China's Capital Markets Yong Zhen, 2013-10-17 Capital markets in China include stock, bond, futures and other derivatives, as well as the private equity market. China's Capital Markets is the first book to systematically study China's capital markets, examining its evolution, policies, reforms, current situation and challenges. Following an introduction to China's capital markets and economic growth, the book moves on to cover further capital markets in China, including: the banking system, mergers and acquisitions, and valuation adjustment mechanisms, before concluding with a discussion of the opening up and internationalization of China's capital markets. Provides an overall picture of China's capital markets including: policy analysis; case studies; investor strategies and behaviours; and suggestions for success in the markets Offers diverse perspectives, using rich data and analysis This is the first book to systematically study China's capital markets

Zhongguancun Model: Driving the Dual Engines of Science & Technology and Capital Xiaoying Dong, Yanni Hu, Weidong Yin, Estela Kuo, 2018-11-03 This book presents for the first time a detailed and comprehensive interpretation of Zhongguancun, China's first national self-dependent innovation demonstration zone. Explored in the book are examples of world-class, leading enterprises in fields, such as the Internet, big data, artificial intelligence, green and low-carbon, modern supply chain and high-end service. According to some data, the rate of contribution to the economic increase of Beijing made by Zhongguancun rose to 36.8% in 2015 from 17.9% in 2010. More specifically, in 2015, nearly 40% of the economic increase in Beijing was contributed by Zhongguancun Science Park. By 2017, Zhongguancun fostered 650 gazelle enterprises and 70 unicorn

companies. The book also uniquely provides readers with a panoramic interpretation of the environment for innovation and entrepreneurship in Zhongguancun. It is mainly divided into three parts: History of Zhongguancun, Data of Zhongguancun, Cases of Zhongguancun and Policies of Zhongguancun. Through the depiction of history, data, cases and policy, this book clarifies that in most cases, enterprises in Zhongguancun become successes by following such a road characterized by starting from scratch and by relying on science and technology innovation and expanding from small to big by virtue of the capital market. “Zhongguancun Model: Driving the Dual Engines of Science & Technology and Capital” deepens the reader’s understanding of the new economy development in China and is essential reading for business/management researchers and practitioners, economists, IT specialists, and IT policy makers around the world.

Betting on China Robert W. Koepp, 2012-06-13 Focusing on three types of related forms of high-risk equity finance currently in play in China and featuring case studies from which the author draws powerful lessons, this controversial book discusses the ways China’s emerging financing models are outperforming the West and what this means for the future.

The Party Line Doug Young, 2012-11-05 The first in-depth, authoritative discussion of the role of the press in China and the way the Chinese government uses the media to shape public opinion China’s 1.3 billion population may make the country the world’s largest, but the vast majority of Chinese share remarkably similar views on these and a wide array of other issues, thanks to the unified message they get from tightly controlled state-run media. Official views are formed at the top in organizations like the Xinhua News

Agency and China Central Television and allowed to trickle down to regional and local media, giving the appearance of many voices with a single message that is reinforced at every level. As a result, the Chinese are remarkably like-minded on a wide range of issues both domestic and foreign. Takes readers beyond China's economic miracle to show how the nation's massive state-run media complex not only influences public opinion but creates it Explores an array of issues, from Tibet and Taiwan to the environment and US trade relations, as seen through the lens of the Xinhua News Agency Tells the story of the official Xinhua News Agency along with its history and reporting over the years, as the foundation for telling the story

The Sales Acceleration Formula Mark Roberge, 2015-02-24 Use data, technology, and inbound selling to build a remarkable team and accelerate sales The Sales Acceleration Formula provides a scalable, predictable approach to growing revenue and building a winning sales team. Everyone wants to build the next \$100 million business and author Mark Roberge has actually done it using a unique methodology that he shares with his readers. As an MIT alum with an engineering background, Roberge challenged the conventional methods of scaling sales utilizing the metrics-driven, process-oriented lens through which he was trained to see the world. In this book, he reveals his formulas for success. Readers will learn how to apply data,

technology, and inbound selling to every aspect of accelerating sales, including hiring, training, managing, and generating demand. As SVP of Worldwide Sales and Services for software company HubSpot, Mark led hundreds of his employees to the acquisition and retention of the company's first 10,000 customers across more than 60 countries. This book outlines his approach and provides an action plan for others to replicate his success, including the following key elements: Hire the same successful salesperson every time — The Sales Hiring Formula Train every salesperson in the same manner — The Sales Training Formula Hold salespeople accountable to the same sales process — The Sales Management Formula Provide salespeople with the same quality and quantity of leads every month — The Demand Generation Formula Leverage technology to enable better buying for customers and faster selling for salespeople Business owners, sales executives, and investors are all looking to turn their brilliant ideas into the next \$100 million revenue business. Often, the biggest challenge they face is the task of scaling sales. They crave a blueprint for success, but fail to find it because sales has traditionally been referred to as an art form, rather than a science. You can't major in sales in college. Many people question whether sales can even be taught. Executives and entrepreneurs are often left feeling helpless and hopeless. The Sales Acceleration Formula completely alters this paradigm. In today's digital world, in which every action is logged and masses of data sit at our fingertips, building a sales team no longer needs to be an art form. There is a process. Sales can be predictable. A formula does exist.

