 EUROPEAN SUSTAINABLE CARRIAGE OF GOODS Ellen Eftestl-Wilhelmsson,2015-10-05 This work discusses the rapidly developing European transport policy on sustainable freight and the connected efforts initiated by the European Commission (EC) on greening transport by the means of contract law. Greening transport has been a central goal for the EU for decades. The main problem has been, and still is, that far too much carriage of goods within the EU is performed unimodally: by road carriage alone. This has caused severe problems particularly in central Europe, where both trade and environment is suffering from an ineffective transport industry with growing problems of congestion and pollution. A modal shift in transport from mainly road based to a form of transport in which more environmental friendly modes such as rail, inland waterways and sea born transport are integrated into one transport chain, is hence an objective of the EU. If successful, this model could then be extended to the international transport community. The key question raised in this book is whether the traditional role of contract law is changing to such an extent that the parties involved must take external interests into account. In the case of the EU’s efforts to enhance sustainable carriage of goods within its realm, the author explores whether governmental interference is necessary, or if we can trust that the parties will integrate environmental issues into their contracts because there is a demand for such clauses. The different proposals for an EU regime on multimodal contracts of carriage are discussed in this context. This book will be of great relevance to academics and practitioners with an interest in EU law, transport law, environmental law and maritime law in general.

 CARRIAGE OF GOODS BY SEA, LAND AND AIR Baris Soyer,Andrew Tettenborn,2013-08-15 Written by a combination of top academics, industry experts and leading practitioners, this book offers a detailed insight into both unimodal and multimodal carriage of goods. It provides a comprehensive and thoroughly practical guide to the issues that matter today on what is a very complex area of law. From the papers delivered at the 8th International Colloquium organised by Swansea Law School’s prestigious Institute of International Shipping and Trade Law, this original work considers current opinions, trends and issues arising from contracts of carriage of goods by sea, land, air, and multi-modal combinations of these, not to mention the legal position of vital participants such as freight forwarders, terminal operators and cargo insurers. The topics under discussion range through issues such as paperwork, piracy, liability for defective containers, damage in transit, the CMR Convention, and the possible effects of the Rotterdam Rules. An indispensable resource for transport lawyers, industry professionals, academics and post-graduate students of maritime law.

 MAPPING INNOVATION Mohab Anis,Sarah Chawky,Aya Abdel Halim,2022-08-24 This book is an eye-opener for businesses unveiling how technology trends can be deployed to redesign products, services and processes. The authors provide business opportunities based on technological innovation across 10 industrial sectors in easy to read case studies. Each case study is a story that narrates the potential and influence of a technological innovation on an enterprise, by defining the challenges faced, the type of technology adopted, and the impact. Provides readers with compelling reasons for implementing technology trends in industrial value chains; Written in a simple, easy to read and exciting manner to be accessible to readers with different backgrounds and interests; Uses a single, structured paradigm in all the case studies.
 INTERDISCIPLINARY TOPICS IN APPLIED MATHEMATICS, MODELING AND COMPUTATIONAL SCIENCE Monica G. Cojocaru,Ilias S. Kotsireas,Roman N. Makarov,Roderick V. N. Melnik,Hasan Shodiev,2015-07-03 The Applied Mathematics, Modelling, and Computational Science (AMMCS) conference aims to promote interdisciplinary research and collaboration. The contributions in this volume cover the latest research in mathematical and computational sciences, modeling, and simulation as well as their applications in natural and social sciences, engineering and technology, industry, and finance. The 2013 conference, the second in a series of AMMCS meetings, was held August 26—30 and organized in cooperation with AIMS and SIAM, with support from the Fields Institute in Toronto, and Wilfrid Laurier University. There were many young scientists at AMMCS-2013, both as presenters and as organizers. This proceedings contains refereed papers contributed by the participants of the AMMCS-2013 after the conference. This volume is suitable for researchers and graduate students, mathematicians and engineers, industrialists, and anyone who would like to delve into the interdisciplinary research of applied and computational mathematics and its areas of applications.

 AMERICAN INTERNATIONAL LAW CASES FOURTH SERIES 2009 VOLUME 2 Oceana Editorial Board,2010-12-24 American International Law Cases is the only case law reporter that presents U.S. domestic court opinions related to international law. Since Oceana handpicks each case and categorizes each according to topic, legal researchers will find that this series has already completed for them the first few tedious steps of research. With American International Law Cases, the time-consuming process of weeding out unhelpful cases from an online search is no longer necessary. Volume Two of AILC consists of cases concerning territories, trusteeships, boundaries and navigable waters, covering marine torts and crimes and death on the high seas by wrongful act.
