Date Palm Fiber Composites Mohamad Midani, Naheed Saba, Othman Y.

Alothman, 2020-11-11 This book covers the recent research advances on the utilization of date palm fibers as a new source of cellulosic fibers that can be used in the reinforcement of polymer composites. It discusses the competitive mechanical, physical, and chemical properties which make date palm fibers stand out as an alternative to other fibers currently used in the natural fiber composites market. This volume will be useful to researchers working on natural fiber composites and fiber reinforced composites looking to develop green, biodegradable and sustainable components for application in automotive, marine, aerospace, construction, wind energy and consumer goods sectors.

Preliminary Evaluation of New Candidate Materials as Toxicants, Repellents, and Attractants Against Stored-product Insects Lehman L. McDonald, Richard H. Guy, Roy Dean Speirs, 1970

Biomass and Bioenergy Khalid Rehman Hakeem, Mohammad Jawaid, Umer

Rashid, 2014-08-25 Biomass obtained from agricultural residues or forest can be used to produce different materials and bioenergy required in a modern society. As compared to other resources available, biomass is one of the most common and widespread resources in the world. Thus, biomass has the potential to provide a renewable energy source, both locally and across large areas of

the world. It is estimated that the total investment in the biomass sector between 2008 and 2021 will reach the large sum of \$104 billion. Presently bioenergy is the most important renewable energy option and will remain so the near and medium-term future. Previously several countries try to explore the utilization of biomass in bioenergy and composite sector. Biomass has the potential to become the world's largest and most sustainable energy source and will be very much in demand. Bioenergy is based on resources that can be utilized on a sustainable basis all around the world and can thus serve as an effective option for the provision of energy services. In addition, the benefits accrued go beyond energy provision, creating unique opportunities for regional development. The present book will provide an up-to-date account of non-wood, forest residues, agricultural biomass (natural fibers), and energy crops together with processing, properties and its applications to ensure biomass utilization and reuse. All aspects of biomass and bioenergy and their properties and applications will be critically re-examined. The book consists of three sections, presenting Non wood and forest products from forestry, arboriculture activities or from wood processing, agricultural biomass (natural fibers) from agricultural harvesting or processing and finally energy crops: high yield crops and grasses grown especially for energy production.

Lavender Maria Lis-Balchin, 2002-08-01 *Lavandula* species are mainly grown for their essential oils, which are used in perfumery, cosmetics, food

processing and aromatherapy products, and for their use as ornamental plants and ingredients in numerous cottage industry products. Certain types of lavender oil have also been shown to have antimicrobial and antifungal properties. The dried fl

Lignocellulosic Fibre and Biomass-Based Composite Materials Mohammad Jawaid, Paridah Md Tahir, Naheed Saba, 2017-06-03 *Lignocellulosic Fibre and Biomass-Based Composite Materials* reviews the development, characterization and applications of composite materials developed from the effective use of lignocellulosic fibre and biomass. The book gathers together a wide spectrum of cutting-edge research on biomass fillers and reinforcements used for the fabrication and synthesis of composites. The book takes a systematic approach, investigating processing, design, characterization and applications of biocomposites, in order to establish their important relationship as a general guideline for end-user applications. Beginning with an introduction to biomass and its composites, a team of leading experts in the field cover rice husk, kenaf, oil palm, alfa and doum fibres, bamboo, cork, and many other materials, considering a range of applications, along with key issues such as performance and sustainability. The groundbreaking research presented opens the door to obtaining advanced material characteristics and significant enhancements in physical, mechanical, and thermal properties. This will become an extremely useful reference and technical guide for academic and industrial researchers in composite materials, as well as for advanced

students and industrialists working in material commercialization. Gathers together a wide spectrum of research on lignocellulosic fiber and biomass fillers and reinforcements used for the fabrication and synthesis of composites Presents multidisciplinary work in relation to materials engineering, polymer chemistry and physics, materials processing, organic synthesis and industrial design and applications Demonstrates systematic approaches and investigations from processing, design, characterization and applications of biocomposites

Citrus Essential Oils Masayoshi Sawamura, 2011-09-14 Commercially used for food flavorings, toiletry products, cosmetics, and perfumes, among others, citrus essential oil has recently been applied physiologically, like for chemoprevention against cancer and in aromatherapy. Citrus Essential Oils: Flavor and Fragrance presents an overview of citrus essential oils, covering the basics, methodology, and applications involved in recent topics of citrus essential oils research. The concepts, analytical methods, and properties of these oils are described and the chapters detail techniques for oil extraction, compositional analysis, functional properties, and industrial uses. This book is an unparalleled resource for food and flavor scientists and chemists.

