The Hunted One Brittney Sahin,2021-10-18 Will this growly protector break her book-loving heart . . . or become her second chance at love? Savanna Vasquez lost her Navy SEAL husband years ago to terrorists, and she doesn't think she's capable of falling in love again. So, she busies herself by running her café and buries her face in the pages of fiction for a romantic escape. But when her late husband's brother finds his way into her life, bringing a world of danger with him, Savanna is protected by a group of tough former Army guys. She feels like she's inside one of her favorite novels, but she's not so sure if her happily-ever-after will be guaranteed, especially when she finds herself alone with one of the dangerously handsome Delta operators. After twenty years of serving his country in the Army, Griffin Andrews now works for an elite security team. When he's sent on a mission to protect a friend of the firm, he never expects to meet a woman who will bring his dead heart back to life. In Griffin's eyes, Savanna's still married, even if only in her heart--which means she's off-limits. Forget the fact she's also his assignment. With her being hunted by an unknown number of threats, he needs to focus on her safety and not the way she feels in his arms. Griffin's resolve begins to slip the more time they spend together and his self-control snaps. The unexplainable connection between them has them both wondering if maybe they were brought together for another reason. And as Griffin does everything in his power to save Savanna, he discovers there's a chance she just might save him too. From Wall Street Journal bestselling author, Brittney Sahin, comes a thrilling new series, full of sizzle and suspense. The Falcon Falls Security team will take you on exciting adventures around the globe as the heroes fall in love in these standalone romance military novels.

Toleration Bican Sahin,2010-06-23 More than anything, diversity is what characterizes societies of the 21st century. Our contemporary societies are marked by ethnic, religious, racial, ideological, moral, and sexual diversity. Cultural, moral, and ideological pluralism is a fact of our lives. While some people see this phenomenon as a source of richness and thus welcome it, others feel threatened by it. Those who feel threatened have two options before them; they will either learn how to live with diversity or look for ways to suppress it. While, this latter option causes social conflict, the former ameliorates social conflict. This option is called 'toleration.' Toleration: The Liberal Virtue is a defense of toleration as a remedy to societal conflict caused by differences. It examines four prominent grounds of toleration: skepticism, prudence, autonomy, and conscience which are illustrated through the works of four pioneering liberals, namely, Michel de Montaigne, John Locke, John Stuart Mill, and Pierre Bayle, respectively.

The Vaccine Joe Miller,Özlem Türeci,Ugur Sahin,2022-02-01 Winners of the Paul Ehrlich Prize The dramatic story of the married scientists who founded BioNTech and developed the first vaccine against COVID-19. Nobody thought it was possible. In mid-January 2020, Ugur Sahin told Özlem Türeci, his wife and decades-long research partner, that a vaccine against what would soon be known as COVID-19 could be developed and safely injected into the arms of millions before the end of the year. His confidence was built upon almost thirty years of research. While working to revolutionize the way that cancerous tumors are treated, the couple had explored a volatile and overlooked molecule called messenger RNA; they believed it could be harnessed to redirect the immune system's forces against any number of diseases. As the founders of BioNTech, they faced widespread skepticism from the scientific community at first; but by the time Sars-Cov-2 was discovered in Wuhan, China, BioNTech was prepared to deploy cutting edge technology and create the world's first clinically approved inoculation for the coronavirus. The Vaccine draws back the curtain on one of the most important medical breakthroughs of our age; it will reveal how Doctors Sahin and Türeci were able to develop twenty vaccine candidates within weeks, convince Big Pharma to support their ambitious project, navigate political interference from the Trump administration and the European Union, and provide more than three billion doses of the Pfizer/BioNTech vaccine to countries around the world in record time. Written by Joe Miller—the Financial Times' Frankfurt correspondent who covered BioNTech's COVID-19 project in real time—with contributions from Sahin and Türeci, as well as interviews with more than sixty scientists, politicians, public health officials, and BioNTech staff, the book covers key events throughout the extraordinary year, as well as exploring the scientific, economic, and personal background of each medical innovation. Crafted to be both completely accessible to the average reader and filled with details that will fascinate seasoned microbiologists, The Vaccine explains the science behind the breakthrough, at a time when public confidence in vaccine safety and efficacy is crucial to bringing an end to this pandemic.

