Bitter Root #9 David F. Walker, Chuck Brown, 2020-07-08 Rage and Redemption, Part Four While searching for Adro, the Sangerye family find themselves trapped in a southern town full of jinoo that want them dead. Meanwhile, in New York, Blink faces a horror beyond imagination. Sylvester realizes the true nature of Adro, but will he survive long enough to do anything about it?

CLOUD AND INTERNET SECURITY Binh Nguyen, A while back I wrote two documents called 'Building a Cloud Service' and the 'Convergence Report'. They basically documented my past experiences and detailed some of the issues that a cloud company may face as it is being built and run. Based on what had transpired since, a lot of the concepts mentioned in that particular document are becoming widely adopted and/or are trending towards them. This is a continuation of that particular document and will attempt to analyse the issues that are faced as we move towards the cloud especially with regards to security. Once again, we will use past experience, research, as well as current events trends in order to write this particular report. Personal experience indicates that keeping track of everything and updating large scale documents is difficult and depending on the system you use extremely cumbersome. The other thing readers have to realise is that a lot of the time even if the writer wants to write the most detailed book ever written it's quite simply not possible. Several of my past works (something such as this particular document takes a few weeks to a few months to write depending on how much spare time I have) were written in my spare time and between work and getting an education. If I had done a more complete job they would have taken years to write and by the time I had completed the work updates in the outer world would have meant that the work would have meant that at least some of the content would have been out of date. Dare I say it, by the time that I have completed this report itself some of the content may have come to fruition as was the case with many of the technologies with the other documents? I very much see this document as a starting point rather than a complete reference for those who are interested in technology security. Note that the information contained in this document is not considered to be correct nor the only way in which to do things. It's a mere guide to how the way things are and how we can improve on them. Like my previous work, it should be considered a work in progress. Also, note that this document has gone through many revisions and drafts may have gone out over time. As such, there will be concepts that may have been picked up and adopted by some organisations while others may have simply broken cover while this document was being drafted and sent out for comment. It also has a more strategic/business slant when compared to the original document which was more technically orientated. No illicit activity (as far as I know and have researched) was conducted during the formulation of this particular document. All information was obtained only from publicly available resources and any information or concepts that are likely to be troubling has been redacted. Any relevant vulnerabilities or flaws that were found were reported to the relevant entities in question (months have passed). Feedback/credit on any ideas that are subsequently put into action based on the content of this document would be appreciated. Any feedback on the content of this document is welcome. Every attempt has been made to ensure that the instructions and information herein are accurate and reliable. Please send corrections, comments, suggestions and questions to the author. All trademarks and copyrights are the property of their owners, unless otherwise indicated. Use of a term in this document should not be regarded as affecting the validity of any trademark or service mark. The author would appreciate and consider it courteous if notification of any and all modifications, translations, and printed versions are sent to him. Please note that this is an organic document that will change as we learn more about this new computing paradigm. The latest copy of this document can be found either on the author's website, blog, and/or <http://www.tldp.org/>

