Digital Communication Management Beatriz Peña-Acuña, 2018-09-19 The director of communication is an impassioned profession that discovers which strategies are the best and the most intelligent. There are few manuals, and there are some that offer general and sparsely updated information about the change that new technologies imply. We find the literature isolated that can be directly useful. However, we will say that there is no single recipe for DirCom or communication consultants. Each one will offer different models according to the variables or factors that seem to them to be able to rectify the direction of a company according to his or her personal mood.

Digital Justice Ethan Katsh, Orna Rabinovich-Einy, 2017-03-09 Improving access to justice has been an ongoing process, and on-demand justice should be a natural part of our increasingly on-demand society. What can we do for example when Facebook blocks our account, we're harassed on Twitter, discover that our credit report contains errors, or receive a negative review on Airbnb? How do we effectively resolve these and other such issues? Digital Justice introduces the reader to new technological tools to resolve and prevent disputes bringing dispute resolution to cyberspace, where those who would never look to a court for assistance can find help for instance via a smartphone. The authors focus particular attention on five areas that have seen great innovation as well as large volumes of disputes: ecommerce, healthcare, social media, labor, and the courts. As conflicts escalate with the increase in innovation, the authors emphasize the need for new dispute resolution processes and new ways to avoid disputes, something that has been ignored by those seeking to improve access to justice in the past.

EU Internet Law in the Digital Single Market Tatiana-Eleni Synodinou,Philippe Jougoux,Christiana Markou,Thalia Prastitou-Merdi,2021-06-25 With the ongoing evolution of the digital society challenging the boundaries of the law, new questions are arising – and new answers being given – even now, almost three decades on from the digital revolution. Written by a panel of legal specialists and edited by experts on EU Internet law, this book provides an overview of the most recent developments affecting the European Internet legal framework, specifically focusing on four current debates. Firstly, it discusses the changes in online copyright law, especially after the enactment of the new directive on the single digital market. Secondly, it analyzes the increasing significance of artificial intelligence in our daily life. The book then addresses emerging issues in EU digital law, exploring out of the box approaches in Internet law. It also presents the last cyber-criminality law trends (offenses, international instrument, behaviors), and discusses the evolution of personal data protection. Lastly, it evaluates the degree of consumer and corporate protection in the digital environment, demonstrating that now, more than ever, EU Internet law is based on a combination of copyright, civil, administrative, criminal, commercial and banking laws.

Research Handbook on Digital Transformations F. Xavier Olleros,Majlinda Zhegu,2016-09-30 The digital transition of our economies is now entering a phase of broad and deep societal impact. While there is one overall transition, there are many different sectoral transformations, from health and legal services to tax reports and taxi rides, as well as a rising number of transversal trends and policy issues, from widespread precarious employment and privacy concerns to market monopoly and cybercrime. They all are fertile ground for researchers, as established laws and regulations, organizational structures, business models, value networks and workflow routines are contested and displaced by newer alternatives. This Research Handbook offers a rich and interdisciplinary synthesis of some of the current thinking on the digital transformations underway.

Digital Learning in High-Needs Schools Heejung An,David A. Fuentes,2023-06-21 Digital Learning in High-Needs Schools examines the challenges and affordances that arise when high-needs school communities integrate educational technologies into their unique settings. Although remote, blended, and networked learning are ubiquitous today, a number of cultural, economic, and political realities—from the digital divide and digital literacy to poverty and language barriers—affect our most vulnerable and underresourced teachers and students. This book uses critical theory to compassionately scrutinize and unpack the systemic issues that impact high-needs schools’ implementation of digital learning tools. Incisive sociocultural analyses across fifteen original chapters explore the intersection of society, technology, people, politics, and education in high-needs school contexts. Informed by real-world cases pertaining to technology infrastructure, formative feedback, Universal Design for Learning, and more, these chapters illuminate how best practices emerge from culturally responsive and context-specific foundations.

