Digital Logic Design Guy Even, Moti Medina, 2012-10-08 This textbook, based on the author's fifteen years of teaching, is a complete teaching tool for turning students into logic designers in one semester. Each chapter describes new concepts, giving extensive applications and examples. Assuming no prior knowledge of discrete mathematics, the authors introduce all background in propositional logic, asymptotics, graphs, hardware and electronics. Important features of the presentation are:

- All material is presented in full detail. Every designed circuit is formally specified and implemented, the correctness of the implementation is proved, and the cost and delay are analyzed
- Algorithmic solutions are offered for logical simulation, computation of propagation delay and minimum clock period
- Connections are drawn from the physical analog world to the digital abstraction
- The language of graphs is used to describe formulas and circuits
- Hundreds of figures, examples and exercises enhance understanding. The extensive website (<http://www.eng.tau.ac.il/~guy/Even-Medina/>) includes teaching slides, links to Logisim and a DLX assembly simulator.

Roads to Higher Dimensional Polytopic Projects Octavian lordache, 2022-08-18 High dimensional reference architectures presented here allows confronting and prevailing over the growing complexity of polytopic projects implementations. Such projects should be envisaged giving that conventional systems operations, equipments, methodologies or organizations will reach their limits for self-evolvability in high complexity conditions. Self-evolvable high complexity systems are based on high dimensional polytopic reference architectures. Polytope is the general term of the sequence: point, line, polygon, polyhedron and so on. The polytopic projects are targeting the artificiality, not only for materials where it is well known and applied, but also for biological, cognitive, intelligent and mathematical systems. The book highlights the polytopic projects basic similarity despite the noticeable difference

as domains of application. The roads to follow and the algebra of changing roads are emphasized. The book is divided in 9 chapters. Chapter 1 introduces the Polytopic Roadmap to 4D and beyond. The role for the dialogue of processes in duality of the non-Aristotelian Logic of Contradiction and of Included Middle is emphasized for different domains. Chapter 2 refers to chemical systems. Supramolecular chemistry, metal organic frameworks, MOF, and reaction networks, are the examples considered in the frame of polytopic chemistry. Chapter 3 refers to biological systems. Biological dynamical hierarchies and quasi-species are the considered case studies. Technological and scientific projects targeting artificiality for cells and viruses are considered. Chapter 4 refers to cognitive systems. Developmental stages, formal and relational concepts analysis, and neural coding are considered here. The roles of the 4D systems of systems of systems and of conceptual 4D-cube are emphasized. Artificiality for cognitive systems is the object of study. Chapter 5 refers to mathematical systems. Modeling levels and the 4D digital twins are discussed. Hopf monoids as tools for the study of combinations and separations, dual graded graphs and V-models are informally presented. Chapter 6 refers to application of formal concept analysis, FCA, for high dimensional separations, nesting and drug delivery. Chapter 7 refers to polytopic engineering systems as multiscale transfer, distributors-collectors, cyclic operations, middle vessel columns, mixing, assembly and designs. Equipments have been characterized using Polytopic Roadmaps and classified by Periodic Tables. Chapter 8 introduces polytopic industry, economy, society and sustainability. Chapter 9 outlines new domains of interest as arts and architecture, transdisciplinarity, complex systems and unity of sciences and engineering. Polytopic Roadmaps are proposed as Method for experts from various fields to synthesize their thinking and capabilities into new projects implementation to face and surpass high complexity. A repetitive finding of this book is that self-evolvability observed in physical

systems is based on the same directed sequence of reference architectures as the self-evolvability of concepts in our mind. Continuing to develop the field of self-evolvable systems and presenting the polytopic roadmaps for 4D and beyond advances in ever growing complexity domains, the book will be useful to engineers, researchers, entrepreneurs and students in different branches of production, complex systems sciences and engineering, ecology and applied mathematics.

Digital System Design - Use of Microcontroller Shenouda Dawoud, R. Peplow, 2022-09-01 Embedded systems are today, widely deployed in just about every piece of machinery from toasters to spacecraft. Embedded system designers face many challenges. They are asked to produce increasingly complex systems using the latest technologies, but these technologies are changing faster than ever. They are asked to produce better quality designs with a shorter time-to-market. They are asked to implement increasingly complex functionality but more importantly to satisfy numerous other constraints. To achieve the current goals of design, the designer must be aware with such design constraints and more importantly, the factors that have a direct effect on them. One of the challenges facing embedded system designers is the selection of the optimum processor for the application in hand; single-purpose, general-purpose or application specific. Microcontrollers are one member of the family of the application specific processors. The book concentrates on the use of microcontroller as the embedded system's processor, and how to use it in many embedded system applications. The book covers both the hardware and software aspects needed to design using microcontroller. The book is ideal for undergraduate students and also the engineers that are working in the field of digital system design. Contents • Preface; • Process design metrics; • A systems approach to digital system design; • Introduction to microcontrollers and microprocessors; • Instructions and Instruction sets; • Machine language and assembly language; •

System memory; Timers, counters and watchdog timer;•
Interfacing to local devices / peripherals;• Analogue data and the
analogue I/O subsystem;• Multiprocessor communications;• Serial
Communications and Network-based interfaces.