THE HATE TRAP Haluk Çahin,2023-04-23 It is the documentary story of one of the most important political assassinations of the 20th century, with secret F.B.I reports, the murderer's confessions, court records. Why were two Turkish diplomats Bahadır Demir and Mehmet Baydar killed in 1973 in Santa Barbara by Gourgen Mkrtich Yanikian? What does this murder have to do with the murder of journalist Hrant Dink? A cry against hate speech on the 50th anniversary of the murders...

New Directions in Islamic Education Abdullah Sahin,2013-12-23 A groundbreaking rethink of Islamic education in the modern world.

Empire and Power in the Reign of Süleyman Kaya Çahin,2013-03-29 Kaya Çahin's book offers a revisionist reading of Ottoman history during the reign of Süleyman the Magnificent (1520–66). By examining the life and

works of a bureaucrat, Celalzade Mustafa, Şahin argues that the empire was built as part of the Eurasian momentum of empire building and demonstrates the imperial vision of sixteenth-century Ottomans. This unique study shows that, in contrast with many Eurocentric views, the Ottomans were active players in European politics, with an imperial culture in direct competition with that of the Habsburgs and the Safavids. Indeed, this book explains Ottoman empire building with reference to the larger Eurasian context, from Tudor England to Mughal India, contextualizing such issues as state formation, imperial policy and empire building in the period more generally. Şahin's work also devotes significant attention to the often-ignored religious dimension of the Ottoman-Safavid struggle, showing how the rivalry redefined Sunni and Shiite Islam, laying the foundations for today's religious tensions.

Neutrosophic Triplet Group Based on Set Valued Neutrosophic Quadruple Numbers Memet Şahin, Abdullah Kargın, Smarandache introduced neutrosophic quadruple sets and neutrosophic quadruple numbers [45] in 2015. These sets and numbers are real or complex number valued. In this study, we firstly introduce set valued neutrosophic quadruple sets and numbers. We give some known and special operations for set valued neutrosophic quadruple numbers.

Physical Properties of Foods Serpil Sahin, Servet Gülüm Sumnu, 2007-05-27 This book provides a fundamental understanding of physical properties of foods. It is the first textbook in this area and combines engineering concepts and physical chemistry. Basic definitions and principles of physical properties are discussed as well as the importance of physical properties in the food industry and measurement methods. In addition, recent studies in physical properties are summarized. The material presented is helpful for students to understand the relationship between physical and functional properties of raw, semi-finished, and processed food in order to obtain products with desired shelf-life and quality.

Chasing the Storm Brittney Sahin, 2021 Cold one minute. Hot the next. She gives him whiplash, and he's either going to ditch his duties . . . or make her his. She was only supposed to be a quick assignment for Dalton “Finn” Finnegan—bodyguard for the sister of a friend, kind of gig. As the only single guy on Echo Team, an elite unit of off-the-books Navy SEALs, Finn’s certain his teammates are hoping to play matchmaker between him and the headstrong and gorgeous brunette. Julia Maddox, a millionaire businesswoman with a passion for helping veterans, doesn't want protection or love. But when she starts receiving threats from an unknown source, her brother calls in a favor. The last thing she needs is a sexy six-foot-tall roadblock standing in her way as she's desperate to atone for her past and help save a friend. And yet, her ice-cold attitude toward Finn slowly melts and things between them start to heat up when they find themselves halfway across the world on a wild adventure neither saw coming. But despite their sizzling chemistry, Finn's as reluctant to fall for Julia as she is for him, and he's all too familiar with guilt. As they travel from Egypt and on to Dubai, they learn they're mixed up in something much more dangerous than either imagined, and Finn is forced to conquer his own demons or risk losing the girl. Will they be able to shelter their hearts while they weather the storm, or is one bound to get broken?

Philosopher Kings? George C. Christie, 2011 'Philosopher Kings' examines the attempts by courts to sort out conflicts involving freedom of expression, including religious expression on the one hand and rights to privacy and other important social values on the other.

Riemannian Submersions, Riemannian Maps in Hermitian Geometry, and their Applications Bayram Sahin, 2017-01-23 Riemannian Submersions, Riemannian Maps in Hermitian Geometry, and their Applications is a rich and self-contained exposition of recent developments in Riemannian submersions and maps relevant to complex geometry, focusing particularly on novel submersions, Hermitian manifolds, and Kählerian manifolds. Riemannian submersions have long been an effective tool to obtain new manifolds and compare certain manifolds within differential geometry. For complex cases, only holomorphic submersions function appropriately, as discussed at length in Falcitelli, Ianus and Pastore’s classic 2004 book. In this new book, Bayram Sahin extends the scope of complex cases with wholly new submersion types, including Anti-invariant submersions, Semi-invariant submersions, slant submersions, and Pointwise slant submersions, also extending their use in Riemannian maps. The work obtains new properties of the domain and target manifolds and investigates the harmonicity and geodesicity conditions for such maps. It also relates these maps with discoveries in pseudo-harmonic maps. Results included in this volume should stimulate future research on Riemannian submersions and Riemannian maps. Systematically reviews and references modern literature in Riemannian maps Provides rigorous mathematical theory with applications Presented in an accessible reading style with motivating examples that help the reader rapidly progress

