*Autonomous Software-Defined Radio Receivers for Deep Space Applications* Jon Hamkins, Marvin K. Simon, 2006-11-28 This book introduces the reader to the concept of an autonomous software-defined radio (SDR) receiver. Each distinct aspect of the design of the receiver is treated in a separate chapter written by one or more leading innovators in the field. Chapters begin with a problem statement and then offer a full mathematical derivation of an appropriate solution, a decision metric or loop-structure as appropriate, and performance results.

**Impact of Mobile Payment Applications and Transfers on Business** Opati, Thaisaiyi Zephania, Gachukia, Martin Kang'ethe, 2019-12-20 Consumers continue to rely heavily on their phones to complete such tasks as transferring funds between banks or accounts, depositing or withdrawing funds, paying bills, and purchasing items. Mobile money users are oftentimes more financially resilient and can protect themselves better against economic and other shocks. Moreover, mobile money can increase the velocity of money in circulation because it reduces the transactions and time costs of making retail payments. As such, understanding the impact of mobile payments is imperative for businesses and the economy. *Impact of Mobile Payment Applications and Transfers on Business* is a pivotal reference source that provides vital research on mobile money transfer and its impact in social, corporate, and micro- and macro-policies concerning the aggregate economy and individual households as a whole within an economy. It covers the impact, innovations, business-to-business transformations, regulatory framework, challenges, and ethical issues surrounding mobile money transfers around the world. This book is ideally

designed for economists, financial analysts, business managers, leaders, scholars, practitioners, researchers, and students in fields that include management, finance, economics, commerce, and leadership.

*Annual Report on Exchange Arrangements and Exchange Restrictions 1995*

International Monetary Fund. Monetary and Capital Markets Department, 1995-01-01

Published since 1950, this authoritative annual reference is based upon a unique IMF database that tracks exchange and trade arrangements for the 187 IMF member countries, along with Hong Kong SAR, Aruba, and Curaçao and St Maarten. The Annual Report on Exchange Arrangements and Exchange Restrictions (AREAER) draws together information on exchange measures in place, the structure and setting of exchange rates, arrangements for payments and receipts, procedures for resident and nonresident accounts, controls on capital transactions, and provisions specific to the financial sector. The data are presented in a clear, easy-to-read tabular format. A summary table allows for simple cross-country comparisons of key features of their exchange and trade regimes. The report's introduction summarizes recent global trends and developments.

**The Design of Modern Microwave Oscillators for Wireless Applications** Ulrich L.

Rohde, Ajay K. Poddar, Georg Böck, 2005-05-27 Delivering the best possible solution for phase noise and output power efficiency in oscillators This complete and thorough analysis of microwave oscillators investigates all aspects of design, with particular emphasis on operating conditions, choice of resonators and transistors, phase noise, and output power. It covers both bipolar transistors and FETs. Following the authors' guidance, readers learn how to design microwave oscillators and VCOs that can be tuned over a very wide frequency

range, yet have good phase noise, are low cost, and are small in size. All the essential topics in oscillator design and development are covered, including: \* Device and resonator technology \* Study of noise sources \* Analysis methods \* Design, calculation, and optimization methodologies \* Practical design of single and coupled oscillators While most of the current literature in the field concentrates on classic design strategies based on measurements, simulation, and optimization of output power and phase noise, this text offers a unique approach that focuses on the complete understanding of the design process. The material demonstrates important design rules starting with the selection of best oscillator topology, choice of transistors, and complete phase noise analysis that leads to optimum performance of all relevant oscillator features. Also included are CMOS oscillators, which recently have become important in cellular applications. For readers interested in specialized applications and topics, a full chapter provides all the necessary references. The contents of the text fall into two major categories: \* Chapters 1 through 9 deal with a very detailed and expanded single resonator oscillator, including a thorough treatment of both nonlinear analysis and phase noise \* Chapters 10 and 11 use the knowledge obtained and apply it to multiple coupled oscillators (synchronized oscillators) This text is partially based on research sponsored by the Defense Advanced Research Projects Agency (DARPA) and the United States Army and conducted by Synergy Microwave Corporation. With the wealth of information provided for the analysis and practical design of single and synchronized low-noise microwave oscillators, it is recommended reading for all RF microwave engineers. In addition, the text's comprehensive, step-by-step approach makes it an excellent graduate-level textbook.

**Zimbabwe** International Monetary Fund. African Dept.,2020-03-26 This 2019 Article IV Consultation focuses on Zimbabwe's near- and medium-term challenges and policy priorities and was prepared before COVID-19 became a global pandemic that has resulted in unprecedented strains in global trade, commodity, and financial markets. It, therefore, does not reflect the implications of these developments and related policy priorities. The outbreak has greatly amplified uncertainty and downside risks around the outlook. The IMF staff is closely monitoring the situation and will continue to work on assessing its impact and the related policy response in Zimbabwe and globally. With another poor harvest expected, growth in 2020 is projected at near zero, following a sharp contraction in 2019, with food shortages continuing. With no progress on clearing longstanding external arrears, the authorities face a difficult balance of pursuing tight monetary, to reduce very high inflation, and fiscal policies to address the macroeconomic imbalances and build confidence in the currency, while averting a crisis. Pressures are mounting to increase spending on wages and for social protection to mitigate the impact of the weather shocks and high inflation. While the 2020 budget includes a significant increase in social spending, it is likely insufficient to meet the pressing needs.