Internet to Secure New Customers! The Internet Has Become an
Unlimited Resource for Knowledge and Information and it is by
Responding to This Need of Web Users That You Can Increase Your
Business Sales, Advertising Revenue and Overall Profitability!
Today, millions scour the Web in a pursuit of knowledge or
information, using search engines and other means to find and
locate what they want to read about and learn. Those who provide
that data receive visitors. Because of this, more and more Internet
websites have begun to offer a wide range of articles, blogs and
other resources to secure that Web traffic of those looking for
answers or insight. And all of those visitors searching for
knowledge are an opportunity to make money via sales and
advertising. Yet, in order to get listed in search results and obtain
a share in that traffic, it is crucial to provide real and relevant
information. We want to show you exactly how you can do this
with our valuable eBook Think Big and Grow Rich in the Digital

Digital Product Creation RD king, Your Guide to Simple and Effective Product Creation! Cash in on The Latest Product Creation Techniques and Learn The Secrets The Experts Don't Want You To! There's some great news... which is you don't have to be super-creative to produce your own unique product. You may always do what so many others do, and that's to upgrade something that exists; or make it greater and better it. You may produce a product mash-up and produce something over your own. Example, you've some particular issue or subject, and you have 3 or 4 ebooks on that issue. You may simply take ideas from all these ebooks and produce your own. You don't copy but instead learning from them and making a product of your own that lets in your own ideas, analysis and data. The thing here is that you're handling these research products as a commencing point to get ideas, so that it becomes simple for you to work with your own product. There's an unbelievable amount of ideas simply sitting all over the place, so do keep an awareness. If you're going to build a product, then it's in your best interest to make a high quality product holding useful info. Your first product, regardless what you do, will always take the longest and feel like the hardest. Given here are hints that will help you in that field. Below are the information that you are about to learn: The Most Important Thing When Writing An E-book How To Craft The Best Topic For Your Product To Catch The Attention Of Buyers Drafting Out Your Table Of Contents Writing It Yourself

FUNDAMENTALS OF DIGITAL CIRCUITS A. ANAND

KUMAR,2016-07-18 The Fourth edition of this well-received text continues to provide coherent and comprehensive coverage of digital circuits. It is designed for the undergraduate students pursuing courses in areas of engineering disciplines such as Electrical and Electronics, Electronics and Communication, Electronics and Instrumentation, Telecommunications, Medical Electronics, Computer Science and Engineering, Electronics, and Computers and Information Technology. It is also useful as a text for MCA, M.Sc. (Electronics) and M.Sc. (Computer Science) students. Appropriate for self study, the book is useful even for AMIE and grad IETE students. Written in a student-friendly style, the book provides an excellent introduction to digital concepts and basic design techniques of digital circuits. It discusses Boolean algebra concepts and their application to digital circuitry, and elaborates on both combinational and sequential circuits. It provides numerous fully worked-out, laboratory tested examples to give students a solid grounding in the related design concepts. It includes a number of short questions with answers, review questions, fill in the blanks with answers, multiple choice questions with answers and exercise problems at the end of each chapter.

Digital Video Image Quality and Perceptual Coding H.R.

Wu,K.R. Rao,2017-12-19 The hand is quicker than the eye. In many cases, so is digital video. Maintaining image quality in bandwidth- and memory-restricted environments is quickly becoming a reality as thriving research delves ever deeper into perceptual coding techniques, which discard superfluous data that humans cannot process or detect. Surveying the topic from a Human Visual System (HVS)-based approach, Digital Video Image Quality and Perceptual Coding outlines the principles, metrics, and standards associated with perceptual coding, as well as the latest

techniques and applications. This book is divided broadly into three parts. First, it introduces the fundamental theory, concepts, principles, and techniques underlying the field, such as the basics of compression, HVS modeling, and coding artifacts associated with current well-known techniques. The next section focuses on picture quality assessment criteria; subjective and objective methods and metrics, including vision model based digital video impairment metrics; testing procedures; and international standards regarding image quality. Finally, practical applications come into focus, including digital image and video coder designs based on the HVS as well as post-filtering, restoration, error correction, and concealment techniques. The permeation of digital images and video throughout the world cannot be understated. Nor can the importance of preserving quality while using minimal storage space, and Digital Video Image Quality and Perceptual Coding provides the tools necessary to accomplish this goal. Instructors and lecturers wishing to make use of this work as a textbook can download a presentation of 786 slides in PDF format organized to augment the text. accompany our book (H.R. Wu and K.R. Rao, Digital Video Image Quality and Perceptual Coding, CRC Press (ISBN: 0-8247-2777-0), Nov. 2005) for lecturers or instructor to use for their classes if they use the book.

