Topical Themes in Energy and Resources Yasumitsu Tanaka, Michael Norton, Yu-You

Li, 2015-01-30 This book combines issues several critical ones in the energy field (low-energy technologies, renewable energies such as the hydrogen economy, and geothermal energy). Moving towards a more sustainable world requires a complete revolution in the way we manage energy and resources. However, from an academic perspective, this theme is so broad that most educators and researchers tend to focus on just one aspect, and maintaining the broad viewpoint which is necessary for making strategic judgments becomes difficult. Tohoku University addressed this challenge when developing a new education and training program for environmental leaders and brought together the extensive range of expertise available in specific fields into one special course which forms the basis of this book. Now in one volume, both students and educators can be brought up to date on a wide range of critical issues currently being addressed in the field of energy and resources. Chapters on resources include availability (for instance, rare earth metals), extraction and recycling of metals and plastics, and technological solutions to specific waste-disposal problems. In addition, broader strategic issues such as limits to growth and the interaction between the economic system and environmental issues are addressed. Even though each chapter provides topical data and knowledge from disparate and specialized fields, the book is written at a level that is readily understandable by students from all scientific, engineering, and humanities fields.

The Relationship Between Chaotic Events and Credit Union Leadership Practices Dr. Paul Withey, 2015-06-01 Organizational crises, in modern society, requires an immediate response. Chaotic stages occur during organizational changes resulting in emotional experiences for leaders who develop intense feelings of anger, shock, and frustration. Leaders who are not prepared will be overwhelmed by the need for an aggressive response to change. The ability to solve problems successfully will increase movement of the organization through the chaos stage. Building a foundation of preparation for a leader, prior to the organizational change stage, will decrease levels of dysfunction the organization may experience. It is time for a new approach to managing organizational chaos. The research in this book provides original contributions to leadership studies by applying general systems and chaos theory to leadership behaviors in times of crisis. Chaos theory offers different perspectives that will allow leaders to develop capacities for changing their existing approaches to chaotic events. Results from the research in this study are valuable to credit union leaders, and also all business leaders, who need new models that recognize external factors influencing the sustainability of the organization. This adaptability is one of the most effective leadership skills a leader can display (Higgs & Rowland, 2005). Introducing general systems and chaos theory into organizational leadership has become a new approach to leadership psychology and philosophy, promising to influence leadership and management theories (Bums, 2002). The significance of chaos theory for leadership studies lies in its heuristic power. If the challenges to normal events are observed through the lens of chaos theory, organizational leaders may make

better-informed decisions in times of uncertainty.

Globalization and Culture at Work Stuart C. Carr, 2006-01-16 Behaviour at work can no longer be stereotyped as global or local – modern or traditional – with very little in-between. Instead work behaviour is a complex interplay between Global and Local values. It takes place in a Glocality. Thus individual achievement co-exists with group aspirations, pay diversity takes place in a social context, teamwork reflects cultural narrative, and labour mobility is bound by community bias. Globalization and Culture at Work: Exploring their Combined Glocality breaks new ground by exploring such glocalities, and the implications they create for managing human potential better. The volume is essential reading for researchers, managers, culturalists and consultants of work behaviour alike.

Evaluation Research in Child Welfare Katharine Briar-Lawson, Joan Levy Zlotnik, 2018-10-24 Since the 1980s, child welfare agencies and social work programs in more than 40 states have come together to address recruitment and retention issues by preparing social work students for child welfare practice—and to enhance the delivery of child welfare services. This book documents the outcomes of these partnerships to help you assess their value and sustainability! Evaluation Research in Child Welfare: Improving Outcomes Through University-Public Agency Partnerships is a critical examination of the diverse outcomes—and strategies for assessing them—of university/public child welfare agency partnerships designed to prepare social work students for public child welfare practice. This informative book addresses outcomes of these specialized training efforts which were supported by federal Title IV-E and Title IV-B Section 426 funds. Special attention is paid to programs addressing diversity and cultural competence through staff development. The book follows