Annual Report on Exchange Arrangements and Exchange Restrictions 2007

International Monetary Fund. Monetary and Capital Markets Department,2007-10-16 Only the IMF is officially responsible for reporting the foreign exchange arrangements, exchange and trade restrictions, and prudential measures of its 185 member countries. This report draws upon information available to the IMF from a number of sources, including data provided in the course of official staff visits to member countries. Published since 1950, this

authoritative, annually updated reference is based upon a unique IMF-maintained database that tracks monetary exchange arrangements for each of its 185 members, including historical information, along with entries for Hong Kong SAR (People's Republic of China) and Aruba and Netherlands Antilles (both Kingdom of the Netherlands). An introduction to the volume provides a summary of recent global trends and developments in the areas covered by the publication. It also provides insight into the types of capital controls most frequently used by countries dealing with increased capital inflows. Individual chapters for each member country report exchange measures in place, the structure and setting of exchange rates, arrangements for payments and receipts, procedures for resident and nonresident accounts, mechanisms for import and export payments and receipts, controls on capital transactions, and provisions specific to the financial sector. A separate section in each chapter lists changes made during 2006 and the first half of 2007. Information is presented in a clear, easy-to-read tabular format.

#### Annual Report on Exchange Arrangements and Exchange Restrictions 1999

International Monetary Fund. Monetary and Capital Markets Department, 1999-09-17 The exchange and trade systems of IMF member countries are presented in this comprehensive volume in a tabular format. There is expanded coverage of the regulatory framework for capital movements. The information generally relates to the end of 1998 but also covers significant developments in early 1999. Published in September.

### **Annual Report on Exchange Arrangements and Exchange Restrictions 2004**

International Monetary Fund. Monetary and Capital Markets Department, 2004-09-23 This 2004 Annual Report on Exchange Arrangements and Exchange Restrictions provides a detailed description of the exchange arrangements and exchange/trade restrictions of

individual IMF member countries and Hong Kong Special Administrative Region, as well as Aruba and the Netherlands Antilles. The report highlights that the exchange rate of the kuna is determined in the foreign exchange market. The Croatian National Bank may set intervention exchange rates, which it applies in transactions with banks outside the interbank market to smooth undue fluctuations in the exchange rate.

Chronic Hepatitis B and C Chiaho Shih, 2012-09-17 The scope of the book is very broad, covering a wide range of areas in HBV/HDV and HCV research, including both basic and clinical science. The selected topics range from epidemiology, immunology, molecular virology and oncology, to clinical therapy. Chronic Hepatitis B and C consists of 14 chapters, each being a review of a special topic on HBV or HCV. While review articles on a special topic can be found in periodical journals, they tend to be more restricted in presentation. Therefore, this book will provide more in-depth coverage of what are presented as ?unpublished results? and ?data not shown? in journal articles. Furthermore, several authors in this book do not write review articles regularly. Some authors wrote reviews on a specific topic regularly, but they tried a new topic in this book (e.g., Dr. YF Liaw on ?natural course,? Dr. Shih on ?virion release,? Dr. Michael Lai on ?lymphotropism of HCV,? etc. ?). Overall, the book will offer useful information at the cutting age. Contents: Hepatitis B Virus: Natural Course of Chronic Hepatitis B Virus Infection (Chia-Ming Chu and Yun-Fan Liaw) Immune Response and Viral Hepatitis B (David R Milich) Epidemiology of Viral Hepatitis B-related Hepatocellular Carcinoma (Katherine A McGlynn, Alison A Evans and W Thomas London) Molecular Biology of HBV-related Hepatocellular Carcinoma (Amanda J Hodgson and Betty L Slagle) Treatment of Chronic Viral Hepatitis B and Drug Resistant Variants (Tin

Nguyen, Paul Desmond and Stephen Locarnini)Virion Secretion of Naturally Occurring Core Antigen Variants of Human Hepatitis B Virus (Chiaho Shih)Recent Developments in Hepatitis Delta Virus (Camille Sureau)Hepatitis C Virus: Development of an HCV Cell Culture System (Takanobu Kato and Takaji Wakita)Regulation of Innate Immunity and Interferon Defenses by Hepatitis C Virus (Stacy M Horner and Michael Gale Jr)Expression and Functions of Hepatitis C Virus F Protein (Kamile Yuksek and Jing-hsiung James Ou)Lymphotropism of Hepatitis C Virus (Keigo Machida and Michael M.C. Lai)Host Genetic Factors Control Hepatitis C Virus Infection (Yasuhito Tanaka and Masashi Mizokami)Treatment of Hepatitis C Virus Infection: Past, Present and Future (Chun-Jen Liu and Ding-Shinn Chen)Individualized Therapy for Chronic Hepatitis C (Ming-Lung Yu and Wan-Long Chuang) Readership: Researchers in virology, infectious diseases and cancer medicine.

### **Semigroups and Their Applications** Simon M. Goberstein, Peter M.

Higgins, 2012-12-06 Most papers published in this volume are based on lectures presented at the Chico Conference on Semigroups held on the Chico campus of the California State University on April 10-12, 1986. The conference was sponsored by the California State University, Chico in cooperation with the Engineering Computer Sciences Department of the Pacific Gas and Electric Company. The program included seven 50-minute addresses and seventeen 30-minute lectures. Speakers were invited by the organizing committee consisting of S. M. Goberstein and P. M. Higgins. The purpose of the conference was to bring together some of the leading researchers in the area of semigroup theory for a discussion of major recent developments in the field. The algebraic theory of semigroups is growing so rapidly and new important results are being produced at such a rate that the need for another meeting was well justified. It was hoped that the conference would help to disseminate new results more rapidly among those working in semigroups and related areas and that the exchange of ideas would stimulate research in the subject even further. These hopes were realized beyond all expectations.
