Archaeological Mission of Chieti University in Libya: Reports 2006-2008 Oliva Menozzi, 2020-12-24 This volume is dedicated to the Archaeological Mission in Cyrenaica, starting with the reports and researches of the seasons from 2006 to 2008. The emphasis of the publication is to present archaeological data to form part of an archive of finds, sites and monuments: a resource and reference point for archaeologists from Libya and elsewhere.

The Shadow Drawing Francesca Fiorani, 2020-11-17 [The Shadow Drawing] reorients our perspective, distills a life and brings it into focus—the very work of revision and refining that its subject loved best. —Parul Sehgal, The New York Times | Editors' Choice An entirely new account of Leonardo the artist and Leonardo the scientist, and why they were one and the same man Leonardo da Vinci has long been celebrated for his consummate genius. He was the painter who gave us the Mona Lisa and The Last Supper, and the inventor who anticipated the advent of airplanes, hot air balloons, and other technological marvels. But what was the connection between Leonardo the painter and Leonardo the scientist? Historians of Renaissance art have long supposed that Leonardo became increasingly interested in science as he grew older and turned his insatiable curiosity in new directions. They have argued that there are, in effect, two Leonardos—an artist and an inventor. In this pathbreaking new interpretation, the art historian Francesca Fiorani offers a different view. Taking a fresh look at Leonardo's celebrated but challenging notebooks, as well as other sources, Fiorani argues that Leonardo became familiar with advanced thinking about human vision when he was still an apprentice in a Florence studio—and used his understanding of optical science to develop and perfect his painting techniques. For Leonardo, the task of the painter was to capture the interior life of a human subject, to paint the soul. And even at the outset of his career, he believed that mastering the scientific study of light, shadow, and the atmosphere was essential to doing so. Eventually, he set down these ideas in a book—A Treatise on Painting—that he considered his greatest achievement, though it would be disfigured, ignored, and lost in subsequent centuries. Ranging from the teeming streets of Florence to the most delicate brushstrokes on the surface of the Mona Lisa, *The Shadow Drawing* vividly reconstructs Leonardo's life while teaching us to look anew at his greatest paintings. The result is both stirring biography and a bold reconsideration of how the Renaissance understood science and art—and of what was lost when that understanding was forgotten.

Corsica and North Sardinia Royal Cruising Club Pilotage Foundation, 2020-03-25 Corsica and North Sardinia is a well-established guide to Corsica and the northern region of Sardinia, which together constitute several varied cruising grounds— from the sometimes exposed and often dramatic bays of Corsica's west coast to the more protected and gentle cruising on its eastern side, to the rich choice of anchorages in the Bouches de Bonifacio and on Sardinia's island-studded north coast. This whole region is justifiably popular with cruising sailors, particularly in the summer season. This fourth edition has been thoroughly revised by the authors, who have spent the past two years exploring the Corsican and Sardinian coastlines on their Bowman 40, Easy Rider. Included are a

multitude of new photographs as well as thorough updates to the plans and text. Several marine reserves have been established in the region and the latest restrictions of these are well documented. Corsica and North Sardinia is the ideal guide, either for charter skippers or longer-term cruising sailors who want to make the most of this very special corner of the Mediterranean.

Historia and Fabula Peter G. Bietenholz, 1994-09-01 Examining a variety of texts ranging from the Ancient Near East to the nineteenth century, this book deals with the inevitable presence of both fact and fiction in historical thought and investigates when, where and to what degree they were distinguished.

Influences on Peripatetic Rhetoric David C. Mirhady, 2007 Each paper explores the influences on different parts of Peripatetic rhetoric, its discussion of character, emotion, reason, and style, its relationships with other texts, including those of Theodectes and the *Rhetorica ad Alexandrum*, and its relationship with the oratory of the 4th century BC.

Correspondence of John Wallis (1616-1703) Philip Beeley, Christoph J. Scriba, 2012-05-03 Containing many previously unpublished letters, this third volume of a six volume collection of the complete correspondence of John Wallis (1616-1703), documents an important period in the history of the Royal Society and the University of Oxford. By providing access to these letters, this painstakingly crafted edition will enable readers to gain a deeper and richer awareness of the intellectual culture on which the growth of scientific knowledge in early modern Europe was based. Wallis was Savilian Professor of Geometry of Oxford from 1649 until his death, and was a founding member of the Royal Society and a central figure in the scientific and intellectual history of England. In the period covered Wallis is engaged in scientific debates on techniques for determining areas contained by curves (quadratures) and figures (cubatures), as well as on the theory of motion and the nature of the tides. He also continues to attack the mathematical undertakings of Thomas Hobbes and to respond to attacks which the philosopher in turn levels against him. We also find evidence for the consolidation of mathematics as an academic discipline in the University of Oxford just fifty years after the establishment of the first mathematical lecturerships. Wallis is called upon more than once to deliver ceremonial lectures on mathematical topics to foreign dignitaries visiting the University. At the same time the volume allows us to witness the beginnings of a remarkable development in mathematical publishing. Many of Wallis's letters to Henry Oldenburg, secretary of the Royal Society, on a variety of topics in the mathematical and physical sciences, are transformed into articles and published in Oldenburg's journal, the *Philosophical Transactions*. Part of the reason for this development also becomes clear in the letters: the long and costly process of publishing mathematical books such as Wallis's three part *Mechanica: sive de motu*. This volume not only signals the modernization of mathematics in the second half of the seventeenth century but we also see two new figures emerge for the first time, whose careers are in different ways closely associated with Wallis: Isaac Newton and Gottfried Wilhelm Leibniz.

 2020 03 27 in the book of deuteronomy d he argues that a
 precise reconstruction of the historical referents of d
 s ger is impossible and has led scholars to misread or
 overlook literary theological and sociological
 determinants by analyzing d s ger texts and contexts