Competition Law in India T. Ramappa,2014 India, till 2002, did not have a law dealing specifically with anti-trust issues. It was in this context that a separate law dealing with competition and antitrust issues was considered necessary and the Competition Act, 2002, was passed. Enacted to fulfil India's obligations under the WTO agreements, the Act replaced the then existing Monopolies and Restrictive Trade Practices Act, 1969 (MRTP Act) which was considered inadequate and archaic for the purpose of meeting the objectives of competition policy. This substantially revised edition discusses the Competition Act, 2002, and subsequent amendments to it, in 2007 and 2009. Following the 2007 amendment, the Competition Commission became a market regulator and the Competition Appellate Tribunal was established. The 2009 amendment provided for a mechanism to dispose of the cases pending before the MRTP Commission. The book makes a detailed study of key issues including anti-competitive agreements, abuse of dominant position, and combinations (acquisitions and mergers). It further analyses the roles of authorities such as the Competition Commission of India, the Director-General, and the Competition Appellate Tribunal in enforcing the provisions of the Act. The book also undertakes a comparative study of competition law in the US, UK, and EU with

emphasis on important judgments.

On Startups: Advice and Insights for Entrepreneurs Dharmesh Shah, 2012-12-09 Note from the Author Hi, my name is Dharmesh, and I'm a startup addict. And, chances are, if you're reading this, you have at least a mild obsession as well. This book is based on content from the OnStartups.com blog. The story behind how the blog got started is sort of interesting—but before I tell you that story, it'll help to understand my earlier story. As a professional programmer, I used to work in a reasonably fun job doing what I liked to do (write code). Eventually, I got a little frustrated with it all, so at the ripe old age of 24, I started my first software company. It did pretty well. It was on the Inc. 500 list of fastest growing companies three times. It reached millions of dollars of sales and was ultimately acquired. I ran that first company for over 10 years working the typical startup hours. When I sold that company, I went back to school to get a master's degree at MIT. I've always enjoyed academics, and I figured this would be a nice “soft landing” and give me some time to figure out what I wanted to do with my life. As part of my degree requirements, I had to write a graduate thesis. I titled my thesis “On Startups: Patterns and Practices of Contemporary Software Entrepreneurs.” And, as part of that thesis work, I wanted to get some feedback from some entrepreneurs. So, I figured I'd start a blog. I took the first two words of the thesis title, “On Startups,” discovered that the domain name OnStartups.com was available, and was then off to the races. The blog was launched on November 5, 2005. Since then, the blog and associated community have grown quite large. Across Facebook, LinkedIn, and email subscribers, there are over 300,000 people in the OnStartups.com audience. This book is a collection of some of the best articles from over 7 years of OnStartups.com. The articles have been

topically organized and edited. I hope you enjoy them.

Competition Law Today Vinod Dhall, 2019-02-28 Competition law has witnessed phenomenal growth in recent years, especially since the early 1990s. As an increasing number of countries have undertaken economic reforms and embraced the market economy, many of them have introduced competition law to maintain competition in their markets. With the growing integration of the global economy, any anti-competitive activity can have effects across national borders. Competition law has, therefore, become an important part of international trade dialogue. Cooperation on competition issues, therefore, figures in an increasing number of bilateral or regional trade agreements. The book provides an overview of the competition law regime with particular focus on India. It broadly covers the history, objectives, and substantive provisions of law, its relationship with regulated sectors of the market, the economics of law, its international dimension, and competition law in developing countries. The second edition provides an updated account of law and incorporates changes that have taken place since the publication of the first edition. It includes two new chapters: Reviewing Competition Regime in Pakistan and Merger Control Regime under the Competition Law in India.

The Streets Love No One R. L., 2007-05 The street love no one is the hard-hitting debut novel from RL with more twists and turns than a high-speed roller-coaster ride. The story takes you through the under-ground world of a drug kingpin, determined to do anything to keep his empire on track, then to the mean back streets of DC where unrequited love and betrayal line the streets. Then to the inside world of the Russian mob and a case of stolen diamonds, hired killers, double cross and intrigue that would leave you breathless.

Inflation-Linked Products Brice Benaben,2005-01-01 This new, multi-author book presents the global phenomenon of inflation-linked products. You will benefit from the experience of 24 industry experts who explain the surge of interest in inflation-linked government bonds and the full range of securities and derivatives that have been created to meet the growing demand from pension funds and other investors.

Imperial Inquisitions Steven H. Rutledge,2002-01-04 Delatores (political informants) and accusatores (malicious prosecutors) were a major part of life in imperial Rome. Contemporary sources depict them as cruel and heartless mercenaries, who bore the main responsibility for institutionalising and enforcing the 'tyranny' of the infamous rulers of the early empire, such as Nero, Caligula and Domitian. Stephen Rutledge's study examines the evidence to ask if this is a fair portrayal. Beginning with a detailed examination of the social and political status of known informants and prosecutors, he goes on to investigate their activities - as well as the rewards they could expect. The main areas covered are: * checking government corruption and enforcing certain classes of legislation * blocking opposition and resistance to the emperor in the Senate * acting as a partisan player in factional strife in the imperial family * protecting the emperor against conspiracy. The book includes a comprehensive guide to every known political informant under the early empire, with their name, all the relevant primary and secondary sources, and an individual biography.
