Storming the Reality Studio Larry McCaffery, 1991 The term cyberpunk entered the literary landscape in 1984 to describe William Gibson's pathbreaking novel *Neuromancer*. Cyberpunks are now among the shock troops of postmodernism, Larry McCaffery argues in *Storming the Reality Studio*, marshalling the resources of a fragmentary culture to create a startling new form. Artificial intelligence, genetic engineering, multinational machinations, frenetic bursts of prose, collisions of style, celebrations of texture: although emerging largely from science fiction, these features of cyberpunk writing are, as this volume makes clear, integrally related to the aims and innovations of the literary avant-garde. By bringing together original fiction by well-known contemporary writers (William Burroughs, Thomas Pynchon, Don DeLillo, Kathy Acker, J. G. Ballard, Samuel R. Delany), critical commentary by some of the major theorists of postmodern art and culture (Jacques Derrida, Fredric Jameson, Timothy Leary, Jean-François Lyotard), and work by major practitioners of cyberpunk (William Gibson, Rudy Rucker, John Shirley, Pat Cadigan, Bruce Sterling), *Storming the Reality Studio* reveals a fascinating ongoing dialog in contemporary culture. What emerges most strikingly from the colloquy is a shared preoccupation with the force of technology in shaping modern life. It is precisely this concern, according to McCaffery, that has put science fiction, typically the province of technological art, at the forefront of creative explorations of our unique age. A rich opportunity for reading across genres, this anthology offers a new perspective on the evolution of postmodern culture and ultimately shows how deeply technological developments have influenced our vision and our art. Selected Fiction contributors: Kathy Acker, J. G. Ballard, William S. Burroughs, Pat Cadigan, Samuel R. Delany, Don DeLillo, William Gibson, Harold Jaffe, Richard Kadrey, Marc Laidlaw, Mark Leyner, Joseph McElroy, Misha, Ted Mooney, Thomas Pynchon, Rudy Rucker, Lucius Shepard, Lewis Shiner, John Shirley, Bruce

Sterling, William Vollman Selected Non-Fiction contributors: Jean Baudrillard, Jacques Derrida, Joan Gordon, Veronica Hollinger, Fredric Jameson, Arthur Kroker and David Cook, Timothy Leary, Jean-François Lyotard, Larry McCaffery, Brian McHale, Dave Porush, Bruce Sterling, Darko Suvin, Takayuki Tatsumi

The design industry has evolved rapidly over the past decade. Effective and successful designers no longer need to just “make things,” they need to be curious thinkers who understand how to solve problems that have a true impact on the world we live in and how to show the power of designing for social good. Now more than ever, the graphic design industry needs a book that teaches the foundations and theories of design while simultaneously speaking to the topics of history, ethics, and accessibility in order to make designs that are the most effective for all people.

In *Powered by Design*, educator, designer, and public speaker Renee Stevens brings a truly up to date and thoughtful approach to an introduction to graphic design. As Assistant Professor at the S.I. Newhouse School of Communication at Syracuse University, Stevens created this book to be at home equally in academia and outside of the school setting. With a conversational and approachable tone, Stevens’ book is for anyone who wants to gain a more practical understanding of what graphic design is today, and the power and potential it has: from students to novice graphic designers to anyone who wants to build a solid foundation of design skills so that they can work more effectively with professional designers. Stevens covers topics such as:

- Choosing the right typeface
- Hierarchy and visual weight
- Creating design systems

- Balancing tension
- Visualizing data
- Understanding color and mood
- Defining a story structure
- User testing and critique
- Immersive design (designing for all the senses)
- Determining when a design is finished
- How to make a living with design

Woven throughout is the crucial idea that you must embrace empathy in everything you design in order to create work that is the most inclusive. Design has the power and potential to make real impact in our everyday lives, and this book will show you how to do that starting with your first design experience.

Disney Stories: Getting to Digital explores how Disney, the man and the company, used technological innovation to create characters and stories that engage audiences in many different media, in particular in Video Games and on the Internet. Drawing on Disney films from the twenties and thirties, as well as the writings of historians, screenwriters and producers, Disney Stories: Getting to Digital explains how new film and animation techniques, many developed by Disney, worked together to evolve character and content development and produce entertaining stories that riveted audiences. Through an insider's perspective of Disney's legendary creation process, the book closely examines how the Disney Company moved its stories into the digital world in the 1990s and the virtual, online communities of the 2000s. By embracing the digital era, Disney led storytelling and technological

innovation by granting their audience the unique opportunity to take part in their creation process through their online games, including The Lion King Animated Story Book, Disney Blast and Toontown. Disney Stories: Getting to Digital is intended for Disney fans and current practitioners looking to study the creation process of one of the most famous animation studios in existence. Professors teaching courses in new media, animation and interactive storytelling will also find this book a valuable asset.

