Kingdoms in Peril, Volume 3 Olivia Milburn,Feng Menglong,2023-10-17 Translated in full for the first time, this third volume immerses readers in the power and drama of the electrifying classic Chinese novel. The three great southern states of Chu, Wu, and Yue are locked in conflict, and their kings feel a hatred for each other that transcends all bounds. Cruel humiliations are imposed on the vanquished each time a battle is lost, while vicious scheming and internecine manipulation destroy many lives. The balance of power is threatened--but there can only be one victor. One of the great works of Chinese literature, Kingdoms in Peril is an epic historical novel charting the five hundred years leading to the unification of the country in 221 B.C.E. under the rule of the legendary First Emperor. Writing some fourteen hundred years later, the Ming-era author Feng Menglong drew on a vast trove of literary and historical documents to compose a gripping narrative account of how China was forged. Detailing the stories of unforgettable characters who defined and shaped the times in which they lived, the complete edition of Kingdoms in Peril is a vital resource for those seeking a comprehensive overview of China's ancient past and the political machinations that led to its unification. There are many historical works that provide an account of some of these events, but none are as thrilling and breathtakingly memorable as Kingdoms in Peril.

Principles and Applications of RELAX: A Robust and Universal Estimator Renbiao Wu,Qiongqiong Jia,Lei Yang,Qing Feng,2019-03-27 The multiple signal demixing and parameter estimation problems that result from the impacts of

background noise and interference are issues that are frequently encountered in the fields of radar, sonar, communications, and navigation. Research in the signal processing and control fields has always focused on improving the estimation performance of parameter estimation methods at low SNR and maintaining the robustness of estimations in the presence of model errors. This book presents a universal and robust relaxation estimation method (RELAX), and introduces its basic principles and applications in the fields of classical line spectrum estimation, time of delay estimation, DOA estimation, and radar target imaging. This information is explained comprehensively and in great detail, and uses metaphors pertaining to romantic relationships to visualize the basic problems of parameter estimation, the basic principles of the five types of classical parameter estimation methods, and the relationships between these principles. The book serves as a reference for scientists and technologists in the fields of signal processing and control, while also providing relevant information for graduate students in the related fields.

Zuo Tradition / Zuozhuan ,2017-05-01 Zuo Tradition (Zuozhuan; sometimes called The Zuo Commentary) is China's first great work of history. It consists of two interwoven texts - the Spring and Autumn Annals (Chunqiu, a terse annalistic record) and a vast web of narratives and speeches that add context and interpretation to the Annals. Completed by about 300 BCE, it is the longest and one of the most difficult texts surviving from pre-imperial times. It has been as important to the foundation and preservation of Chinese culture as the historical books of the Hebrew Bible have been to the Jewish and Christian traditions. It has shaped notions of history, justice, and the significance of human action in the Chinese tradition perhaps more so than any comparable work of Latin or Greek historiography has done to Western civilization. This translation, accompanied by the original text, an introduction, and annotations, will finally make Zuozhuan accessible to all.
