Reconfigurable Manufacturing Systems and Transformable Factories Anatoli I. Dashchenko,2007-06-08 Dear reader! In your hand you have the second book from the series “XXI Century Technologies.” The first book under the title “Manufacturing Technologies for Machines of the Future” was published by “Springer” in 2003. This book is aimed at solving one of the basic problems in the development of modern machine-building – working out of technologies and manufacturing equipment which would promote the continuous development and improvement of the final product design, rapidly “adaptable” to the requirements of the market as for the quantity, quality, and variety of products manufactured with the lowest cost and minimum time and labor of the product process. In this book the problems of theory and practice of development in the reconfigurable manufacturing systems and transformable factories for various machine-building branches with a focus on automotive industry are discussed. The problems concerning the development of a new class of production systems which in comparison to the flexible manufacturing systems are composed of a far less quantity of machine-tools (reduced cost of production) are discussed. In comparison to the conventional automated lines (dedicated systems) they make it possible to rapidly transform the equipment for new products manufacturing. The book has some advantages concerning the art of scientific ideas and the presentation of developments.

Modernization of the Chinese PLA: From Massed Militia to Force Projection Lt Gen JS Bajwa,

Confrontation Nicholas van der Bijl,2014-05-19 For over four years in the Swinging Sixties the armed forces of the UK were engaged in a little publicized but crucial jungle war against communist aggressive on the vast island of Borneo.At any one time up to 50,000 troops (half of the Army's strength today) were deployed along a 1,000 mile front. Their enemy were the communist led Indonesians whose leaders were determined to seize the states of Sarawak, Sabah and the oil rich Brunei, all of whom for their part wished to maintain their Commonwealth links. The catalyst for the war was the 1962 uprising in Brunei which was quickly crushed by the bold intervention of British army units.The arrival of Major General Walter Walker, himself a controversial figure, gave the subsequent campaign a clear direction. Indonesian incursions were rigorously defended and ruthlessly pursued. Top Secret Claret operations took the fight to the enemy with cross border operations initially using Special Forces and later with Chindit-style long range patrols. The outcome was a text book military victory thus avoiding a British Vietnam debacle.
