**William Crookes (1832-1919) and the Commercialization of Science** William H. Brock,2016-12-14 William Crookes' long life was one of unbroken scientific and business activity, culminating in his appointment as President of the Royal Society in 1913. Throughout his career he was an important science journalist, the discoverer of thallium, the inventor of the radiometer, investigator of cathode rays and the vacuum, a spectroscopist of significance in rare earth chemistry, and a spokesman for a chemical solution to the problems with the world's food supplies. He was also, and perhaps most controversially, an occultist who played a significant role in spiritualism in the 1870s, and was involved with D.D. Home (Browning's Mr Sludge) and other notable mediums of the day. Previous literature on Crookes has tended to focus on his involvement with the spiritualists, sometimes to the detriment of his many scientific achievements. This, the first biography of William Crookes, gives us the whole man: one of the most complex, public, and interesting figures in the history of science. Professor Brock guides us through the abundant catalogue of Crookes' accomplishments, placing his scientific activities in the context of the business of making a living from science - something that Crookes did principally as a science journalist and editor with his Chemical News (the model for today's Nature), and by business enterprises ranging from water analysis, sewerage schemes, and goldmining to the design of electric light bulbs. We also see Crookes in the lab, as an independent researcher, and learn the processes behind his discovery of thallium, his investigations into matter and energy, and his crucial work on cathode rays. We see the public man, the celebrity who was much sought after for his opinions on the latest discovery, and who was widely regarded as Britain's leading scientist at the beginning of the twentieth century. Scientist, spiritualist, entrepreneur: Sir William Crookes' extraordinary life and many endeavours provide a unique window into Victorian and Edwardian science and industry.

**A Hell of a Lot of Glass** Kate Ramsay,2023-09-03 Why are there still so few women CEOs in the top 200 ASX-listed companies? Why is there still a gender pay gap in Australia? And why are some women still having to navigate not just glass ceilings but glass cliffs and glass labyrinths at work? A hell of a lot of Glass digs deep into answering these questions and why, after more than four decades of anti-discrimination, equal opportunity and affirmative action legislation and policy in Australia, there still is not gender equality at work. Importantly, this book suggests ways we can work towards fixing the problems. Leadership consultant Kate Ramsay draws on her considerable experience in the field of equal opportunity to produce a book that is informative, 'meaty', readable and timely. Targeted research by three contributing authors provides context, while interviews with 25 women provide fascinating and sometimes alarming details of their experiences in the workplace. Each chapter is a stand-alone essay on topics ranging from sexism and misogyny to imposter syndrome and the 'elephant in the room' of unconscious biases. Chapters are structured in sections: research, supporting anecdotes from interviewees, what more can be done, and conclusions. Whether you're a leader who wants to create a gender-diverse workforce, a change agent asked to achieve inclusion and diversity in your workplace, or a woman juggling work and family responsibilities, this book is for you.

**Conflict of Interests** Alan Draper,1994 On the basis of extensive archival research, Alan Draper illuminates the role organized labor played in the southern civil rights movement. He documents the substantial support the AFL-CIO and its southern state councils gave to the struggle for black equality, suggesting that labor's political leadership recognized an opportunity in the civil rights movement. Frustrated in their efforts to organize the South, labor leaders understood the potential of newly enfranchised blacks to challenge conservative southern Democrats. At the same time, white union members in the South were more interested in defending their racial privileges than in allying themselves with blacks. An explosive tension developed between labor's political leadership, desperate to create a party system in the South that included blacks, and a rank and file determined to preserve southern Democracy by excluding blacks. This book looks at the ways that tension was expressed and ultimately resolved within the southern labor movement.