Collisions in the Digital Paradigm David John Harvey,2017-03-23 It has been said that the only asset that a lawyer has is time. But the reality is that a lawyer's greatest asset is information. The practice and the business of law is all about information exchange. The flow of information travels in a number of different directions during the life of a case. A client communicates certain facts to a lawyer. The lawyer assimilates those facts and seeks out specialised legal information which may be applicable to those facts. In the course of a generation there has been a technological revolution which represents a paradigm shift in the flow of information and

communication. Collisions in the Digital Paradigm is about how the law deals with digital information technologies and some of the problems that arise when the law has to deal with issues arising in a new paradigm.

Digital Classical Philology Monica Berti, 2019-08-05 Die verbreiteten Begriffe ‚Informationsgesellschaft‘ und ‚Age of Access‘ suggerieren die problemlose allseitige Zugänglichkeit von Information. Doch Information ist in der Realität in vielerlei Hinsicht unzugänglich - physisch, wirtschaftlich, intellektuell, sprachlich, politisch, technisch. Zudem entstehen täglich neue Techniken und Praktiken der Zugänglichmachung. Schließlich zeigen sich in verschiedenen Bereichen die Grenzen der Forderung nach Zugänglichkeit. Diese neue Buchreihe bringt Wissenschaftler und Praktiker verschiedenster Prägung zusammen, um die verschiedenen Dimensionen der Unzugänglichkeit von Information auszuloten sowie Prinzipien und Techniken ihrer praktischen und gesellschaftlichen Überwindung aufzuzeigen, aber auch notwendige Grenzen der Zugänglichkeit deutlich zu machen. Sustainable Boardrooms Apoorvi Shrivastava, Amlan Bhusan, 2023-11-15 This book discusses various interactions in the sustainability and development sector. It presents a thematic approach to describe progressive models and cases on disruptions, innovations, regulatory and institutional evolution related to the area of sustainability, through an organizational and boardroom level governance lens. It documents how certain schools of thought, models of engagement and methods-platforms-practices impact society and while doing so, brings together varying theoretical debates, practicing models and instruments of transformation in green governance. Sustainable policy making demands a whole of government approach in decision-making processes. Further, inclusiveness and ‘green’ consciousness of corporate boardrooms are paramount, without which, effective socially responsible business practices are absurd. Human resource development, shaped on sustainable corporate ethics, requires well-trained sustainability specialists, managers that can think ‘green’ in their overall decision making which are essential for green governance. In this context, the book creates a functional, interpretive repertoire of stories, commentaries, life experiences, and reflections of corporate leaders, academics, and practicing consultants, on their decision-making processes, and how they interpret sustainability. These stories and thoughts help create a functional academic construct, which will assist academics teach ‘green’ competencies to business school students better, and entrepreneurs and business executives to better understand the idea of sustainable growth.

Digital Family Justice Mavis Maclean, Bregje Dijksterhuis, 2019-12-12 The editors' earlier book Delivering Family Justice in the 21st Century (2016) described a period of turbulence in family justice arising from financial austerity. Governments across the world have sought to reduce public spending on private quarrels by promoting mediation (ADR) and by beginning to look at digital justice (ODR) as alternatives to courts and lawyers. But this book describes how mediation has failed to take the place of courts and lawyers, even where public funding for legal help has been removed. Instead ODR has developed rapidly, led by the Dutch Rechtswijzer. The

authors question the speed of this development, and stress the need for careful evaluation of how far these services can meet the needs of divorcing families. In this book, experts from Canada, Australia, Turkey, Spain, Germany, France, Poland, Scotland, and England and Wales explore how ADR has fallen behind, and how we have learned from the rise and fall of ODR in the Rechtwijzer about what digital justice can and cannot achieve. Managing procedure and process? Yes. Dispute resolution? Not yet. The authors end by raising broader questions about the role of a family justice system: is it dispute resolution? Or dispute prevention, management, and above all legal protection of the vulnerable?
