Easy to understand Zi Wei Dou Shu ALEX ALPHA - CHU NHAT HUY, 2023-07-07 This book is primarily intended for looking up Zi Wei Dou Shu terms by users who do not know about ZWDS and beginners rather than a ZWDS chart reading guide book. However, if you have a grasp of the book, you will naturally know how to read a ZWDS chart. It is because the book helps you understand each brick and general structure of a house. Once you have a solid understanding, you can naturally build the house. All learning subjects have static and dynamic aspects. The static part is temporarily acquired by the learner, usually consisting of prerequisites and conceptual definitions. The static part is inherited from previous scholars and classic texts. The dynamic part is the result of the user's experience and the consolidation of knowledge. There are exceptional users who have the ability to revisit and upgrade the static part, such as Albert Einstein. But for most of us, when we first learn, we have to absorb the classical knowledge first and then apply and transform it later. Within the framework of this book, the terms are only explained in the most basic way to give you an idea and visualization, rather than providing complete and perfect explanations.

Bioinformatics of Non-Coding RNAs with Applications to Biomedicine: Recent Advances and Open Challenges Carlo Maria Croce,Alfredo Ferro,Alessandro Laganà,2017-01-27 The recent discovery of small and long non-coding RNAs (ncRNAs) has represented a major breakthrough in the life sciences. These molecules add a new layer of complexity to biological processes and pathways by revealing a sophisticated and dynamic interconnected system whose structure is just beginning to be uncovered. Genetic and epigenetic aberrations affecting ncRNA gene sequences and their expression have been linked to a variety of pathological conditions, including cancer, cardiovascular and neurological diseases. Latest advances in the development of high throughput analysis techniques may help to shed light on the complex regulatory mechanisms in which ncRNA molecules are involved. Bioinformatics tools constitute a unique and essential resource for non-coding RNA studies, providing a powerful technology to organize, integrate and analyze the huge amount of data produced daily by wet biology experiments in order to discover patterns, identify

relationships among heterogeneous biological elements and formulate functional hypotheses. This Research Topic reviews current knowledge, introduces novel methods, and discusses open challenges of this exciting and innovative field in connection with the most important biomedical applications. It consists of four reviews and six original research and methods articles, spanning the full scope of the Research Topic.

From the Khitans to the Jurchens & Mongols Hong Yuan,2022-11-14 From the Khitans to the Jurchens

& Mongols, A History of Barbarians in Triangle Wars & Quartet Conflicts is the third book of The Scourge of God Tetralogy. This is a book with comprehensive writeup of the barbarians' history spanning more than one thousand years, from before the anno domini eras and inclusive of the expulsion of the Mongols from China. The subtitle about the barbarians in triangle wars & quartet conflicts is self-explanatory for the historical environment of different groups of barbarians successively rising up on the steppes to overpower the former with more savagery. This third book, while carrying a title with emphasis on the Khitans, the Jurchens and Mongols, also covered the Hsiung-nu (Huns), Hsien-pi (Xianbei), Tavghach (Tuoba), Juan-juan (Ruruans), Tu-chueh (Turks), Uygurs (Huihe), Kirghiz, Tibetans, Tanguts and southern barbarians. This book, being not merely about the barbarians, chronicled, without omission, an annalistic history of China's dynasties including the Sui and Tang dynasties, the Five Dynasties, and the two Soong dynasties, with the interwoven theme of a civilization's good fight against barbarism. There are many unique and groundbreaking contents, such as collation of the missing one-year history of the Mongols' Central Asia campaigns and restitution of the unheard-of Mongol campaign in North Africa. This kind of discoveries is similar to this author's trailblazing work done in other areas of sinology like rectifying the Huns' war with the first Han dynasty emperor to 201 B.C. and correcting one year error in the Zhou dynasty's interregnum (841-828 B.C. per Shi-ji/840-827 per Zhang Wenyu) in the duology The Sinitic Civilization.