Novel Food Packaging Techniques R Ahvenainen, 2003-06-10 Packaging continues to be one of the most important and innovative areas in food processing. Edited by a leading expert in the field, and with its distinguished

international team of contributors, Novel food packaging techniques provides an authoritative and comprehensive review of the key trends. Part one discusses the range of active packaging techniques such as the use of oxygen and other scavengers, moisture regulation and antimicrobial packaging in food preservation. It also covers the use of intelligent systems such as time-temperature and freshness indicators to assess food quality. Part two reviews developments in modified atmosphere packaging (MAP) and its role in enhancing product safety and quality. Part three describes packaging applied in practice to particular products such as meat and fish. Part four covers other key issues such as packaging optimisation, the legislative context, sustainable packaging and consumer attitudes. Novel food packaging techniques is a standard reference for the food industry in optimising the use of packaging to improve product safety and quality. Provides an authoritative and comprehensive review of the key trends of food packaging Discusses the range of active packaging techniques such as the use of oxygen and other scavengers, moisture regulation and antimicrobial packaging in food preservation Covers packaging optimisation, the legislative context, sustainable packaging and consumer attitudes

Eco-Friendly Corrosion Inhibitors Lei Guo, Chandrabhan Verma, Dawei Zhang, 2022-06-21 Eco-Friendly Corrosion Inhibitors: Principles, Designing, and Applications wraps up new developments in corrosion inhibitors and their current applications in real-life environments such as in strong acidic

pickling and petroleum-based liquids. The book covers several types of environmentally-friendly corrosion inhibitors in detail. In addition, it highlights both established research and technology on industrial scale corrosion inhibitors and their rapidly emerging aspects and future research directions. Provides fundamental basics and applied practices of corrosion prevention at industrial scale Serves as a valuable reference for scientists and engineers who are searching modern design for industrial scale corrosion inhibitors Focuses on the most advanced industrial scale corrosion inhibitors, including current challenges during manufacturing Includes up-to-date reference material such as websites of interest and information about the latest research

Odors In the Food Industry Xavier Nicolay, 2006-12-13 This book, the second volume of the ISEKI-Food book series, discusses the diverse questions raised by odors in the food industry and the closely related Volatile Organic Compounds. Topics range from perception of the issue to implementation of regulations, from prevention of the problems to their possible treatment, through specific case studies and analysis methods illustrating the different measurement technologies.

Seafood Safety Institute of Medicine, Food and Nutrition Board, Committee on Evaluation of the Safety of Fishery Products, 1991-02-01 Can Americans continue to add more seafood to their diets without fear of illness or even

death? Seafood-caused health problems are not widespread, but consumers are at risk from seafood-borne microbes and toxins—with consequences that can range from mild enteritis to fatal illness. At a time when legislators and consumer groups are seeking a sound regulatory approach, Seafood Safety presents a comprehensive set of practical recommendations for ensuring the safety of the seafood supply. This volume presents the first-ever overview of the field, covering seafood consumption patterns, where and how seafood contamination occurs, and the effectiveness of regulation. A wealth of technical information is presented on the sources of contamination—microbes, natural toxins, and chemical pollutants—and their effects on human health. The volume evaluates methods used for risk assessment and inspection sampling.

Fresh-Cut Fruits and Vegetables Mohammed Wasim Siddiqui, 2019-11-10 *Fresh-Cut Fruits and Vegetables: Technologies and Mechanisms for Safety Control* covers conventional and emerging technologies in one single source to help industry professionals maintain and enhance nutritional and sensorial quality of fresh-cut fruits and vegetables from a quality and safety perspective. The book provides available literature on different approaches used in fresh-cut processing to ensure safety and quality. It discusses techniques with the aim of preserving quality and safety in sometimes unpredictable environments. Sanitizers, antioxidants, texturizers, natural additives, fortificants, probiotics, edible coatings, active and intelligent packaging are all

presented. Both advantages and potential consequences are included to ensure microbial safety, shelf-life stability and preservation of organoleptic and nutritional quality. Industry researchers, professionals and students will all find this resource essential to understand the feasibility and operability of these techniques in modern-day processing to make informed choices. Provides current information on microbial infection, quality preservation, and technology with in-depth discussions on safety mechanisms Presents ways to avoid residue avoidance in packaging and preservation Includes quality issues of microbial degradation and presents solutions for pre-harvest management

The Genus Lavandula Tim Upson, Susyn Andrews, 2004 The most comprehensive and authoritative account of lavender. Describing some 39 species, their hybrids and cultivars, this book brings together their taxonomy, distribution, history, cultivation, propagation, and an overview of their commercial products, essential oils and chemistry. Lavishly illustrated with RHS Gold Medal award winning paintings by botanical artists Christabel King, Georita Harriott and Joanna Langhorne. With 31 botanical paintings, 45 line drawings and many colour photographs.

The Way Life Is Rick Johnson,2004 Being in love and full of anticipation of a great life does not shield young couples from unfair and unexpected challenges and trauma. This book is not an elaborate how-to or self-help manual for when the going gets rough. It's just a true story about a couple that continued to put one foot in front of the other when they would rather have given up; it's about love and faith and standing fast against adversity. The Way Life Is takes readers into the home of a young couple trying to accommodate their own needs, desires and demons while coping with the special needs of their children: Sara, born with a rare and life threatening disability known as Prader-Willi Syndrome; Gina, who arrived needing open-heart surgery in order to survive; and Andrew, an active and exceptionally healthy little boy stuck in the middle. Readers' Comments ...as I read it I am struck by what a wonderful personal account it is, not only of your family's experiences, but the part of the story that is universal and inspiring, every couple's struggle with love and adversity. May it bless many, many families around the world! Joanne Klassen, author of Transformative Writing Congratulations on what I think is a truly incredible

book... it is all beautifully written and the introduction is especially nicely done... the type that grabs a reader right away and makes them want to read more. I think you are going to find that your book really connects with people and will not only comfort, but also inspire them. Brenda Fehr, Entertainment Editor, Transcontinental Media Inc.