VersaStack Solution by Cisco and IBM with Oracle RAC, IBM FlashSystem V9000, and IBM Spectrum Protect Jon Tate, Dharmesh Kamdar, Dong Hai Yu, Randy Watson, IBM Redbooks, 2016-10-17 Dynamic organizations want to accelerate growth while reducing costs. To do so, they must speed the deployment of business applications and adapt quickly to any changes in priorities. Organizations today require an IT infrastructure that is easy, efficient, and versatile. The VersaStack solution by Cisco and IBM® can help you accelerate the deployment of your data centers. It reduces costs by more efficiently managing information and resources while maintaining your ability to adapt to business change. The VersaStack solution combines the innovation of Cisco UCS Integrated Infrastructure with the efficiency of the IBM Storwize® storage system. The Cisco UCS Integrated Infrastructure includes the Cisco Unified Computing System (Cisco UCS), Cisco Nexus and Cisco MDS switches, and Cisco UCS Director. The IBM FlashSystem® V9000 enhances virtual environments with its Data Virtualization, IBM Real-time Compression™, and IBM Easy Tier® features. These features deliver extraordinary levels of performance and efficiency. The VersaStack solution is Cisco Application Centric Infrastructure (ACI) ready. Your IT team can build, deploy, secure, and maintain applications through a more agile framework. Cisco Intercloud Fabric capabilities help enable the creation of open and highly secure solutions for the hybrid cloud. These solutions accelerate your IT transformation while delivering dramatic improvements in operational efficiency and simplicity. Cisco and IBM are global leaders in the IT industry. The VersaStack solution gives you the opportunity to take advantage of integrated infrastructure solutions that are targeted at enterprise applications, analytics, and cloud solutions. The VersaStack solution is backed by Cisco Validated Designs (CVD) to provide faster delivery of applications, greater IT efficiency, and less risk. This IBM Redbooks® publication is aimed at experienced storage administrators who are tasked with deploying a VersaStack solution with Oracle Real Application Clusters (RAC) and IBM Spectrum™ Protect.

Introduction to Linux (Third Edition) Machtelt Garrels, 2010-05 Whether you're just starting out with Linux or looking to hone your existing skills, this book will provide you with the knowledge you need. For new users, it is an exploration tour and getting started guide, with exercises at the end of each chapter. Advanced trainees can consider it a desktop reference, a collection of the base knowledge needed to tackle system and network administration. To help you work more effectively with Linux, this book contains hundreds of real life examples derived from the author's experience as a Linux system and network administrator, trainer and consultant. These examples will help you to get a better understanding of the Linux system and feel encouraged to try out things on your own.

Introduction to Linux (Second Edition) Machtelt Garrels, 2007 Whether you're just starting out with Linux or looking to hone your existing skills, this book will provide you with the knowledge you need.

UNIX Deborah S. Ray, Eric J. Ray, 2003 What was once regarded as the purview of programmers and administrators is now making its way to users' desktops—most notably via Mac OS X—and users have begun to take note. When you're ready to get to the heart of it all—to the operating system at the core of the Internet, the intranet, and quite possibly your own desktop—there's no better way to start than by consulting with this handy Visual QuickStart Guide. The authors who made Unix comprehensible to the masses are back with Unix, 2nd Edition: Visual QuickStart Guide—completely updated to reflect all that's new in Unix. The book discusses how to run a home network server and use CUPS, Samba, http, and more. Through simple step-by-step instructions, numerous tips, and plenty of visual references, you'll learn everything you need to know to make sense of the flavors, commands, and technical jargon surrounding the Unix operating system. Printing in the Unix environment, managing your system, and more are all covered in the straightforward, approachable style that has become the hallmark of the Visual QuickStart series.

Introduction to Chinese Internal Medicine Xiang Xia, 2013 In order to popularize Chinese internal medicine and allow readers to grasp its basic theories as well as diagnostic and therapeutic methods, we wrote this book in a language easily comprehensible by the layman. For ease of learning by modern doctors, we proceeded from the current clinical practice and outlined the contents with Western disease names. There are more than 80 diseases discussed in this book. For each disease, the Chinese syndrome differentiation and treatment as well as modern diagnostic key points are provided, to make it more convenient for the readers to study and understand. The study of each disease should begin from its etiology, pathology and diagnostic key points, followed by the differentiated patterns and corresponding treatments. The respective points of caution for each disease should also be well-noted. Finally, the questions forming the Daily Exercises are useful for readers to check their comprehension and recall of the material.

