The Fate of AI Society Kenneth James Hamer-Hodges, 2023-09-25 Hackers who exploit binary computers become expert cybercriminals. A vicious cycle of undetected attacks by criminal gangs, spies, and foreign enemies fuels skilled staff shortages and escalating costs. Ken Hamer-Hodges, explains why outdated computers cannot stop malware and how democracy is undermined by corrupt dictators. Digital convergence subverts yesterday's binary computer, allowing advanced malware, pervasive cameras, misinformation, AI, and deep-fakes to destroy our culture and civilization. His inspiring examples explain the perfection of computer science that all can grasp. How malware thrives and why operating systems lead to Orwellian dictatorship. To prevent catastrophe computer

hardware must catch up with software progress, preventing malware and stopping AI breakout. He explains how to transition to a well engineered, crime free, global cybersociety. How machine code achieves Alonzo Church's vision of networked function abstractions that avoid disaster by accelerating scientific progress. Plotting the path for radical improvement is vital for civilization to flourish as democratically controlled, AI-empowered, global cyber societies. Ken shows how science drives high performance with high reliability for independent applications needed in a world run by superhuman software. Join the author as he explores the fix to computer science. He shows how nations can thrive in a world run by dubious software, governed by superhuman AI, working as functional democracies kept safe from criminals, spies, and dictators.

Capital Punishment: New Perspectives Peter Hodgkinson,2016-04-08 This collection asks questions about the received wisdom of the debate about capital punishment. Woven through the book, questions are asked of, and remedies proposed for, a raft of issues identified as having been overlooked in the traditional discourse. It provides a long overdue review of the disparate groups and strategies that lay claim to abolitionism. The authors argue that capital litigators should use their skills challenging the abuses not just of process, but of the conditions in which the condemned await their fate, namely prison conditions, education, leisure, visits, medical services, etc. In the aftermath of successful constitutional challenges it is the beneficiaries (arguably those who are considered successes, having been 'saved' from the death penalty and now serving living death penalties of one

sort or another) who are suffering the cruel and inhumane alternative. Part I of the book offers a selection of diverse, nuanced examinations of death penalty phenomena, scrutinizing complexities frequently omitted from the narrative of academics and activists. It offers a challenging and comprehensive analysis of issues critical to the abolition debate. Part II offers examinations of countries usually absent from academic analysis to provide an understanding of the status of the debate locally, with opportunities for wider application.

QueenSpotting Hilary Kearney,2019-04-30 At the heart of every bee hive is a queen bee. Since her well-being is linked to the well-being of the entire colony, the ability to find her among the residents of the hive is an essential beekeeping skill. In QueenSpotting, experienced beekeeper and professional “swarm catcher” Hilary Kearney challenges readers to “spot the queen” with 48 fold-out visual puzzles — vivid up-close photos of the queen hidden among her many subjects. QueenSpotting celebrates the unique, fascinating life of the queen bee chronicles of royal hive happenings such as The Virgin Death Match, The Nuptial Flight — when the queen mates with a cloud of male drones high in the air — and the dramatic Exodus of the Swarm from the hive. Readers will thrill at Kearney’s adventures in capturing these swarms from the strange places they settle, including a Jet Ski, a couch, a speed boat, and an owl’s nesting box. Fascinating, fun, and instructive, backyard beekeepers and nature lovers alike will find reason to return to the pages again and again.
