Antisemitism in the German Military Community and the Jewish Response, 1914–1938 Brian E. Crim,2014-04-17 Antisemitism in the German Military Community and the Jewish Response, 1914–1938 explores how German World War I veterans from different social and political backgrounds contributed to antisemitic politics during the Weimar Republic. The book compares how the military, right-wing veterans, and Jewish veterans chose to remember their war experiences and translate these memories into a political reality in the postwar world. Brian E. Crim reveals that contested legacies of World War I influenced the growth and content of German antisemitism prior to the Third Reich.

Courts and Tax Treaty Law Guglielmo Maisto,2007 A detailed and comprehensive study of the issues faced by judiciaries when dealing with tax treaty law cases. It begins with an overview of some of the questions that domestic courts have to deal with when facing treaty cases. It then provides a comparative look into the structure of tax judiciaries and the issues raised by the burden of proof in cases dealing with the application of tax treaties. The different approaches of judiciaries of common law and civil law countries are also taken into consideration. A particular focus is devoted to the interaction between European law principles and bilateral tax treaties, both from the point of view of national judges and the Court of Justice of the European Communities, as well as the relevance of foreign court decision in interpreting tax treaties and the twofold influence between decisions issued by national courts and the Commentaries to the OECD Model Tax Convention. Individual country surveys provide an in-depth analysis on how national courts face cases dealing with the application of tax treaties, with a particular emphasis on issues raised by tax treaty interpretation. Lastly, the book deals with issues raised by judicial treaty override, proposes solutions to resolve judicial errors in the context of international tax law and analyses the procedural conditions for the implementation of tax treaty obligations under domestic law.

The German-Jewish Soldiers of the First World War in History and Memory Tim Grady,2011-01-01 Nearly one hundred thousand German Jews fought in World War I, and some twelve thousand of these soldiers lost their lives in battle. This book focuses on the multifaceted ways in which these soldiers have been remembered, as well as forgotten, from 1914 to the late 1970s. By examining Germany's complex and continually evolving memory culture, Tim Grady opens up a new approach to the study of German and German-Jewish history. In doing so, he draws out a narrative of entangled and overlapping relations between Jews and non-Jews, a story that extends past the Holocaust and into the Cold War.

Cyprinid Fishes Ian J. Winfield,Joe S. Nelson,2012-12-06 Among the fishes. a remarkably wide range ofbiological adaptations to diverse habitats has evolved. As well as living in the conventional habitats of lakes. ponds. rivers. rock pools and the open sea. fish have solved the problems of life in deserts. in the deep sea. in the cold Antarctic. and in warm waters of high alkalinity or of low oxygen. Along with these adaptations. we find the most impressive specializations of morphology. physiology and behaviour. For example we can marvel at the high-speed swimming of the marlins. sailfish and warm-blooded tunas. air breathing in catfish and lungfish. parental care in the mouth-brooding cichlids and viviparity in many sharks and toothcarps. Moreover. fish are of considerable importance of the survival of the human species in the form ofnutritious and delicious food ofnumerous kinds. Rational exploitation and management of our global stocks of fishes must rely upon a detailed and precise insight of their biology. The Chapman and Hall Fish and Fisheries Series aims to present timely volumes reviewing important aspects of fish biology. Most volumes will be of interest to research workers in biology. zoology. ecology and physiology. but an additional aim is for the books to be accessible to a wide spectrum of non specialist readers ranging from undergraduates and postgraduates to those with an interest in industrial and commercial aspects of fish and fisheries.

Fish Parasites Patrick T. K. Woo,Kurt Buchmann,2012 Focusing on pathobiology and protective strategies against protozoan and metazoan parasites of fish, this book reviews the latest research on important parasites: those that cause financial hardships to the aquaculture industry, have been introduced to new geographical regions through transportation of infected fish, are pathogenic to groups of finfish and detrimental to production, are highly adaptable and not host-specific with worldwide distributions, and that may serve as disease models for studies on other pathogens. It also highlights gaps in the knowledge to help direct future research.

Jews and Germans Guenter Lewy,2020-10-01 Jews and Germans is the only book in English to delve fully into the history and challenges of the German-Jewish relationship, from before the Holocaust to the present day. The Weimar Republic era—the fifteen years between Germany’s defeat in World War I (1918) and Hitler’s accession (1933)—has been characterized as a time of unparalleled German-Jewish concord and collaboration. Even though Jews constituted less than 1 percent of the German population, they occupied a significant place in German literature, music, theater, journalism, science, and many other fields. Was that German-Jewish relationship truly reciprocal? How has it evolved since the Holocaust, and what can it become? Beginning with the German Jews’ struggle for emancipation, Guenter Lewy describes Jewish life during the heyday of the Weimar Republic, particularly the Jewish writers, left-wing intellectuals, combat veterans, and adult and youth organizations. With this history as a backdrop he examines the deeply disparate responses among Jews when the Nazis assumed power. Lewy then elucidates Jewish life in postwar West Germany; in East Germany, where Jewish communists searched for a second German-Jewish symbiosis based on Marxist principles; and finally in the united Germany—illuminating the complexities of fraught relationships over time.

Flora of New South Wales Gwen Jean Harden,1990 Final volume in a series describing every native and naturalised vascular plant species in NSW. This volume covers monocotyledons, including the Poaceae, the Cyperaceae, the Juncaceae and the Orchidaceae, and contains a key to families of monocotyledons, as well as keys to genera and species. Each species is illustrated with black and white line drawings, and 230 species are shown in colour photographs. Useful reference for both amateur and professional botanists. Includes references, glossary, a cumulative index of plant names, and an index to families for volumes1-4. The editor is a senior botanist at the National Herbarium of New South Wales, Royal Botanic Gardens, Sydney.