the process of tracking the career paths of students in several states (large and small, rural and urban), as well as cross-state collaborations that include university, agency, consumer, and student partnerships. From the Editors: "Rising drug problems such as crack and cocaine addiction, along with co-occurring challenges such as poverty, domestic violence, and mental health issues, have helped to reinforce the need to have the most effective services delivered by the most well-prepared staff. Moreover, such challenges compel the most relevant, scientifically based approaches, requiring a closer connection of public child welfare systems to social work education programs and related academic disciplines. The articles featured in this book serve as progress markers for this re-professionalization initiative. They constitute snapshots of some of the current progress in workforce development, including social work based education, training, and capacity building in public child welfare. They also reflect social work/public child welfare partnerships and the lessons that are being learned when the research, educational, and service resources of schools of social work are harnessed to build a better trained work force that can provide improved services." In this informative book, you'll find a national overview of historical efforts to promote professional social work practice in child welfare, as well as examinations of: special challenges presented by privatized systems curricula and agencies training opportunities that grow from research partnerships the importance and impact of racial and ethnic diversity for future social workers the cultural competency needs of BSW and MSW students the differing cultural perspectives of universities and agencies—which must be bridged to create successful partnerships the benefits of these partnerships in terms of outcomes for students, clients, agencies, and social work education programs

Theme and Space A. G. F. van Holk, 1996 Since the appearance of Lotman's Poetics of the Artistic Text (1970) and Universe of the Mind (1990), and Eco's Introduction to Semiotics (1972), the investigation of the working of signs in language, the arts and the sciences has witnessed an ever-increasing impact on our understanding of human culture. In this book an attempt is made at developing a linguistic model for the semiotics of culture, and to apply this to the analysis of a number of Russian and Polish dramatic texts, mostly from the nineteenth-century. In the first five chapters such well known plays as Ostrovskij's The Thunderstorm, Turgenev's A Month in the Country and Gogol's The Inspector-General are discussed, alternatively with Stowacki's Fantazy and

some of Fredro's comedies. Special chapters are devoted to the performance of drama, and to some urgent issues concerning the structure of semiotic space. The last and most lengthy chapter presents an outline of so-called text linguistics, here conceived as a variety of case grammar, duely revised for application to the analysis of drama and its non-verbal context. The book addresses itself to readers familiar with Slavic languages and interested in the relation between language and literary themes, and the place of drama in culture.

Making Choices about Hydrogen Lynn Krieger Mytelka, Grant Boyle, 2008 Since the mid-1990s, the emergence of a hydrogen economy and the speed with which it will arrive have been vigorously debated. As a disruptive technology, dominant designs for the production, storage and distribution of hydrogen have not yet been established. Neither have performance characteristics been achieved to compete with the existing combustion engine, though the efficiency and durability of hydrogen fuel cells are improving. This publication highlights the uncertainties involved in making choices about hydrogen and fuel cells in planning the development policies on national energy, environment and transport sector.--Publisher's description.

Human Rights and Humanitarian Law Daniel Warner, 2023-09-14 The question of the universality and relativity of human rights and the relationships between human rights, humanitarian law and refugee protection are the subject of theoretical debates that concern international lawyers, academics, and international organizations. But, most importantly, it should be stressed that these debates are among people who are trying to understand ways of constructing strategies for dealing with the fundamental issue: helping people who are victims of abuse. This volume, which has emerged from a colloquium organised by the Graduate Institute of International Studies and its Program for the Study of International Organization(s), attempts to project an integrated approach

for helping those who are in need and to discuss ways of guaranteeing greater protection of certain universal values that underlie such help. It is the result of ideas shared between the major three organizations in this field, the UN Center for Human Rights, The International Committee of the Red Cross, and the United Nations High Commissioner for Refugees, and outside experts on the relationship between the different protection regimes.
