Concrete in the Service of Mankind Ravindra Dhir,Thomas Dyer,1996-06-13 Concrete is ubiquitous and unique, found in every developed and developing country. Indeed, there are no alternatives to concrete as a volume construction material for infrastructure. This raises important questions of how concrete should be designed and constructed for cost effective use in the the short and long term, and to encourage further radical development. Equally, it must be environmentally friendly during manufacture, in an aesthetic presentation in structures and in the containment of harmful materials. The central theme of the Congress is Concrete in the Service of Mankind, under which five self-contained Conferences, each dealing with a particular aspect, are planned. The Congress offers opportunity to discuss how to improve and extend this service to mankind using responsible exploitation, underwritten by sound technical understanding and research base. It brings together the shared skills and experience of the various disciplines involved in the construction process world wide. This major publication continues the tradition established by Dundee University of organizing major international conferences every three years dealing with some aspect of concrete and also the link between Spon and Dundee University for publication of the proceedings. This book should be of interest to concrete technologists; contractors; civil engineers; consultants; government agencies; research organizations.

Stranded Assets and the Environment Ben Caldecott,2018-05-11 Drawing on the work of leading researchers and practitioners from a range of disciplines, including economic geography, economics, economic history, finance, law, and public policy, this edited collection provides a comprehensive assessment of stranded assets and the environment, covering the fundamental issues and debates, including climate change and societal responses to environmental change, as well as its origins and theoretical basis. The volume provides much needed clarity as the discourse on stranded assets gathers further momentum. The work adopts a broad based social science perspective for setting out what stranded assets are, why they are relevant, and how they might inform the decision-making of firms, investors, policymakers, and regulators. The topic of stranded assets is inherently multi-disciplinary, cross-sectoral, and multi-jurisdictional and the volume reflects this diversity. Lorado Taft Allen Stuart Weller,2014-10-15 Sculptor Lorado Taft helped build Chicago's worldwide reputation as the epicenter of the City Beautiful Movement. In this new biography, art historian Allen Stuart Weller picks up where his earlier book *Lorado in Paris* left off, drawing on the sculptor's papers to generate a fascinating account of the most productive and influential years of Taft's long career. Returning to Chicago from France, Taft established a bustling studio and began a twenty-one-year career as an instructor at the Art Institute, succeeded by three decades as head of the Midway Studios at the University of Chicago. This triumphant era included: ephemeral sculpture for the 1893 World's Columbian Exposition; a prolific turn-of-the-century period marked by the gold-medal-winning *The Solitude of the Soul*; the 1913 *Fountain of the Great Lakes*; the 1929 *Alma Mater* at the University of Illinois; and large-scale projects such as his ambitious program for Chicago's Midway with the monumental *Fountain of Time*. In addition, the book charts Taft's mentoring of women artists, including the so-called *White Rabbits* at the World's Fair, many of whom went on to achieve artistic success. Lavishly illustrated with color images of Taft's most celebrated works, *Lorado Taft: The Chicago Years* completes the first major study of a great American artist.

The Gettysburg Trilogy Newt Gingrich,2010-12-14 The Civil War is the American Iliad. Lincoln, Stonewall Jackson, Grant, and Lee still stand as heroic ideals, as stirring to our national memory as were the legendary Achilles and Hector to the world of the ancient Greeks. In their bestselling, action-packed and painstakingly researched Civil War series, Newt Gingrich and William R. Forstchen examine some of the great what-ifs of American history: Could Lee have defeated the Union Army at Gettysburg and led the South to triumph in the war? For the first time ever *The Gettysburg Trilogy* combines all three books in the Civil War Series. Gettysburg, the series' first installment, opens in 1863 as General Robert E. Lee and his Army of Northern Virginia are poised to attack the North and claim the victory that could end the brutal conflict. The soldiers in the line, Yank and Reb, know that this will be the great challenge, the decisive moment that will decide whether a nation will die, or be created, and both sides are ready and willing to lay down their lives for their Cause. Grant Comes East continues the story of a Confederate victory at Gettysburg, as General Lee marches on Washington, DC, and launches an assault against one of the largest fortifications in the world. At the same time, Lincoln appoints General Ulysses S. Grant commander of all Union forces. Grant, fresh from his triumph at Vicksburg, races east, bringing with him his hardened veterans from Mississippi to confront Lee.

Finally, Never Call Retreat concludes this tour de force story of true heroism and glory in America's most trying hour with an epic, week-long showdown between Grant and Lee as each man struggles to bring victory to his name, his men, and his country. Also included are excerpts from the first two books in Newt Gingrich and William F. Forstchen's Revolutionary War Series: To Try Men's Souls and Valley Forge.

Percy Manning: The Man Who Collected Oxfordshire Michael Heaney,2017-02-18 This volume provides the first detailed biography Percy Manning (1870-1917), an Oxford antiquary who amassed enormous collections about the history of Oxford and Oxfordshire.