The Debian Administrator's Handbook, Debian Wheezy from Discovery to Mastery Raphaël Hertzog, Roland Mas, 2014-06-18 Accessible to all, this book teaches the essentials to anyone who wants to become an effective and independent Debian GNU/Linux administrator. It covers all the topics that a competent Linux administrator should master, from the installation and the update of the system, up to the creation of packages and the compilation of the kernel, but also monitoring, backup and migration, without forgetting advanced topics like SELinux setup to secure services, automated installations, or virtualization with Xen, KVM or LXC. The Debian Administrator's Handbook, Debian Jessie from Discovery to Mastery Raphaël Hertzog, Roland Mas, 2015-10-21 Debian GNU/Linux, a very popular non-commercial Linux distribution, is known for its reliability and richness. Built and maintained by an impressive network of thousands of developers throughout the world, the Debian project is cemented by its social contract. This foundation text defines the project's objective: fulfilling the needs of users with a 100% free operating system. The success of Debian and of its ecosystem of derivative distributions (with Ubuntu at the forefront) means that an increasing number of administrators are exposed to Debian's technologies. This Debian Administrator's Handbook, which has been entirely updated for Debian 8 “Jessie”, builds on the success of its 6 previous editions. Accessible to all, this book teaches the essentials to anyone who wants to become an effective and independent Debian GNU/Linux administrator. It covers all the topics that a competent Linux administrator should master, from installation to updating the system, creating packages and compiling the kernel, but also monitoring, backup and migration, without forgetting advanced topics such as setting up SELinux or AppArmor to secure services, automated installations, or virtualization with Xen, KVM or LXC. This book is not only designed for professional system administrators. Anyone who uses Debian or Ubuntu on their own computer is de facto an administrator and will find tremendous value in knowing more about how their system works. Being able to understand and resolve problems will save you invaluable time. Learn more about the book on its official website: debian-handbook.info

Alternative and Complementary Therapies for Cancer Moulay Alaoui-Jamali, 2010-09-02 Cancer is a common disease with a devastating impact on the physical and psychological well being of patients. The diagnosis of cancer brings upon many clinical challenges and questions for which clear and simple answers are not always provided by modern medicine. To date, only limited therapeutic options are available for patients with advanced cancer. The recent shift toward targeted therapies has improved substantially patient's survival, however, relapses are frequent and cure remains rare. This led patients and many health care managers to shift attention to the holistic approach of traditional medicine particularly preparations from herbal products to manage and alleviate the disease. Typically, herbal preparations contain single or multiple plant ingredients, including a number of potential active components. Yet, they remain classified as food supplements and thus are exempt from regulations on quality control and proof of efficacy that govern standard pharmaceuticals. Clinical evidence for many preparations is often based on non-documented or anecdotal evidence. In consequence, several preparations with unproven efficacy are circulating in the market with the fear of interference with standard cancer therapies and/or severe toxicity that some can generate, in addition to the unjustified economical burden to patients. Despite inconsistent and conflicting clinical results single molecules have been isolated from herbal preparations and many are exploited to develop potential novel agents. This has fostered the need to organize a set of timely, in-depth and up-to-date review covering the latest developments in alternative cancer management from a scientific and clinical perspective dedicated to the medical community and health care providers, as well as to patients and their families. This book brings the latest comprehensive cancer information and practical recommendations on the best documented practice of alternative therapies for cancer management put together by recognized experts in the fields of medical oncology, traditional medicine, and cancer pharmacology. It goes hand-in-hand with the patient's medical treatment options, quality of life issues, and more. The book is organized into four major sections: The first is an overview of the cancer syndrome by renowned medical oncologists from the USA and Europe. The second is a comprehensive description of traditional medicine by renowned experts from China and Germany. The third is an overview on the pharmacological impact of herb-based formulations on standard chemotherapy agents used in clinical practice. The fourth is a survey of cases reports from several hospitals with approved practice of alternative medicine. The book will feature simple definitions and essential information grouped in both medical and lay-term terminology, and straightforward illustrations related to human physiology, disease definition, scientific data on known and potential mechanisms of action, and preventive approaches. Finally, the book will feature collaboration of experts from China, India, USA, Canada, Germany, France, and other centres with recognized expertise in alternative/traditional medicine. This international cooperation is crucial to cover the complex topic of alternative therapies for cancer.