Faithful Encounters Emrah Şahin, 2018-10-31 By the early twentieth century, there were close to two hundred American missionaries working in the Middle East and Eastern Europe. They came in droves as early as 1830, organizing hundreds of schools, hospitals, printing presses, and seminaries. Until now, the missionaries' sources and perspectives have dominated discussions of this moment in history, but the experiences of the Ottoman authorities are just as, if not more, revealing of an increasingly tense relationship between Christianity and Islam. An enthralling narrative of how locals made sense of American religious activity in the Ottoman Empire, *Faithful Encounters* examines the relationships between the authorities who managed the empire from the capital city of Istanbul, provincial agents who carried out the capital's orders, and the missionaries who engaged with them. Exploring a wide range of untapped sources – from imperial ministries, security forces, and local petitions to international reports and missionary collections – Emrah Sahin traces the interactions of the Ottoman authorities, focusing on the viewpoints and manoeuvres they adopted to monitor and conquer the missionary presence at a time of turbulent public and political upheaval. Offering a comparative context from which to reconsider recent cultural relations in the region, *Faithful Encounters* is not only a history of Christian and Muslim relations. It is a lesson about a failing mission in a failing empire, with stunning relevance to the looming religious and ethnic crises of today.

Instrumentation Handbook for Biomedical Engineers Mesut Sahin, 2020-10-27 The book fills a void as a textbook with hands-on laboratory exercises designed for biomedical engineering undergraduates in their senior year or the first year of graduate studies specializing in electrical aspects of bioinstrumentation. Each laboratory exercise concentrates on measuring a biophysical or biomedical entity, such as force, blood pressure, temperature, heart rate, respiratory rate, etc., and guides students through all the way from sensor level to data acquisition and analysis on the computer. The book distinguishes itself from others by providing electrical circuits and other measurement setups that have been tested by the authors while teaching undergraduate classes at their home institute over many years. Key Features: • Hands-on laboratory exercises on measurements of biophysical and biomedical variables • Each laboratory exercise is complete by itself and they can be covered in any sequence desired by the instructor during the semester • Electronic equipment and supplies required are typical for biomedical engineering departments • Data collected by undergraduate students and data analysis results are provided as samples • Additional information and references are included for preparing a report or further reading at the end of each chapter Students using this book are expected to have basic knowledge of electrical circuits and troubleshooting. Practical information on circuit components, basic laboratory equipment, and circuit troubleshooting is also provided in the first chapter of the book.

Folk Heroes and Heroines around the World Graham Seal, Kim Kennedy White, 2016-03-14 This comprehensive collection of folk hero tales builds on the success of the first edition by providing readers with expanded contextual information on story characters from the Americas to Zanzibar. Despite the tremendous differences between cultures and ethnicities across the world, all of them have folk heroes and heroines—real and imagined—that have been represented in tales, legends, songs, and verse. These stories persist through time and space, over generations, even through migrations to new countries and languages. This encyclopedia is a one-stop source for broad coverage of the world's folk hero tales. Geared toward high school and early college readers, the book opens with an overview of folk heroes and heroines that provides invaluable context and then presents a chronology. The book is divided into two main sections: the first provides entries on the major types and themes; the second addresses specific folk tale characters organized by continent with folk hero entries organized alphabetically. Each entry provides cross references as well as a list of further readings. Continent sections include a bibliography for additional research. The book concludes with an alphabetical list of heroes and an index of hero types.

The Museum of Turkish and Islamic Arts Seracettin Şahin, Türk ve İslâm Eserleri Müzesi, 2009 This album presents the best samples from among a large inventory of forty thousand pieces of Islamic art in the The Museum of Turkish and Islamic Arts in Istanbul, Turkey, that represent not only Seljuk and Ottoman empires but also Umayyads, Abbasids, Andalusia, Safavid Empire, and other Muslim states and civilisations across North Africa and Caucasia. -- From Book Dust Jacket.
