Annual Report United States. Small Business Administration,

Topics in Oceanic Morphosyntax Claire Moyse-Faurie, Joachim Sabel, 2011-10-27 This monograph is a collection of selected papers on Oceanic languages. For the first time, aspects of the morphology and syntax of Oceanic languages such as the encoding of sentence types, the structure of the noun phrase, noun incorporation, constituent order, and ergative vs. accusative alignment are discussed from a comparative point of view, thus drawing attention to genetic, areal and language-specific features. The individual papers are based on the field work of the authors on lesser-described and endangered languages and are basically descriptive studies. At the same time they also explore the theoretical implications of the data presented and analyzed, as well as the historical development of certain morpho-syntactic phenomena, without basing these explorations on a single theoretical framework. The book provides new insights into the morphosyntactic structures of Oceanic languages and is of interest primarily for linguists working on Austronesian, in particular Melanesian, Micronesian, and Polynesian languages, but also for typologists and linguists working on language change.

The Kawa Model Michael K. Iwama, 2006-07-28 A landmark publication in occupational therapy and a significant contribution to the rehabilitation theory literature! The Kawa Model presents a new conceptual model of practice that differs from contemporary theories in regard to: origin (East Asia), underlying philosophical base (East Asia), being heavily infused with a natural-ecological, holistic world view, and relational structure. The model is based on the metaphor of nature (a river) that stands for the meanings of life. Because of the familiarity of the metaphor, to both therapists and clients alike, the Kawa Model is relatively easy to comprehend, remarkably simple, yet comprehensive and effective. Unlike other models, it was raised from clinical practice, by practitioners, through a process of qualitative research methods. It is the first conceptual model and substantial theoretical work of occupational therapy from outside of the Western world. A 'must-read' for all students of occupational therapy The first substantial work in occupational therapy from outside of the Western world Introduces an Eastern perspective on matters of theory and culture in occupational therapy Eight case studies, four from Western practice contexts and four from the East Developed by clinicians and practitioners for their peers Questions the cultural boundaries of occupational therapy, its knowledge (epistemology), theory and practice. It puts the reader in touch with the cultural nature of self, client and profession Enables readers to develop critical analysis skills for examining matters of theory and culture, as opposed to learning theory as 'recipes'

Distributed Processing Burt H. Liebowitz, John Hargadine Carson, 1981 The purpose of this tutorial is to introduce distributed processing concepts. These concepts can be used to determine the relevance of a distributed processing approach to the reader's computing needs. Those considering the use of distributed systems will be confronted with managerial and technical issues, but this tutorial focuses on the technological issues. The technological issues involve communications, intercomputer coupling, executive software structures, system architecture, component selection, and allocation of functions and data files to multiple processors.

A Concise History of Afghanistan in 25 Volumes Hamid Wahed Alikuzai, 2013-10 For 35,000 years ancient Afghanistan was called Aryana (the Light of God) has existed. Then in 747 AD what is today called Afghanistan became Khorasan (which means Sunrise in Dari) which was a much larger geographical area. In the middle of the nineteenth century the name Afghanistan, which means home of the united tribes, was applied originally by the Saxons (present day British) and the Russians. During the Great Games in the middle of nineteenth century, the Durand Line was created in 1893 and was in place until 1993. Saxons created the state of Afghanistan out of a geographical area roughly the size of Texas: in 1893 before which there were 10 million square kilometers, larger than the size of Canada, as means to act as a buffer zone between the Saxon-India & Tsarist-Russia and the Chinese.
