Art in a Democracy Ben Fink,2023-03-14 Collaborative plays with diverse ensembles across the country address pressing issues of our times The plays in Volume 2 come from Roadside's intercultural and issue-specific theater work, including long-term collaborations with the African American Junebug Productions in New Orleans and the Puerto Rican Pregones Theater in the South Bronx, as well as with residents on both sides of the walls of recently-built prisons. Roadside has spent 45 years searching for what art in a democracy might look like. The anthology raises questions such as, What are common principles and common barriers to achieving democracy across disciplines, and how can the disciplines unite in common democratic cause?

Personality Disorders in the 10th and 11th Editions of the International Classification of Diseases Elias Abdalla-Filho,2022-02-14 This book provides a clinical and forensic approach to personality disorders. It references the 10th and 11th editions of the International Classification of Diseases (ICD-10 and ICD-11). It allows the reader to compare categorical (ICD-10) and dimensional (ICD-11) classifications and consider a third—hybrid—classification, as advocated by several scholars. Laying down various diagnostic and therapeutic guidelines, this book will appeal to clinical and forensic psychiatrists, psychologists, residents of psychiatry, and students of medicine and psychology.

Encounters in Video Art in Latin America Elena Shtromberg,Glenn Phillips,2023-02-14 With insightful essays and interviews, this volume examines how artists have experimented with the medium of video across different regions of Latin America since the 1960s. The emergence of video art in Latin America is marked by multiple points of development, across more than a dozen artistic centers, over a period of more than twenty-five years. When it was first introduced during the 1960s, video was seen as empowering: the portability of early equipment and the possibility of instant playback allowed artists to challenge and at times subvert the mainstream media. Video art in Latin America was—and still is—closely related to the desire for social change. Themes related to gender, ethnic, and racial identity as well as the consequences of social inequality and ecological disasters have been fundamental to many artists' practices. This compendium explores the history and current state of artistic experimentation with video throughout Latin America. Departing from the relatively small body of existing scholarship in English, much of which focuses on individual countries, this volume approaches the topic thematically, positioning video artworks from different periods and regions throughout Latin America in dialogue with each other. Organized in four broad sections—Encounters, Networks and Archives, Memory and Crisis, and Indigenous Perspectives—the book's essays and interviews encourage readers to examine the medium of video across varied chronologies and geographies.

Performing Communities Robert H. Leonard,Ann Kilkelly,2006-04 Ensemble theater is one of the vibrant, meaningful American performance forms today. It's more than art- it's a social movement. Ensemble theater is one of the hottest, most engaging American performance forms today. It's more than art- it's a movement. Performing Communities is an inquiry into a genre of theater that arises from and empowers the grassroots. The book profiles established ensemble groups from inner-city Los Angeles, small-town northern California, African-American South, multicultural southern Texas, low-income central Appalachia, economically struggling South Bronx New York, and cross-continental Native America. This compendium of critical writing about the role these theaters play in building community shows how these artist groups are forged by working in and with their communities over time. Ensemble theater is discovered to be neither alternative nor marginalized, but vanguard, a natural evolution of the movement that propelled regional theater away from the commercial restraints of New York and toward a theater expressive of the rich diversity of American culture. It is theater that is politically and emotionally charged. It can be cathartic, healing, and has a proven ability to effect social change. The book Performing Communities is a project of the Community Arts Network. It has been created from interviews, analytical essays, and play excerpts from the Grassroots Theater Ensemble Research Project, an inquiry into American ensemble theaters that have been working in communities for 10 to 35 years. Although originating from a scholarly report, the language has been edited for a popular audience and offers an intimate glimpse into each local ensemble community. The book will appeal to followers of contemporary and popular theater, social change activists, community building specialists, and a public curious about cultural development in the United States.

The Routledge Companion to Latine Theatre and Performance Noe Montez,Olga Sanchez Saltveit,2024-02-29 The Routledge Companion to Latine Theatre and Performance traces how manifestations of Latine self-determination in contemporary US theatre and performance practices affirm the value of Latine life in a theatrical culture that has a legacy of misrepresentation and erasure. This collection draws on fifty interdisciplinary contributions written by some of the leading Latine theatre and performance scholars and practitioners in the United States to highlight evolving and recurring strategies of world making, activism, and resistance taken by Latine culture makers to gain political agency on and off the stage. The project reveals the continued growth of Latine theatre and performance through chapters covering but not limited to playwriting, casting practices, representation, training, wrestling with anti-Blackness and anti-Indigeneity, theatre for young audiences, community empowerment, and the market forces that govern the US theatre industry. This book enters conversations in performance studies, ethnic studies, American studies, and Latina/e/o/x studies by taking up performance scholar Diana Taylor's call to consider the ways that "embodied and performed acts generate, record, and transmit knowledge." This collection is an essential resource for students, scholars, and theatremakers seeking to explore, understand, and advance the huge range and significance of Latine performance.

