IFZ FinTech study 2017 : an overview of Swiss FinTech Thomas Ankebrand, 1966-,2017 The “IFZ FinTech Study 2017” of the Lucerne University of Applied Sciences and Arts provides interested parties with a comprehensive overview of the Swiss FinTech sector. The first part of the study describes the ecosystem of FinTech: On the one hand, it deals with the political and legal, economic, social, as well as technological environment. On the other hand, it provides the reader with an evaluation of the business models of 190 Swiss FinTech companies. The second part of the study introduces the reader in more detail to 104 Swiss companies that offer digital financial services. These overviews of the companies include information about target markets, distribution channels and revenue models, as well as various business performance indicators.

Marketplace Lending, Financial Analysis, and the Future of Credit Ioannis Akkizidis,Manuel Stagars,2015-12-08 The time for financial technology innovation is now Marketplace Lending, Financial Analysis, and the Future of Credit clearly explains why financial credit institutions need to further innovate within the financial technology arena. Through this text, you access a framework for applying innovative strategies in credit services. Provided and supported by financial institutions and entrepreneurs, the information in this engaging book encompasses printed guidance and digital ancillaries. Peer-to-peer lenders are steadily growing within the financial market. Integrating peer-to-peer lending into established credit institutions could strengthen the financial sector as a whole, and could lead to the incorporation of stronger risk and profitability management strategies. Explain (or Explore) approaches and challenges in financial analysis applied to credit risk and profitability Explore additional information provided via digital ancillaries, which will further support your understanding and application of key concepts Navigate the information organised into three subject areas: describing a new business model, knowledge integration, and proposing a new model for the Hybrid Financial Sector Understand how the rise of fintech fits into context within the current financial system Follow discussion of the current status quo and role of innovation in the financial industry, and consider the financial technology innovation landscape from the perspective of an entrepreneur Marketplace Lending, Financial Analysis, and the Future of Credit is a critical text that bridges the gap in understanding between financial technology entrepreneurs and credit institutions.

Impact Investment Funds for Frontier Markets in Southeast Asia Manuel Stagars, 2015-05-28 Until now, most socially responsible and impact investments have centred on developed markets, with growth potential and investment opportunities in the frontier economies of countries such as Cambodia, Laos, Myanmar, and Vietnam being mostly overlooked. While some individuals and organizations have begun to develop responsible investment opportunities with these countries in mind, large new sources of capital for development could still emerge. This book explores the greater potential for global investment in Southeast Asia, and the ways in which socially responsible investment styles can be used in their developing economies. It demonstrates how the benefits of investment could create a robust platform for separate stakeholders, including governments, non-governmental organizations, development banks, the financial sector, and small and medium sized enterprises. The author explores how shaping collaborative sustainable investment policies could speed up inclusive development, address the needs of those at the bottom of the pyramid, and ensure sustainable future growth.

University Startups and Spin-Offs Manuel Stagars, 2014-11-27 University Startups and Spin-Offs teaches university students, researchers, and educators the most effective strategies and tactics for launching their own startups from academic platforms with the backing of school programs, public grants, incubators, seed accelerators, and private partnerships in all parts of the world. Serial entrepreneur Manuel Stagars advises students, faculty, and researchers how to test their ideas for marketability, how to develop commercial products out of research projects, and how to engage companies and investors with attractive value propositions. The author has seventeen years of experience as startup entrepreneur, founder of seven companies in the United States, Europe, and Japan, consultant to universities on commercializing their research programs, angel investor, and startup mentor. Stagars' advice is field-tested, battle-hardened, and supported with a wealth of instructive first-hand examples from his international experience. The author advises academic entrepreneurs to take matters into their own hands instead of relying on the initiative and support of universities and governments. He shows students and researchers how to fit lean startup methods to their existing university ecosystems, leveraging their strengths without getting bogged down in bureaucratic morass. Avoiding theory and jargon, the book focuses on real-world situations, practical steps, checklists, and case studies. University students and researchers will learn the skills they need to become startup entrepreneurs on an academic platform. The final part of University Startups and Spin-Offs addresses university administrators, educators, technology licensing officers, incubator managers, and government grant officers. It shows them with practical examples from the private and academic sectors how to integrate startups into the fabric of the university, develop a thriving entrepreneurial ecosystem for students and researchers, leverage latent network effects, build bridges between scientific research and industries seeking innovative solutions, enhance the public image of the university, and motivate the university's best and brightest to engage in startup enterprises that will deliver benefits to the university and the public as well as to themselves.

Open Data in Southeast Asia Manuel Stagars, 2016-06-27 This book explores the power of greater openness, accountability, and transparency in digital information and government data for the nations of Southeast Asia. The author demonstrates that, although the term "open data" seems to be self-explanatory, it involves an evolving ecosystem of complex domains. Through empirical case studies, this book explains how governments in the ASEAN may harvest the benefits of open data to maximize their productivity, efficiency and innovation. The book also investigates how increasing digital divides in the population, boundaries to civil society, and shortfalls in civil and political rights threaten to arrest open data in early development, which may hamper post-2015 development agendas in the region. With robust open data policies and clear roadmaps, member states of the ASEAN can harvest the promising opportunities

of open data in their particular developmental, institutional and legal settings. Governments, policy makers, entrepreneurs and academics will gain a clearer understanding of the factors that enable open data from this timely research.

Data Quality in Southeast Asia Manuel Stagars, 2016-06-16 This book explores the reliability of official statistical data in the ASEAN (the Association of Southeast Asian Nations), and the benefits of a better vocabulary to discuss the quality of publicly available data to address the needs of all users. It introduces a rigorous method to disaggregate and rate data quality into principal factors containing a total of ten dimensions, which serves as the basis for a discussion on the opportunities and challenges for data quality, capacity building programs and data policy in Southeast Asia. Tools to standardize and monitor statistical capacity and data quality are presented, as well as methods and data sources to analyse data quality. The book analyses data quality in Indonesia, Malaysia, Singapore, the Philippines, Thailand, Vietnam, Brunei, Laos, Cambodia, and Myanmar, before concluding with thoughts on Open Data and the ASEAN Economic Community (AEC).

Compound-specific Stable Isotope Analysis Maik A Jochmann, Torsten C Schmidt, 2015-11-09 The use of Compound-specific Stable Isotope Analysis (CSIA) is increasing in many areas of science and technology for source allocation, authentication, and characterization of transformation reactions. Until now, there have been no textbooks available for students with an analytical chemical background or basic introductory books emphasising the instrumentation and theory. This book is the first to focus solely on stable isotope analysis of individual compounds in sometimes complex mixtures. It acts as both a lecture companion for students and a consultant for advanced scientists in fields including forensic and environmental science. The book starts with a brief history of the field before going on to explain stable isotopes from scratch. The different ways to express isotope abundances are introduced together with isotope effects and isotopic fractionation. A detailed account of the required technical equipment and general procedures for CSIA is provided. This includes sections on derivatization and the use of microextraction techniques in GC-IRMS. The very important topic of referencing and calibration in CSIA is clearly described. This differs from approaches used in quantitative analysis and is often difficult for the newcomer to comprehend. Examples of successful applications of CSIA in food authenticity, forensics, archaeology, doping control, environmental science, and extraterrestrial materials are included. Applications in isotope data treatment and presentation are also discussed and emphasis is placed on the general conclusions that can be drawn from the uses of CSIA. Further instrumental developments in the field are highlighted and selected experiments are introduced that may act as a basis for a short practical course at graduate level.
