Learning with Information Systems Simon Bell, 2013-02-01 In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

The Economics of the Trade Union Alison L. Booth,1995 This book analyses the crucial features of unionised labour markets. The models in the book refer to labour contracts between unions and management, but the method of analysis is also applicable to non-union labour markets where workers have some market power. In this book, Alison Booth, a researcher in the field, emphasises the connection between theoretical and empirical approaches to studying unionised labour markets. She also highlights the importance of taking into account institutional differences between countries and sectors when constructing models of the unionised labour market. While the focus of the book is on the US and British unionised labour markets, the models and analytical methods are applicable to other industrialised countries with appropriate modifications.

Enterprise and American Law, 1836-1937 Herbert Hovenkamp,2009-06-01 In this integration of law and economic ideas, Herbert Hovenkamp charts the evolution of the legal framework that regulated American business enterprise from the time of Andrew Jackson through the first New Deal. He reveals the interdependent relationship between economic theory and law that existed in these decades of headlong growth and examines how this relationship shaped both the modern business corporation and substantive due process. Classical

economic theory--the cluster of ideas about free markets--became the guiding model for the structure and function of both private and public law. Hovenkamp explores the relationship of classical economic ideas to law in six broad areas related to enterprise in the nineteenth and early twentieth centuries. He traces the development of the early business corporation and maps the rise of regulated industry from the first charterbased utilities to the railroads. He argues that free market political economy provided the intellectual background for constitutional theory and helped define the limits of state and federal regulation of business behavior. The book also illustrates the unique American perspective on political economy reflected in the famous doctrine of substantive due process. Finally, Hovenkamp demonstrates the influence of economic theory on labor law and gives us a reexamination of the antitrust movement, the most explicit intersection of law and economics before the New Deal. Legal, economic, and intellectual historians and political scientists will welcome these trenchant insights on an influential period in American constitutional and corporate history.

Kumba Africa Sampson Ejike Odum, 2020-11-03
'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small

huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.
