*The People Are the News* Grant Pick,2008-01-21 This distinctive collection features writings from

Grant Pick's long, distinguished career in literary journalism. Pick had a uniquely open eye and ear for people who were in difficult situations, doing extraordinary things, or both. Most of his stories focus on interesting but overlooked Chicagoans, like the struggling owner of a laundrymat on the west side or the successful doctor who, as he faced his own death from cancer, strove to enlighten his colleagues in the field of medicine. As only a lifetime Chicagoan could, he described in tender detail the worlds in which people lived or worked, providing a look not just at one city's citizens but at humanity as a whole. Pick's widow and son curate this showcase of some of his most well-remembered work, such as "The Rag Man of Lincoln Park" and "Brother Bill." In these and all of his other works, Pick wrote from the front lines, speaking to people whom others might encounter everyday but never really see. He faithfully characterized his subjects, never denying them dignity or value and never judging them. In the mirror he held up to his city, Chicago could see the shared humanity of all its citizens.

Speculative Everything Anthony Dunne, Fiona Raby, 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose "what if" questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.
