Scalability and Sustainability of Business Models in Circular, Sharing and Networked Economies

Adam Jabłoński, Marek

Jabłoński, 2020-02-13 This book explores many key areas of business science and practice. It is mainly centred on the field of strategic management with a special focus on the concept of business models and the new dimensions of the economy. In terms of economic conditions, the book discusses the principles of the sharing economy, the circular economy, and the networked economy. This multi-faceted approach makes the book holistic, creating a comprehensive image of a multidimensional market. It will appeal to theoreticians and scientists dealing with the issues of building and operationalising innovative business models, as well as students exploring the issues of strategic management and the new economy. Furthermore, it will also be of interest to business practitioners—both entrepreneurs and top managers—who want to be business virtuosos, who can change their organisations and their business models.

Managing Motivation Robert Pritchard, Elissa

Ashwood,2008-05-12 This slim motivation guidebook was written to bridge the gap between the academic research on motivation and to present it in a form that is useful to the practicing manager. In essence, the book presents a theory of motivation and how to use it without ever mentioning the word theory. The goal of the book is to give managers a kind of mental model to use in thinking about motivation and to show them how to use this mental model for practical management actions to diagnose and improve motivation of subordinates. The book is written in three sections: Understanding Motivation, Diagnosing Motivation and Improving Motivation. The book incorporates case studies and many examples of how to successfully manage motivation.