Suspending Reality Benjamin Noriega-Ortiz,Linda

O'Keeffe,2014-11-18 The first monograph of one of today's most influential interior designers, with dazzling residences designed for Sean Combs, Lenny Kravitz, and Mexican novelist Laura Esquivel. *Suspending Reality* draws on over sixty of Benjamin Noriega-Ortiz's projects, designed over his firm's twenty-year history, to provide both a long-awaited peek into the creative mind of a celebrity designer, and a generous dose of advice for those inspired to decorate show-stopping rooms of their own. Lively chapters cover everything from how to evaluate an empty room or use a client's Pinterest page to generate a storyboard, to how to create a sense of procession in an entryway or hall, and specific tips for lighting with a mix of incandescent, LED, and even florescent lights. This comprehensive book includes projects from Noriega-Ortiz's own famed all-white Manhattan apartment—in a

stunning chapter on all-white rooms—to luxury spaces in the Dakota, Mark Seliger’s former factory loft on New York’s West Side Highway, a Paris pied-a-terre, a modern house in Venice, California, Lenny Kravitz’s Mediterranean-style mansion, and a beach house in Quogue whose kitchen cabinets are studded with Swarovski crystals. Learn the stories behind iconic designs for the Mondrian hotels around the country, inspired by Jean Cocteau and the Garden of Eden, find transformative tricks for mirrors, or simply daydream about the luminous glass and metal roof over the Like Water for Chocolate author’s study and writing room. Noriega-Ortiz explains how he captures the unusual sense of openness, light, and positivity in his projects—whether with works by Cindy Sherman and Louise Bourgeois, or furniture from West Elm—through his use of color, materials, and spatial sleight of hand. An ethereal curtain creates unexpected mystery, a bold splash of color invigorates the senses, and a seat upholstered in a tactile material like Mongolian lamb beckons to be touched. Each space is tempered by a whimsical element meant to pull us out of everyday life and to inject a moment of fantasy and delight, to defy expectations and create the kind of comfort that suspends reality.

Carlos Betancourt Petra Mason,2015-10-20 Mixed-media artist Carlos Betancourt and his influential studio, Imperfect Utopia, helped to launch the Miami art scene in the 1980’s. Betancourt’s oeuvre is a lush explosion of radiant, eccentric colors in which he explores the kaleidoscope (multi-racial, multi-lingual, trans-cultural) of Caribbean and American culture. His work alludes to issues of memory, beauty, identity, and communication. He bends the lines between art, photography, and nature in his photographs, collages, painting, installations, and conceptual pieces. Carlos Betancourt’s imagery reinterprets the past and present and offers it in a fresh context. He is inspired by Puerto

Rico, Miami, and his extensive travels; also artist Ana Mendieta's interventions in nature, Robert Rauschenberg's assemblages, Andy Warhol's perceptions, Neo Rauch compositions, and a Federico Fellini-esque cast of characters for his photo assemblages. This exuberant volume explores Betancourt's body of work, with more than 250 images and texts by art critic Paul Laster, art history professor Robert Farris Thompson and United States Inaugural Poet, Richard Blanco. His artwork is included in the permanent collections of various museums, including The Metropolitan Museum of Art, The National Portrait Gallery, and The Smithsonian Institute.

Altered Pasts Richard J. Evans, 2014-02-14 A bullet misses its target in Sarajevo, a would-be Austrian painter gets into the Viennese academy, Lord Halifax becomes British prime minister in 1940 instead of Churchill: seemingly minor twists of fate on which world-shaking events might have hinged. Alternative history has long been the stuff of parlor games, war-gaming, and science fiction, but over the past few decades it has become a popular stomping ground for serious historians. The historian Richard J. Evans now turns a critical, slightly jaundiced eye on a subject typically the purview of armchair historians. The book's main concern is examining the intellectual fallout from historical counterfactuals, which the author defines as alternative versions of the past in which one alteration in the timeline leads to a different outcome from the one we know actually occurred. What if Britain had stood at the sidelines during the First World War? What

if the Wehrmacht had taken Moscow? The author offers an engaging and insightful introduction to the genre, while discussing the reasons for its revival in popularity, the role of historical determinism, and the often hidden agendas of the counterfactual historian. Most important, Evans takes counterfactual history seriously, looking at the insights, pitfalls, and intellectual implications of changing one thread in the weave of history. A wonderful critical introduction to an often-overlooked genre for scholars and casual readers of history alike.

A Violent Embrace renée c. hoogland, 2014-01-07 Instead of asking questions about the symbolic meaning or underlying truth of a work of art, renée c. hoogland is concerned with the actual work that it does in the world (whether intentionally or not). Why do we find ourselves in tears in front of an abstract painting? Why do some cartoons of the prophet Muhammad generate worldwide political outrage? What, in other words, is the compelling force of visual images, even—or especially—if they are nonfigurative, repulsive, or downright ugly? Rather than describing, analyzing, and interpreting artworks, hoogland approaches art as an event that obtains on the level of actualization, presenting retellings of specific artistic events in the light of recent interventions in aesthetic theory, and proposing to conceive of the aesthetic encounter as a potentially disruptive, if not violent, force field with material, political, and practical consequences.
