shows in this timely and eye-opening book, a growing number of digital entrepreneurs have found new and creative ways to crack the code on the bonanza of physical goods that move through our lives every day. They have discovered that manufacturing, marketing, logistics, and customer service have all been flattened—where there were once walls that protected big brands like Gillette, Sealy, Victoria's Secret, or Lenscrafters, savvy and hungry innovators now can compete on price, value, quality, speed, convenience, and service. Billion Dollar Brand Club reveals the world of the entrepreneurs, venture capitalists, and corporate behemoths battling over this terrain. And what fun it is. It's a massive, high-stakes business saga animated by the personalities, flashes of insight, and stories behind the stuff we use every day.

The Purple Island and Anatomy in Early Seventeenth-century Literature, Philosophy, and Theology Peter Mitchell, 2007 Sets out to reconstruct and analyze the rationality of Phineas Fletcher's use of figurality in *The Purple Island* (1633) - a poetic allegory of human anatomy. This book demonstrates that the

analogies and metaphors of literary works share coherence and consistency with anatomy textbooks.

MARKETING LESSONS Makarand Upadhyaya ,Binod Mishra,,Saveeta Pawar,2021-05-29 Solving a marketing case study doesn't only mean understanding one company. You need to focus on the entire market associated with that company. Without a market, the company cannot have a business to focus on. And that's why companies create market segments to categorize where the business would be more successful. Why do companies make it to the top ranks? Because of the stronger foundation and thorough understanding of the market. When you choose a case to study, you choose a whole bunch of related cases in it. As mentioned in the first chapter, there are six ways to write a case study. Your objective should be clear and your research should be focused on the specified factors of the companies. Marketing case studies are different. Your focus is not only on the specifications of the case but rather on the promotional and marketing strategies applied by the case to gain recognition. Today, the market has changed a lot, companies are evolving, and naturally, the marketing strategies are changing with time. Social media is making more impact than television or news marketing. However, traditional marketing ways are still alive and some companies are still using them. For example, Casper uses banners and posters in public areas yet plans social media campaigns. Spotify uses television ads in some countries to target different sets of audiences.

Purple Solutions Daniel Sem,2020-07 America spends more than any other developed country on

healthcare, and yet does not provide better health outcomes. Why is healthcare so expensive in America, and what is the solution to this out-of-control cost curve? Republicans and Democrats can't agree, and yet rational compromise is desperately needed. Perhaps the best solution to better healthcare in America lies between all this political hyperbole. In *Purple Solutions*, a collection of 20 experts have come together to share their thoughts and expertise on how to reform healthcare in America. Expert contributors include the former president of the AMA, policy and think tank leaders, healthcare executives, entrepreneurs looking to disrupt the current medical industrial complex, politicians, payers, providers and legal experts. The solution is in our hands as consumers and voters, not in the hands of big government or corporate medicine. Viable bipartisan solutions to healthcare reform are presented - we just need to change our mindset, and then convince our elected officials to compromise and work towards giving us better healthcare in America.

Design of Innovation Processes Darrell Velegol, 2023-08-25 Design of Innovation Processes: Flow from Idea to Market Launch with Higher Speed and Value, Time after Time introduces the concept of seeing innovation as a type of process manufacturing operation and offers a coherent set of principles that will accelerate innovation in the chemical processing industries. The book provides actionable practices for innovating chemically related products and services faster, and with higher value. The author shows that by coordinating an Integrated Innovation Team (IIT) consisting of R&D, marketing, manufacturing, regulatory, toxicology, analytical, legal, finance, VP-level leadership, sustainability, and other functions, it's possible to increase innovation throughput. The author, Dr. Darrell Velegol, Distinguished Professor of Chemical Engineering at Penn State University, sees ineffective innovation processes as the reason why chemical process industries are growing less than industries like digitech, hence he provides valuable information in this updated resource. Explains, in detail, how to form Integrated Innovation Teams (IIT) Helps identify bottlenecks where innovation processes might be stalling out Suggests valuable questions and multiple hypotheses (VQs and MHs) that help users ask clear questions and test against clearly stated hypotheses

Science, Technology and Innovation Policies for Development Gustavo Crespi, Gabriela

Dutrénit, 2014-04-11 This book examines the implementation of science, technology and innovation (STI) policy in eight Latin American countries and the different paths these policies have taken. It provides empirical evidence to examine the extent to which STI policies are contributing to the development of the region, as well as to the solution of market failures and the stimulus of the region's innovation systems. Since the pioneering work of Solow (1957), it has been recognized that innovation is critical for economic growth both in developed and in less-developed countries. Unfortunately Latin America lags behind world trends, and although over the last 20 years the region has established a more stable and certain

macroeconomic regime, it is also clear that these changes have not been enough to trigger a process of innovation and productivity to catch-up. Against this rather grim scenario there is some optimism emerging throughout the region. After many years of inaction the region has begun to invest in science, technology and engineering once again. Furthermore, after many changes in innovation policy frameworks, there is now an emerging consensus on the need for a solution to coordination failures that hinder the interaction between supply and demand. Offering an informative and analytic insight into STI policymaking within Latin America, this book can be used by students, researchers and practitioners who are interested in the design and implementation of innovation policies. This book also intends to encourage discussion and collaboration amongst current policy makers within the region.

Renewable Energy: Problems and Prospects in Coachella Valley, California James B. Pick, 2017-02-07
The book analyzes the problems and potential of renewable energy development for the Coachella Valley of California and provides a useful case study for renewable energy feasibility assessments for other areas. A conceptual model, Integrated Policy Assessment Theory for Renewable Energy, is given and justified for renewable energy development in the Valley. Further, Central Place Theory, well known in urban geography, is discussed and it is seen to be very relevant to the understanding the Coachella Valley's city sizes and renewable energy markets, compared to the greater Los Angeles region. The book's research methods include geospatial mapping and analysis and interviews leaders in small innovative firms, government agencies, and nonprofits. The many findings of the book include evaluation of how the Valley's socioeconomic and transportation features influence renewable energy development, the scope of markets for solar and wind energy in the Valley, spatial confluences of renewable energy facilities with other features, and the future potential of ground-source heat pumps. Benchmark comparison of the Coachella Valley is done with two leading wind and solar regions elsewhere in the country, to assess the Valley's evolution and opportunities in renewable energy. The book concludes by evaluating the prospects

and problems for the growth of renewable entrepreneurship, manufacturing, assembly, and operations in Coachella Valley. This leads to policy recommendations grounded in the book's research findings, which are intended for use by governments, businesses, and nonprofits. The hope is that many of the developmental experiences from the Coachella Valley will be helpful not only within the Valley but to other communities nationwide and worldwide.
