The Red Web Andrei Soldatov, Irina Borogan, 2015-09-08 A Library Journal Best Book of 2015 A NPR Great Read of 2015 The Internet in Russia is either the most efficient totalitarian tool or the device by which totalitarianism will be overthrown. Perhaps both. On the eighth floor of an ordinary-looking building in an otherwise residential district of southwest Moscow, in a room occupied by the Federal Security Service (FSB), is a box the size of a VHS player marked SORM. The Russian government's front line in the battle for the future of the Internet, SORM is the world's most intrusive listening device, monitoring e-mails, Internet usage, Skype, and all social networks. But for every hacker subcontracted by the FSB to interfere with Russia's antagonists abroad -- such as those who, in a massive denial-of-service attack, overwhelmed the entire Internet in neighboring Estonia -- there is a radical or an opportunist who is using the web to chip away at the power of the state at home. Drawing from scores of interviews personally conducted with numerous prominent officials in the Ministry of Communications and web-savvy activists challenging the state, Andrei Soldatov and Irina Borogan peel back the history of advanced surveillance systems in Russia. From research laboratories in Soviet-era labor camps, to the legalization of government monitoring of all telephone and Internet communications in the 1990s, to the present day, their incisive and alarming investigation into the Kremlin's massive online-surveillance state exposes just how easily a free global exchange can be coerced into becoming a tool of repression and geopolitical warfare. Dissidents, oligarchs, and some of the world's most dangerous hackers collide in the uniquely Russian virtual world of *The Red Web*.

Red Gloves Rebecca Watts, 2020-06-25 In this follow-up to her acclaimed debut *The Met Office Advises Caution*, Rebecca Watts observes and tests the limits of humanity's engagement with the non-human. By turns lyrical and narrative, the poems examine familiar subjects - environmental crisis, hawks, hospitals, the sea, barbecues, flowers, Emily Dickinson - only to find their subjects staring, sometimes fighting, back. Nature and nurture, equally red in tooth and claw, power a book-long sparring match between the overthinking poet and the ever-thoughtless universe, between the craft's isolation and the world's irrepressible variety. Gloves on and gloves off, the poet's hands destroy and build, gather and scatter, caress and strike.

Red Book 2015 David W. Kimberlin, MD, FAAP, Sarah S Long, Michael T. Brady, Mary Anne Jackson, 2015-05 The AAP's authoritative guide to the manifestations, etiology, epidemiology, diagnosis, and treatment of more than 200 childhood conditions. -- Provided by publisher.

A Cultural History of Plants in the Modern Era Stephen Forbes, 2023-12-14 A Cultural History of Plants in the Modern Era covers the period from 1920 to today - a time when population growth, industrialization, global trade, and consumerism have fundamentally reshaped our relationship with plants. Advances in agriculture, science, and technology have revolutionised the ways we feed ourselves, whilst urbanization and industrial processing have reduced our direct connection with living plants. At the same time, our understanding of both ecology and conservation have greatly increased and our appreciation of the meanings and aesthetics of plants continue to suffuse art and everyday culture. The modern era has witnessed a revolution in both the valuation and the destruction of the natural world - more than ever before, we understand that the vitality of our relationship with plants will shape our future. The 6 volume set of the Cultural History of Plants presents the first comprehensive history of the uses and meanings of plants from prehistory to today. The themes covered in each volume are plants as staple foods; plants as luxury foods; trade and exploration; plant technology and science; plants and medicine; plants in culture; plants as natural ornaments; the representation of plants. Stephen Forbes is an independent scholar and writer, based in Australia. Volume 6 in the Cultural History of Plants set. General Editors: Annette Giesecke, University of Delaware, USA, and David Mabberley, University of Oxford, UK.

New Frontiers of Philanthropy Lester M. Salamon, 2014-06-13 The resources of both governments and traditional philanthropy are either barely growing or in decline, yet the problems of poverty, ill-health, and environmental degradation balloon daily. It is therefore increasingly clear that we urgently need new models for financing and promoting social and environmental objectives. Fortunately, a significant revolution appears to be underway on the frontiers of philanthropy and social investing, tapping not only philanthropy, but also private investment capital, and providing at least a partial response to this dilemma. This book examines the new actors and new tools that form the heart of this revolution, and shows how they are reshaping the way we go about supporting solutions to social and environmental problems throughout the world. With contributions from leading experts in the field, *New Frontiers of Philanthropy* provides a comprehensive analysis of the many new institutions that have surfaced on this new frontier of philanthropy and social investment; the new tools and instruments these institutions are bringing to bear; the challenges that these actors and tools still encounter; and the steps that are needed to maximize their impact. The result is a powerful and accessible guide to developments that are already bringing significant new resources into efforts to solve the world's problems of poverty, ill-health, and environmental degradation; unleashing new energies and new sources of ingenuity for social and environmental problem-solving; and generating new hope in an otherwise dismal scenario of lagging resources and resolve. Investors, philanthropists, social entrepreneurs, nonprofit leaders, business executives, government officials, and students the world over will find much to build on in these pages.

Routledge Handbook of NGOs and International Relations Thomas Davies, 2019-04-09 Offering insights from pioneering new perspectives in addition to well-established traditions of research, this Handbook considers the activities not only of advocacy groups in the environmental, feminist, human rights, humanitarian, and peace sectors, but also the array of religious, professional, and business associations that make up the wider non-governmental organization (NGO) community. International contributors from a range of disciplines cover all the major aspects of research into NGOs in International Relations to present: a comprehensive overview of the historical evolution of NGOs, the range of structural forms and international networks coverage of major theoretical perspectives illustrations of how NGOs are influential in every prominent issue-area of contemporary International Relations evaluation of the significant regional variations among NGOs and how regional contexts influence the nature and impact of NGOs analysis of the ways NGOs address authoritarianism, terrorism, and challenges to democracy, and how NGOs handle concerns surrounding their own legitimacy and accountability. Exploring contrasting theories, regional dimensions, and a wide range of contemporary challenges facing NGOs, this Handbook will be essential reading for students, scholars, and practitioners alike.