Generation at the Crossroads Paul Rogat Loeb,1994 Challenging prevailing media stereotypes, Generation at the Crossroads explores the beliefs and choices of the students who came of age in the 1980s and 1990s. For seven years, at over a hundred campuses in thirty states, Paul Loeb asked students about the values they held. He examines their concepts of responsibility, the links they draw between present and future, and how they view themselves in relation to the larger human community in which they live. He brings us a range of voices, from I'm not that kind of person, to I had to take a stand. Loeb looks at how the rest of us can serve young people as better role models, and give them courage and vision to help build a better world. This insightful book explores the culture of withdrawal that dominated American campuses through most of the eighties. He locates its roots in historical ignorance, relentless individualism, mistrust of social movements, and a general isolation from urgent realities. He examines why a steadily increasing minority has begun to take on critical public issues, whether environmental activism, apartheid, hunger and homelessness, affordable education, or racial and sexual equity. Loeb looks at individuals who have overcome precisely the barriers he has described, and how their journeys can become models. The generational choices he explores will shape our common future.

Video Games Around the World Mark J. P. Wolf,2015-05-22 Thirty-nine essays explore the vast diversity of video game history and culture across all the world's continents. Video games have become a global industry, and their history spans dozens of national industries where foreign imports compete with domestic productions, legitimate industry contends with piracy, and national identity faces the global marketplace. This volume describes video game history and culture across every continent, with essays covering areas as disparate and far-flung as Argentina and Thailand, Hungary and Indonesia, Iran and Ireland. Most of the essays are

written by natives of the countries they discuss, many of them game designers and founders of game companies, offering distinctively firsthand perspectives. Some of these national histories appear for the first time in English, and some for the first time in any language. Readers will learn, for example, about the rapid growth of mobile games in Africa; how a meat-packing company held the rights to import the Atari VCS 2600 into Mexico; and how the Indonesian MMORPG Nusantara Online reflects that country's cultural history and folklore. Every country or region's unique conditions provide the context that shapes its national industry; for example, the long history of computer science in the United Kingdom and Scandinavia, the problems of piracy in China, the PC Bangs of South Korea, or the Dutch industry's emphasis on serious games. As these essays demonstrate, local innovation and diversification thrive alongside productions and corporations with global aspirations. Africa • Arab World • Argentina • Australia • Austria • Brazil • Canada • China • Colombia • Czech Republic • Finland • France • Germany • Hong Kong • Hungary • India • Indonesia • Iran • Ireland • Italy • Japan • Mexico • The Netherlands • New Zealand • Peru • Poland • Portugal • Russia • Scandinavia • Singapore • South Korea • Spain • Switzerland • Thailand • Turkey • United Kingdom • United States of America • Uruguay • Venezuela

Modelling, Monitoring and Management of Forest Fires II G. Perona,C. A. Brebbia,2010 As in the past, future forest fire scenarios are impacted by climatic trends and changes in climatic extremes, as well as by anthropic pressure. It is to be expected that future trends, especially in the Mediterranean regions, will certainly lead to an increasing impact of human pressure on the natural environment, due to increases in tourism and to the enlargement of urban residential areas invading the countryside. Forecasting the effects of both factors (climatic and anthropic) and separating their effects on forest fires frequencies may be particularly difficult, but is essential to improve our knowledge of forest fire occurrence probability and to better organize prevention and fighting activities. At the same time, estimation of the possible increase of fire risk over coming years is important, taking into account also the diverse fire prone environments present in the Mediterranean as well as many other areas (mountain slopes, coastal zones, large islands, etc). This book contains peer-reviewed papers presented at the Second International Conference on Modelling, Monitoring and Management of Forest Fires held in Kos, Greece, in 2010. The papers covered important topics in the field of prevention and fighting of forest fires, including: Computational Methods and Experiments; Air Quality and Health Risk Models; Detection, Monitoring and Response Systems; Decision Support Systems; Resource Optimization; Risk Assessment and Vulnerability Assessment.

Seeds of the Kingdom Anna L. Peterson,2005-11-17 In these skeptical and disillusioned times, there are still groups of people scattered throughout the world who are trying to live out utopian dreams. These communities challenge the inevitability and morality of dominant political and economic models. By putting utopian religious ethics into practice, they attest to the real possibility of social alternatives. In *Seeds of the Kingdom*, Anna L. Peterson reflects on the experiences of two very different communities, one inhabited by impoverished former refugees in the mountains of El Salvador and the other by Amish farmers in the Midwestern U.S. What makes these groups stand out among advocates of environmental protection, political justice, and sustainable development is their religious orientation. They aim, without apology, to embody the reign of God on earth. The Salvadoran community is grounded in Roman Catholic social thought, while the Amish adhere to Anabaptist tradition. Peterson offers a detailed portrait of these communities' history, social organization, religious life, environmental values, and agricultural practices. She discovers both practical and ideological commonalities in these two comparatively successful and sustainable communities, including a strong collective identity, deep attachment to local landscapes, a desire to preserve non-human as well as human lives, and, perhaps unexpectedly, a utopian horizon that provides both goals and the hope of reaching them. By examining the process by which people struggle to live according to a transcendent value system, she sheds light on both the actual and the potential place of religion in public life. Peterson argues that the Amish and Salvadoran communities, geographically and culturally removed from the industrialized West, have relevance for the political and environmental problems of the developed world. These communities have succeeded in the face of significant internal and external challenges, offering important practical and theoretical lessons on how to achieve ecological sustainability and social justice in the wider world.