Periscope Marketing Excellence RD king, Step-By-Step Blueprint Reveals How To Harness The Power Of Streaming Video And Periscope To Get Hordes Of Targeted Traffic! Live video streaming just might be the next 'big thing' in the world of digital marketing. And as every digital marketer should know, keeping up to date with the latest developments is key if you want to stay ahead of the competition. What's more, is that live video streaming could end up being something that changes the whole world. In the same kind of way that cloud computing could

potentially change the way all of our technology works and the way we do everything, live video streaming has potential to impact on every major aspect of our lives. This is an incredible opportunity then – to jump on board with something at this incredibly exciting inception point and to influence its trajectory and its impact on the world. Imagine if you had been around when the internet first launched and you had a book that could tell you exactly how to make the most of everything the web promised. Well, that’s exactly where you find yourself now. If you get involved with live video streaming now, you can solidify yourself as a massive presence here before other marketers get on board. But what is live video streaming? Just why does it hold so much promise? And how can you make sure that you’re doing it right? That’s what we’re going to find out, so hang onto your hats and get ready for an exciting ride into a brave new frontier in digital marketing! Below is the list of chapters that you are about to explore and experience the value: Chapter 1: What is Live Video Streaming? And What is Periscope? Chapter 2: The Marketing Potential for Streaming Chapter 3: Periscope Chapter 4: Your Strategy – Provide Value Chapter 5: How to Make Amazing Videos for Periscope Chapter 6: Top Tips for Generating More Viewers Chapter 7: The Other Platforms

An Enhanced Digital Line Graph Design, 1990 In response to increasing information demands on its digital cartographic data, the U.S. Geological Survey has designed an enhanced version of the Digital Line Graph, termed Digital Line Graph - Enhanced (DLG-E). In the DLG-E model, the phenomena represented by geographic and cartographic data are termed entities. Entities represent individual phenomena in the real world.

Digital Personalized Health and Medicine L.B. Pape-Haugaard, C. Lovis, I. Cort Madsen, 2020-06-17 Digital health and medical informatics have grown in importance in recent years, and have now become central to the provision of effective healthcare

around the world. This book presents the proceedings of the 30th Medical Informatics Europe conference (MIE). This edition of the conference, hosted by the European Federation for Medical Informatics (EFMI) since the 1970s, was due to be held in Geneva, Switzerland in April 2020, but as a result of measures to prevent the spread of the Covid19 pandemic, the conference itself had to be cancelled. Nevertheless, because this collection of papers offers a wealth of knowledge and experience across the full spectrum of digital health and medicine, it was decided to publish the submissions accepted in the review process and confirmed by the Scientific Program Committee for publication, and these are published here as planned. The 232 papers are themed under 6 section headings: biomedical data, tools and methods; supporting care delivery; health and prevention; precision medicine and public health; human factors and citizen centered digital health; and ethics, legal and societal aspects. A 7th section deals with the Swiss personalized health network, and section 8 includes the 125 posters accepted for the conference. Offering an overview of current trends and developments in digital health and medical informatics, the book provides a valuable information resource for researchers and health practitioners alike.

Creative Learning in Digital and Virtual Environments Vlad P. Glăveanu, Ingunn Johanne Ness, Constance de Saint Laurent, 2020-11-10 Originally published as a special issue of the Creativity Research Journal, this volume gives a balanced and reflective account of the challenges and opportunities of technology-enabled creative learning in contemporary societies. Providing a current and updated account of the challenges posed by the Coronavirus to online education, chapters more broadly offer conceptual reflections and empirically informed insights into the impact of technology on individual and collective creativity and learning. These thoughts are explored in relation to school achievement, the development of digital educational resources, online collaboration, and virtual working. Further, the book also

considers how the creative use of technology poses risks to learning through the accidental or deliberate dissemination of misinformation, and online manipulation of common societal values in the era of COVID-19. *Creative Learning in Digital and Virtual Environments* looks at the connection between creativity, learning, and school achievement, and analyses the impact of virtual environments on creative expression. It will appeal to postgraduate students in the fields of creativity and learning, as well as to students and academics involved with broader research in areas such as the role of technology in education, e-Learning and distance education. Vlad P. Glăveanu is Associate Professor and Head of the Department of Psychology and Counselling at Webster University Geneva, Switzerland, as well as Associate Professor II at the University of Bergen, Norway. Ingunn Johanne Ness is a Senior Researcher at the Centre for the Science of Learning & Technology, University of Bergen, Norway. Constance de Saint Laurent is a Postdoctoral Researcher at the University of Bologna, Italy.

Exact Design of Digital Microfluidic Biochips Oliver Keszocze, Robert Wille, Rolf Drechsler, 2018-06-11 This book presents exact, that is minimal, solutions to individual steps in the design process for Digital Microfluidic Biochips (DMFBs), as well as a one-pass approach that combines all these steps in a single process. All of the approaches discussed are based on a formal model that can easily be extended to cope with further design problems. In addition to the exact methods, heuristic approaches are provided and the complexity classes of various design problems are determined. Presents exact methods to tackle a variety of design problems for Digital Microfluidic Biochips (DMFBs); Describes an holistic, one-pass approach solving different design steps all at once; Based on a formal model of DMFBs that is easily adaptable to deal with further design tasks.
